BROOKLYN MOHAMMAD

Planting Peace WaterBrook

In this groundbreaking work, the Nobel Peace Prize-winner and founder of the Green Belt Movement offers a new perspective on the troubles facing Africa today. Too often these challenges are portrayed by the media in extreme terms connoting poverty, dependence, and desperation. Wangari Maathai, the author of *Unbowed*, sees things differently, and here she argues for a moral revolution among Africans themselves. Illuminating the complex and dynamic nature of the continent, Maathai offers “hardheaded hope” and “realistic options” for change and improvement. She deftly describes what Africans can and need to do for themselves, stressing all the while responsibility and accountability. Impassioned and empathetic, *The Challenge for Africa* is a book of immense importance.

Routledge Handbook of Minority Discourses in African Literature AK Press

"A biography of Kenyan Nobel Peace Prize winner and environmentalist Wangari Maathai, a female scientist who made a stand in the face of opposition to women's rights and her own Greenbelt Movement, an effort to restore Kenya's ecosystem by planting millions of trees"--Provided by publisher.

WANGARI MAATHAI: AND THE GREEN BELT MOVEMENT

John Wiley & Sons

A unique collection of original essays by 21 of the world's leading linguists. The topics discussed focus on some of the most popular myths about language: The Media Are Ruining English; Children Can't Speak or Write Properly Anymore; America is Ruining the English Language. The tone is lively and entertaining throughout and there are cartoons from *Doonesbury* and *The Wizard of Id* to illustrate some of the points. The book should have a wide readership not only amongst students who want to read leading linguists writing about popular misconceptions but also amongst the large number of people who enjoy reading about language in general.

A High Low Tide Vintage

In twenty short books, Penguin brings you the classics of the environmental movement. From the Congo Basin to the traditions of the Kikuyu people, the lucid, incisive writings in *The World We Once Lived In* explore the sacred power of trees, and why humans lay waste to the forests that keep us alive. Over the past 75 years, a new canon has emerged. As life on Earth has become irrevocably altered by humans, visionary thinkers around the world have raised their voices to defend the planet, and affirm our place at the heart of its restoration. Their words have endured through the decades, becoming the classics of a movement. Together, these books show the richness of environmental thought, and point the way to a fairer, saner, greener world. *Grace and Grit* Routledge

Facing Mount Kenya, first published in 1938, is a monograph on the life and customs of the Gikuyu people of central Kenya prior to their contact with Europeans. It is unique in anthropological literature for it gives an account of the social institutions and

religious rites of an African people, permeated by the emotions that give to customs and observances their meaning. It is characterised by both insight and a tinge of romanticism. The author, proud of his African blood and ways of thought, takes the reader through a thorough and clear picture of Gikuyu life and customs, painting an almost utopian picture of their social norms and the sophisticated codes by which all aspects of the society were governed. This book is one of a kind, capturing and documenting traditions fast disappearing. It is therefore a must-read for all who want to learn about African culture.

FALL OF GIANTS

Penguin

A beginners' guide to the fundamentals of the Dru meditation technique, a method for soothing the mind and relaxing the emotions. The programme includes six short guided meditations designed to instill a sense of profound stillness, quieten and calm a stressed mind and reconnect with the important aspects of life. Each nine-minute meditations is based on one of the elements: Earth, Water, Light, Air and Sky.

Radical Utu Emblem Editions

The inspiring story of the woman at the center of the historic discrimination case that inspired the Lilly Ledbetter Fair Pay Restoration Act, her fight for equal rights in the workplace, and how her determination became a victory for the nation Lilly Ledbetter always knew that she was destined for something more than what she was born into: a house with no running water or electricity in the small town of Possum Trot, Alabama. In 1979, when Lilly applied for her dream job at the Goodyear tire factory, she got the job. She was one of the first women hired at the management level. Nineteen years after her first day at Goodyear, Lilly received an anonymous note revealing that she was making thousands less per year than the men in her position. When she filed a sex-discrimination case against Goodyear, Lilly won--and then heartbreakingly lost on appeal. Over the next eight years, her case made it all the way to the Supreme Court, where she lost again. But Lilly continued to fight, becoming the namesake of President Barack Obama's first official piece of legislation. Both a deeply inspiring memoir and a powerful call to arms, *Grace and Grit* is the story of a true American icon.

