## DELACRUZ SCHMIDT

*Improved Lunar Ephemeris, 1952-1959*  
Nicolas-Hays, Inc.  
Available March 2008- the ultimate ephemeris for the years when all but the youngest among us were born. Neil F. Michelsen's *The American Ephemeris for the 20th Century, 1900-2000 at Midnight* became the most highly trusted and widely used reference work for astrologers worldwide. Now substantially revised, updated and expanded by Rique Pottenger, *The New American Ephemeris for the 20th Century, 1900-2000 at Midnight, Michelsen Memorial Edition*, has improvements and refinements that permit more accurate station times, a more accurate position for the Galactic Center and more. Ceres is added to daily longitude listings, Sun through Pluto, and monthly positions are provided for Eris, Chiron, Pallas, Juno and Vesta.

## THE AMERICAN EPHEMERIS FOR THE 21ST CENTURY AT NOON

Starcrafts Pub  
*The American Ephemeris 1950-2050 at Midnight, The Trans-Century Edition*, is published in response to multiple requests for a one hundred year ephemeris covering these "most useful years." With the years 1950 through 2050, only one ephemeris needs to be at hand, especially when traveling, for an astrologer to do quick lookups of both birth data and transiting data over the expected life span of most people currently living. Since the 1976 publication of the first version of *The American Ephemeris, 1931-1980*, Neil F. Michelsen's ground-breaking series of ephemerides for astrologers have consistently set standards for accuracy in astrology, becoming indispensable to astrologers worldwide at every level from student to professional. The tradition continues with the addition of this new tropical ephemeris spanning from mid 20th century through mid 21st century. Rique Pottenger has revised and expanded

the Michelsen programming with updated Jet Propulsion Laboratory data and improvements in the computer generating program that, for example, enable finding double ingresses in a single day, plus more accurate station times. A new formula increases the accuracy of the Galactic Center calculation. Other new features have been added, the most obvious of which are the dwarf planets Ceres and Eris, in response to the 2006 decisions of the International Astronomical Union. Monthly positions have also been added for the remaining three of the former four major asteroids in wide use among astrologers, Pallas, Juno and Vesta, and also for the centaur, Chiron.

Astro Communications Services  
Astrologer Carol Rushman lays out a step-by-step system that astrologers can use to forecast significant events, including love and financial success. When finished with the book, they will be able to predict cycles and trends for the next several years, and give their clients 15 important dates for the coming year.

An Easy Guide to Understanding and Interpreting Your Chart Schiffer Pub Limited

Compiled and programmed by Neil F. Michelsen; revisions by Rique Pottenger.

### **ASTRONOMICAL POPYRI FROM OXYRHYNCHUS**

Cambridge University Press

Explains the ancient astrological system sacred to the Cherokee and how to use it in the modern world • Provides easy-to-use format for determining what signs and numbers rule the day of your birth and what influence they have on your destiny • Includes a traditional Cherokee ephemeris through 2015 An essential aspect of Cherokee religion is the belief that everything on Earth is the reflection of a star. This includes not only people and animals but also trees, rivers, stones, and mountains--all sentient beings to the Cherokee. Astrology has always played a strong role in the Cherokee tradition because of this belief, but unlike our Western system of astrology, Cherokee astrology is based on a 260-day Venus calendar, which includes 20 individual day signs and 13 numbers. It was the task of the Cherokee daykeeper to coordinate this calendar with those of the Sun and the Moon to determine the most auspicious times for ceremonies as well as to understand the star wisdom carried back to Earth by each newborn child. The day sign of a child explains his or her strengths and weaknesses; the number explains the individual's role in the great cosmic scheme. Raven Hail, an elder of the Cherokee nation, provides insightful descriptions for each of the twenty signs that identify characteristics of those born under a particular day sign and gives the meanings of the thirteen numbers that determine the significance of that sign in the larger scheme of life. The author has translated the traditional Cherokee ephemeris into an easy-to-use format that allows readers to quickly determine which sign rules the day of their birth and which number has influence over it.

### **THE ART OF PREDICTIVE ASTROLOGY**

Starcrafts Pub

This accessible reference presents the evolution of concepts of time and methods of time keeping, for historians, scientists, engineers, and educators. The second edition has been updated throughout to describe twentieth- and twenty-first-century advances, progress in devices, time and cosmology, the redefinition of SI units, and the future of UTC.

### **THE AMERICAN EPHEMERIS 1950-2050 AT NOON**

ACS Publications

A new full 21st century ephemeris, fully updated from prior versions of The American Ephemeris series with the most recent available data, including the addition of Ceres to the daily planet lineup and Eris, plus the asteroids Pallas, Juno and Vesta to the monthly positions, that also include Chiron and an improved calculation for Galactic Center, plus other refinements of data such as the ability to find double ingresses on a single day and more accurate station times. This book is dedicated to its originator Neil F. Michelsen, and includes his chart, memorial text from his writings and commentary from others capsulizing the early development of computer technology for astrology.

