The Art & Science of Decoding Nonverbal
Communication Simon and Schuster

A revised and updated edition of the New
York Times–bestselling classic on
understanding body language from the
author of Subtext. Body Language helps
you to understand the unconscious body
movements and postures that provide

intimate keys to what a person is really
thinking and the secrets of their true inner
selves. You will learn how to read the
angle of shoulders, the tilt of a head, or
the tap of a foot, in order to discern
whether an individual is angry, frightened,
or cheerful. You will be able to use Body
Language to discover the most—and
least—important person in any group by
the way others position themselves. The
body is not able to lie, for it sends subtle
signals to those who know how to read
them. Body Language will even show you
how to do it without others knowing you
are observing them. Body Language was a

huge best seller when first published and has remained in print ever since. It has been thoroughly updated and revised especially for this ebook edition.

THE SECRETS OF BODY LANGUAGE

Jhon Badel

Challenging all of our old assumptions about the subject, Rethinking Body Language builds on the most recent cutting-edge research to offer a new theoretical perspective on this subject that will transform the way we look at other people. In contrast to the traditional view that body language is primarily concerned with the expression of emotions and the negotiation of social relationships, author Geoff Beattie argues instead that gestures reflect aspects of our thinking but in a different way to verbal language.

Critically, the spontaneous hand movements that people make when they talk often communicate a good deal more than they intend. This ground-breaking book takes body language analysis to a whole new level. Engagingly written by one of the leading experts in the field, it shows how we can detect deception in gesture-speech mismatches and how these unconscious movements can give us real insight into people's underlying implicit attitudes.