DR. WANGARI MAATHAI PLANTS A FOREST

Random House

Following on the heels of *The Womanist Reader*, *The Womanist Idea* offers a comprehensive, systematic analysis of womanism, including a detailed discussion of the womanist worldview (cosmology, ontology, epistemology, logic, axiology, and methodology) and its implications for activism. From a womanist perspective, social and ecological change is necessarily undergirded by spirituality – as distinct from religion per se – which invokes a metaphysically informed approach to activism.

THE BEST LAID PLANS

Ohio University Press

Why is there so little industry in Africa? Over the past forty years, industry has moved from the developed to the developing world, yet Africa's share of global manufacturing has fallen from about 3

percent in 1970 to less than 2 percent in 2014. Industry is important to low-income countries. It is good for economic growth, job creation, and poverty reduction. Made in Africa: Learning to Compete in Industry outlines a new strategy to help African industry compete in global markets. This book draws on case studies and econometric and qualitative research from Africa and emerging Asia to understand what drives firm-level competitiveness in low-income countries. The results show that while traditional concerns such as infrastructure, skills, and the regulatory environment are important, they alone will not be sufficient for Africa to industrialize. The book also addresses how industrialization strategies will need to adapt to the region's growing resource abundance.

Made in Africa Unbowed

Wangari Muta Maathai was a scholar-activist known for founding the Green Belt Movement, an environmental campaign that earned her the Nobel Peace Prize. While many studies of Maathai highlight her activism, few examine Maathai as a scholar whose contributions to various disciplines and causes spanned more than three decades. In *Radical Utu: Critical Ideas and Ideals of Wangari Muta Maathai*, Besi Brilliant Muhonja presents the words and works of Maathai as theoretical concepts attesting to her contributions to gender equality, democratic spaces, economic equity and global governance, and indigenous African languages and knowledges. Muhonja's well-rounded portrait of Maathai's ideas offers a corrective to the one-dimensional characterization of Maathai typical of other works.

The Green Belt Movement Simon and Schuster

Born in a rural Kenyan village in 1940, Wangari Maathai was already an iconoclast as a child, determined to get an education even though most African girls then were uneducated.

Out of Africa Routledge

In *Unbowed*, Nobel Prize winner Wangari Maathai recounts her extraordinary journey from her childhood in rural Kenya to the world stage. When Maathai founded the Green Belt Movement in 1977, she began a vital poor people's environmental movement, focused on the empowerment of women, that soon spread across Africa. Persevering through run-ins with the Kenyan government and personal losses, and jailed and beaten on numerous occasions, Maathai continued to fight tirelessly to save Kenya's forests and to restore democracy to her beloved country. Infused with her unique luminosity of spirit, Wangari Maathai's remarkable story of courage, faith, and the power of persistence is destined to inspire generations to come.

Bad Girls of the Bible UNESCO

Global in reach, this innovative text offers a thematic examination of the unprecedented changes in the realms of politics, demography, economics, culture, knowledge, and kinship that women have brought about since 1900.

UNBOWED

Hachette UK

Ken Follett's magnificent historical epic begins as five interrelated families move through the momentous dramas of the First World War, the Russian Revolution, and the struggle for women's suffrage. A thirteen-year-old Welsh boy enters a man's world in the mining pits. . . . An American law student rejected in love

finds a surprising new career in Woodrow Wilson's White House. . . . A housekeeper for the aristocratic Fitzherberts takes a fateful step above her station, while Lady Maud Fitzherbert herself crosses deep into forbidden territory when she falls in love with a German spy. . . . And two orphaned Russian brothers embark on radically different paths when their plan to emigrate to America falls afoul of war, conscription, and revolution. From the dirt and danger of a coal mine to the glittering chandeliers of a palace, from the corridors of power to the bedrooms of the mighty, *Fall of Giants* takes us into the inextricably entangled fates of five families—and into a century that we thought we knew, but that now will never seem the same again. . . .