The American Ephemeris 1950-2050 at Midnight Astro Communications Services Available in late June 2009- the ultimate ephemeris for the years when all but the youngest among us were born. Neil F. Michelsen's The American Ephemeris for the 20th Century, 1900-2000 at Noon, and its companion volume for Midnight, became the most highly trusted and widely used reference works for astrologers worldwide. Now substantially revised, updated and expanded by Rique Pottenger, The New American Ephemeris for the 20th Century, 1900-2000 at Noon, Michelsen Memorial Edition, has improvements and refinements that permit more accurate station times, a more accurate position for the Galactic Center and more. Ceres is added to daily longitude listings, Sun through Pluto, and monthly positions are provided for Eris, Chiron, Pallas, Juno and Vesta.

#### **How to Read Raphael's Ephemeris**

Starcrafts Pub

The American Ephemeris 1950-2050 at Noon, Trans-Century Edition, is published in response to multiple requests for a one hundred year ephemeris covering these "most useful years." With the years 1950 through 2050, only one ephemeris needs to be at hand, especially when traveling, for an astrologer to do quick lookups of both birth data and future transits for most people he or she might encounter. Since the 1976 publication of the first version of The American Ephemeris, 1931-1980, Neil F. Michelsen's ground-breaking series of ephemerides for astrologers have consistently set standards for accuracy in astrology, becoming indispensable to astrologers worldwide at every level from student to professional. The tradition continues with the addition of this new

tropical ephemeris spanning from mid 20th century through mid 21st century, which is published in two versions. This one is calculated for noon UT, and the other for Midnight UT. Rique Pottenger has revised and expanded the Michelsen programming with updated Jet Propulsion Laboratory data and improvements in the computer generating program that, for example, enable finding double ingresses in a single day, plus more accurate station times. A new formula increases the accuracy of the Galactic Center calculation. Other new features have been added, the most obvious of which are the dwarf planets Ceres and Eris, in response to the 2006 decisions of the International Astronomical Union. Monthly positions have also been added for the remaining three of the former four major asteroids in wide use among astrologers, Pallas, Juno and Vesta, and also for the centaur, Chiron. 978-1-934976-27-2 624 pages \$29.95

#### **American Ephemeris for the 21st Century Noon Edition**

CRC Press

A fun and sassy no-nonsense invitation to the practice of astrology with easy-to-understand tools for self-development and conscious living Astrology books are typically either overly simplistic sun-sign books or overly complicated chart calculations filled with astro jargon. Astrology for Real Life goes beyond simple sun-sign interpretation and at the same time cuts through the complications of horoscope analysis to make understanding your chart in depth, simple and easy. The goal is to make astrology accessible to total newbies and provide a working reference guide for intermediates. The book is presented in workbook format exploring each part of chart interpretation—signs, planets, houses, aspects—with exercises following each chapter and fill-in-the-blank lessons that take the reader through all the just-learned steps. The tone is warm, fun, and personal, and the exercises give the reader experiential hands-on practice. The end result: once you learn the basics in Astrology for Real Life, you can easily navigate the cosmos by making them work for you. It's kind of like a roadmap where we begin by understanding the terrain and the tools available. From there, the planets will guide you in making brave, excellent choices in love, work, and life. It's profound, fun, and practical. You'll learn how to interpret your chart with confidence and use astrology in a practical, proactive way, with no astro excuses (blaming the stars for your issues).

#### **The American ephemeris and nautical**

**almanac** University Science Books  
Copiously illustrated throughout with many fine drawings by John C. Holden, *Science Askew: A Light-Hearted Look at the Scientific World* is a refreshing antidote to the daily grind. From continental drip to the life of Konrad Finagle via the murky depths of Loch Ness, we are treated to an off-kilter trip through the scientific world. This pocket-sized goldmine can be produced whenever a spare minute or two presents itself, when the reader feels in need of a chuckle, or when just plain old-fashioned enlightenment is required.

### THE RULERSHIP BOOK

Llewellyn Worldwide  
"American Heliocentric Ephemeris for the 21st Century 2001-2050" features calculations for 0 hours (midnight). This book is especially valuable for people researching planetary cycles and working with financial markets.

*A History of Ancient Mathematical Astronomy* Sound Horizons Audio-Video  
This volume, a directory of astrological correspondences, is the result of a research project that drew together the thoughts of many others into a reference book, assuming the role of a dictionary to astrologers, but vastly more complete. It is the only place where all sign, planetary and house rulerships have been brought together and put in a good workable order. It is organized in such a way that one can use the book for quick and easy reference, and it eliminates the need to search through various other volumes. In four parts: an alphabetical listing, a listing by planets, a listing by signs, a listing by houses. Plus an Appendix with special listings: principal bones of the body, principal veins of the body, chart of an organization, flavors and handwriting forms. Enthusiastically endorsed and used by professionals and students alike, no reference library is complete without this best-selling volume.

