OECD Publishing

Comprising three Worksheet Packs and a textbook, this title is useful for the Adult Numeracy Curriculum, covering Entry Levels 1, 2 and 3 and Levels 1 and 2. All topics are clearly labelled with a curriculum reference to assist with planning.

Edexcel Modular Cambridge University Press

One of a series of studies on vocational education and training, this review focuses on the apprenticeship system in England and concludes with policy recommendations.

Edexcel Entry Level Certificate in  
Mathematics Teach Yourself

Maths does not have to be difficult. This book, complete with exercises and answers, forms a course which will take you from beginner or intermediate level to being a confident mathematician. This book includes: simple step-by-step explanations, to help you grasp new topics or those that have previously confused you; practice questions throughout, to help you embed your learning and improve your confidence; and end of chapter summaries, to help you remember the key points you've learned - all in one great-value book, so you don't need any separate workbooks or coursebooks. Chapters include: number; angles; fractions; two-dimensional shapes; decimals; statistics; directed numbers; graphs; measurement; perimeter and area; algebraic expressions; approximations; equations; percentages; formulae;

circles; probability; three-dimensional shapes; ratio and proportion; pythagoras' theorem and trigonometry; indices and standard form. ABOUT THE SERIES The Complete Introduction series from Teach Yourself is the ultimate one-stop guide for anyone wanting a comprehensive and accessible entry point into subjects as diverse as philosophy, mathematics, psychology, Shakespeare and practical electronics. Loved by students and perfect for general readers who simply want to learn more about the world around them, these books are your first choice for discovering something new.

### THE BASIC SKILLS

Nelson Thornes

Level & Subject: AS / A-level Year 1

MathsFirst teaching: September 2017

First exams: June 2018 Prepare to excel in the new linear A-level Mathematics with this student book suitable for use with all UK exam boards. It covers all the pure, mechanics and statistics content needed for AS and A-level Year 1 for the 2017 A-level Mathematics specifications, and combines comprehensive and supportive explanations with plenty of exam-style practice. Written by expert authors, this Student Book will:\* prepare you for linear assessment with topic links and exam-style practice questions in every chapter, plus an additional exam review chapter to extend and challenge\* help you take control of your learning with prior knowledge checks to assess readiness and end-of-chapter summaries that test understanding\* support you through the course with detailed explanations, clear worked examples and plenty of practice on each topic, with short answers in the book and full worked solutions available to teachers\* build the key A-level skills of problem-

solving, modelling, communicating mathematically and working with proofs, with questions to test these skills in every section\* give you plenty of practice in working with your exam board's large data set with specially designed activities in the Statistics chapters\* set maths in the real-world contexts that emphasise practical applications and develop your skills using technology in maths. Includes free Student ebook to give you flexibility to study and wherever and whenever you like.

Trusted Support for Learning Pearson Education

This new edition of a core undergraduate textbook for construction managers reflects current best practice, topical industry preoccupations and latest developments in courses and fundamental subjects for students. While the construction process still requires traditional skills, changes over recent decades today demand improved understanding of modern business, production and contractual practices. The authors have responded accordingly and the book has undergone a thorough re-write, eliminating some of the older material

and adding new processes now considered essential to achieving lean construction. Particular emphasis is given, for example, to supply chains and networks, value and risk management, BIM, ICT, project arrangements, corporate social responsibility, training, health and welfare and environmental sustainability. Modern Construction Management presents construction as a socially responsible, innovative, carbon-reducing, manager-involved, people-orientated, crisis-free industry that is efficient and cost effective. The overall themes for the Seventh Edition are: Drivers for efficiency: lean construction underpinning production management and off-site production methods. Sustainability: reflecting the transition to a low carbon economy. Corporate Social Responsibility: embracing health & safety, modernistic contracts, effective procurement, and employment issues. Building Information Management: directed towards the improvement of construction management systems. The comprehensive selection of worked examples, based on real and practical situations in construction management and methods will help to consolidate learning. A companion website at <http://www.wiley.com/go/MCM7> [www.wiley.com/go/MCM7/a](http://www.wiley.com/go/MCM7/a) offers invaluable support material for both tutors and students: Solutions to the self-learning exercises PowerPoint slides with discussion topics Journal and web references Structured to reflect site, business and corporate responsibilities of managers in construction, the book continues to provide strong coverage of the salient elements required for developing and equipping the modern construction manager with the competencies and skills for both

technical and business related areas.