WANGARI MAATHAI

Simon and Schuster

This is the inspiring story of Wangari Maathai, women's rights activist and one of the first environmental warriors. Overcoming great obstacles, Wangari began the Green Belt Movement in Kenya in the 1960s, which focused on planting trees, environmental conservation and women's rights. She inspired thousands across Africa to plant 30 million trees in 30 years, saving many from hunger and poverty. Her remarkable story of courage and determination shows how just one person can change the world. The story shows children how desertification works: how land is eroded and degraded when trees aren't there to hold the soil in place so it's not taken away by winds and heavy rain. It explains how all living things are dependent on each other and if trees are taken away, then you not only lessen the fertility of the soil, but you lose the animals that live there and then the animals that rely on those animals for food and so on. As well as explaining important green issues, the book also talks about Wangari's fight for human rights and shows how important it is to stand up for what you believe. The gripping narrative non-fiction text by Gwendolyn Hooks, winner of the NAACP Image Award for Outstanding Literary Work for Children, hooks readers from the start. Vibrant illustrations from print-maker Margaux Carpentier, one of the featured artists in Taschen's *The Illustrator: 100 Best from around the World*, vividly evoke Wangari's amazing life

story. The consultant, Dr Jane Irungu, grew up in Kenya, but is now a Professor at the University of Oklahoma. She was inspired by Wangari when she was growing up and went on to get a PhD just as Wangari did. 'Carpentier's saturated geometric illustrations emphasize the bold impact of Maathai's actions', *Publishers Weekly*, May 2021

Back Stage Penguin

Ten of the Bible's best-known femmes fatales parade across the pages of this popular and unforgettable study with situations that sound oh-so-familiar. Women everywhere marvel at those "good girls" in Scripture—Sarah, Mary, Esther—but on most days, that's not who they see when they look in the mirror. Most women (if they're honest) see the selfishness of Sapphira or the deception of Delilah. They catch a glimpse of Jezebel's take-charge pride or Eve's disastrous disobedience. Like Bathsheba, Herodias, and the rest, today's modern woman is surrounded by temptations, exhausted by the demands of daily living, and burdened by her own desires. So what's a good girl to do? Learn from their lives, says beloved Bible study teacher and speaker Liz Curtis Higgs, and choose a better path. Whether they were "Bad to the Bone," "Bad for a Season, but Not Forever" or only "Bad for a Moment," these infamous sisters show women how not to handle the challenges of life. With her trademark humor and encouragement, Higgs combines a contemporary retelling of the stories of these "other women" in Scripture with a solid, verse-by-verse study to teach us how to avoid their tragic mistakes and joyfully embrace grace. Let these Bad Girls show you why studying the Bible has never been more fun! Includes Discussion Questions and Study Guide

Unbowed Brookings Institution Press

Wangari Maathai, founder of The Green Belt Movement, tells its story including the philosophy behind it, its challenges, and objectives.

Those We Throw Away Are Diamonds Lantern Books

"Trees are living symbols of peace and hope." –Wangari Maathai, Nobel Peace laureate This simply told story begins with Green Belt Movement founder Wangari Maathai's childhood at the foot of Mount Kenya where, as the oldest child in her family, her

responsibility was to stay home and help her mother. When the chance to go to school presented itself, she seized it with both hands. In the 1960s, she was awarded the opportunity to travel to the US to study, where she saw that even in the land of the free, black people were not welcome. Returning home, Wangari was determined to help her people and her country. She recognized that deforestation and urbanization was at the root of her country's troubles. Her courage and confidence carried her through adversity to found a movement for peace, reconciliation, and healing. Aurélia Fronty's beautiful illustrations show readers the color and diversity of Wangari's Africa—the green trees and the flowering trees full of birds, monkeys, and other animals; the roots that dig deep into the earth; and the people who work and live on the land. Wangari Maathai changed the way the world thinks about nature, ecology, freedom, and democracy, inspiring radical efforts that continue to this day.

THE WOMANIST IDEA

Anchor

The recipient of the 2004 Nobel Peace Prize describes her life as a feminist, political activist, and environmentalist in Kenya, detailing her determination to receive an education despite the odds, her confrontations with the brutal Moi government, the 1977 establishment of the Green Belt Movement, her role in the transformation of Kenya's government, and her hope for the future. Reprint. 40,000 first printing.

Facing Mount Kenya Farrar Straus & Giroux

This collection, aimed at scholars, teachers, and practitioners in technical communication, focuses on the praxis-based connections between technical communication and theoretical movements that have emerged in the past several decades, namely new materialism and posthumanism. It provides a much needed link between contemporary theoretical discussions about new materialisms and posthumanism and the practical, everyday work of technical communicators. The collection insists that where some theoretical perspectives fall flat for practitioners, posthumanism and new materialisms have the potential to enable more effective and comprehensive practices, methodologies, and pedagogies.