### THE AMERICAN EPHEMERIS FOR THE 20TH CENTURY AT NOON

American Federation of Astr  
Since the 1976 publication of his first version of *The American Ephemeris*, 1931-1980, Neil F. Michelsen's ground-breaking series of ephemerides have consistently set standards for accuracy in astrology, becoming indispensable to astrologers worldwide at every level from student to professional. The tradition continues with this Revised & Expanded Third Edition of *The American Ephemeris for the 21st Century, 2000-2050 at Noon*. Revisions and additions are programmed

by Rique Pottenger, who became head programmer for ACS Publications after Michelsen's passing. Additions and improvements include new Jet Propulsion Laboratory data and programming refinements that enable finding double ingresses in a single day plus more accurate station times. A new formula increases the accuracy of the Galactic Center. Phenomena in the Astro Data section are now sorted by time as well as by date, and R appears with Planetary Ingress Data if a planet is retrograde when it ingresses. The most notably obvious additions in this new edition include the dwarf planet Ceres in daily longitude listings between Mars and Jupiter, and monthly positions are given for Eris, Chiron, Pallas, Juno and Vesta.

### The New American Ephemeris for the 20th Century, 1900-2000 at Midnight

Applewood Books  
This lightweight, large format ephemeris is your ideal companion volume for the American Ephemeris series. In this book, you will have ease for quick scanning of current transits. Here you will find: Daily longitude tables, Sun through Pluto, and including Ceres and Chiron. Pallas, Juno, and Vesta now appear in longitude at 5-day intervals. Monthly Julian Day, Obliquity of the Ecliptic, Synetic Vernal Point Monthly longitude for Eris and improved calculation for Galactic Center Daily Declination and Latitude, Sun through Pluto, including Ceres. Declination and Latitude for 5-day intervals for Chiron, Eris, Pallas, Juno, and Vesta. Moon at midnight and noon, maximum declination and latitude, perigee/apogee, and both True and Mean Node positions. Full and Quarter Moon phases, plus Void of Course and Ingress tables.

2000 to 2050 Noon ACS Publications  
"The American Ephemeris for the 20th Century at Noon" was recently updated with the very latest data from the Jet Propulsion Laboratory -- the most accurate ephemeris in the world today! It includes solar and lunar eclipses; aspectation of Jupiter through Pluto; Chiron, Synetic Vernal Point; Moon phases and more.

### For the Use of the American Ephemeris and Nautical Almanac

Weiser Books  
This well-schooled text provides a detailed description of how to perform practical astronomy or spherical astronomy. It is an authoritative source on astronomical phenomena and calendars.

### The New American Ephemeris 2007-2020

ACS Publications  
Presents 200 hitherto unpub. astronomical texts & horoscopes written in Greek on papyrus, which were excavated a century ago in the rubbish heaps of Oxyrhynchus,

a district capital of Roman Egypt. Through these documents we obtain the first coherent picture of the range of astronomical activity, chiefly in the service of astrology, during the Roman Empire. The astronomy of this period turns out to have been much more varied than we previously thought, with Babylonian arithmetical methods of prediction coexisting with tables based on geometrical models of orbits. Editions of the texts are accomp. by facing translations & explanatory & philological commentaries. The intro. provides the first comprehensive treatment of astronomical papyri, explaining their contents & purpose, the underlying astronomical theories, & strategies for analyzing & dating them. Tables & graphs.

### Astrology for Yourself

American Philosophical Society  
Featuring Longitudes and Declinations for the Sun, Moon, Planets, Chiron and the Asteroids. The Astrolabe World Ephemeris combines reading ease and clarity with 21st Century accuracy and precision of data. This unique ephemeris is one of the most complete and convenient references available for astrological calculation. Includes: daily longitudes and declinations for the planets calculated to the second of arc, Chiron and the four major asteroids, void-of-course Moon data, 12 hour Moon positions, Monthly planetary and Lunar ingresses, Lunar phases and an introduction by Robert Hand.

### FOR THE YEAR. 1875. - 1872

Llewellyn Worldwide  
The Michelsen Book of Tables combines two prior books, *The American Book of Tables* and *The Koch Book of Tables*, into one volume that contains tables for both Placidus and Koch house systems, Tables of Diurnal Motion to minimize math calculations, Time Zones of the World (names and hours from Greenwich), Solar-Sidereal Time Correction, Time Correction for Longitude log tables, Universal to Ephemeris Time Correction (Delta T), various interpolation tables and more. Also included is an extensive list of major USA and international cities with longitudes and latitudes, such that with this book and your ephemeris you can calculate precise planetary positions and correct house cusps for a great many locations. Add *The American Atlas* or *The International Atlas* plus your American Ephemeris or New American Ephemeris for the years needed, and you're equipped to do accurate charts for anywhere in the world. A special bonus section "How to Cast a Natal Horoscope," by Rob Hand and Joshua Brackett, offers complete step-by-step instructions on

erecting a horoscope, painlessly and accurately, plus explanations of tables and of the Koch and Placidus house systems and how each is derived. An

understanding of horoscope calculation is highly useful even for those who use computer software to produce charts because one is then aware when a chart is

wrong though that occasional error in data entry. Also, chart calculation is an essential skill for those seeking professional certification in astrology.
