 This two-volume set
 constitutes reviewed
 and selected papers
 from the 12th
 International Advanced
 Computing Conference,
 IACC 2022, held in
 Hyderabad, India, in
 December 2022. The
 72 full papers and 6
 short papers presented

in the volume were
 thoroughly reviewed
 and selected from 415
 submissions. The
 papers are organized
 in the following topical
 sections: AI in
 industrial applications;
 application of AI for
 disease classification
 and trend analysis;
 design of agricultural
 applications using AI;
 disease classification
 using CNN; innovations
 in AI; system security
 and communication
 using AI; use of AI in
 human psychology;
 use of AI in music and
 video industries.

 When R.A. Dalkey travels cheap, he thinks bigger than hostel dorms, overnight trains and pasta with tomato sauce for every meal. He'll roll out his sleeping bag in Madrid's red light district, nap on the streets of Monaco and furtively string up his hammock on Swiss farms. He'll spontaneously teach English in Laos in exchange for rice. He'll thumb rides anywhere from Timor to the Orange Free State. He'll try smiling a lot, and see where it takes him. Most of the time it's somewhere good. As this collection of stories will reveal, it doesn't always go smoothly. Indonesian bush-fires chase him

from his campsite. His shoes freeze solid in Siberia. He gets head-butted by an Albanian villager. He's shaken by earthquakes and terrified by witching-hour excavations in Andorran valleys. And, incompetent as ever with ropes, his hammock has a habit of falling down in the middle of the night - with him in it. Yet he wouldn't have it any other way: travelling Dalkey-style delivers the richest of experiences. And as he shares the adventures few of us would brave, you'll pick up gems about this crazy planet. Do you know which head of state was an Olympic bobsleigh competitor? Or how long your unattended bag will go untouched in Japan? Who's eating all the ice cream in

Pyongyang? And how do cats jump in Swedish? Like that uncle with the rose-tinted specs and a grumpy anarchist student rolled into one, Dalkey turns up his nose at travel insurance and shows there's more than one way to see a world that always steers us to play it safe...

This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and

significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge

of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

Jason Robbins and Helen Jenkins arrive at eerie Heron House in Carmarthenshire.

Together they discover what dangers lurk behind the walls; how the post-war past bleeds into the present when the tormented soul of the young woman haunting them will stop at nothing to have her story told. But is the ghost's version of events to be trusted?

They thought they could contain it.The

Chinese fell, then Asia, then it hit Europe and destroyed the Middle East. Not America. The shining city on the hill opened its doors to the sick and scared of the world with the message "Come to America. We can beat this together." In any other time America would have been right to do so. But this time the refugees brought the Zombie virus, and the first bite is deadly...

Car Ming Pao
Magazines Limited
Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing

global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with

recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

TORQUE

AuthorHouse

This book presents the proceedings of the 11th Conference on Theory and Applications of Soft Computing, Computing with Words and Perceptions and Artificial Intelligence, ICSCCW-2021, held in Antalya, Turkey, on August 23-24, 2021. The general scope of the book covers uncertain computation, decision making under imperfect information, neuro-fuzzy approaches, natural language processing, and other areas. The topics of the papers include theory and application of soft computing, computing with words, image processing with soft computing, intelligent control, machine

learning, fuzzy logic in data mining, soft computing in business, economics, engineering, material sciences, biomedical engineering, and health care. This book is a useful guide for academics, practitioners, and graduates in fields of soft computing and computing with words. It allows for increasing of interest in development and applying of these paradigms in various real-life fields.

BUSINESS WORLD

Seeley James Solving Transport Problems establishes fundamental points and good practice in resolving matters regarding green transportation. This is to prompt further research in

conveyance issues by providing readers with new knowledge and grounds for integrated models and solution methods. Focusing on green transportation, this book covers various sub-topics and thus consists of diverse content. Traditionally, academia and transport practitioners have mainly concentrated on efficient fleet management to achieve economic benefits and better-quality service. More recently, due to growing public environmental concerns and the industry understanding of the issue, the academic community has started to address environmental issues. The studies of green transportation compiled in this book

have identified certain areas of interest, such as references, viewpoints, algorithms and ideas. Solving Transport Problems is for researchers, environmental decision-makers and other concerned parties, to start discussion on developing optimized technology and alternative fuel-based integrated models for environmentally cleaner transport systems.

Reducing your carbon

emissions in an

economic down-turn

can be challenging, but

saving the planet

doesn't have to cost

you more. Tough

economic times need

not relegate concerns

for the planet to the

back burner. The

author is an

environmental

economist trying to live

a low-carbon life in

London. He worked for

15 years in the UK's

Office of Climate

Change, the Prime

Minister's Strategy Unit

and the Department of

the Environment. So

far so good. But he has

kids. A family to visit in India. A hectic job. In distilling and building on his own experience of trying to live a low carbon life, he helps us navigate the choices that confront us all - families, singletons, pensioners - when making decisions about what to eat, what to buy, how to travel and how to keep warm in the era of climate change and economic turmoil. He works out the sums and lets us know which choices will make the biggest difference, and which are false savings. His book is an irreverent but seriously rigorous reference guide to low-cost, low-carbon living for everyone - in any location - in tough times. It's brimming with up-to-date information on current and future

technologies, tips and ideas for every budget on how to spend the least for the biggest carbon reduction gain and insight from the experiences of people trying to live low-carbon lives.

Motoring World First District

'A fascinating list of absurdities ... an extraordinary work ... remarkable and praiseworthy ... an extraordinary

achievement.' - Sir Michael Parkinson CBE - Broadcaster, journalist & author In the UK, we have some bizarre laws that have littered the statute books of our sceptred isle throughout history. Not all of them have been repealed over the centuries. Some of them made perfect sense at the time they were introduced but seen through modern eyes, now appear archaic and draconian. Despite the great efforts of the Law Commission in England and Wales to review and recommend reforms for many of these outdated laws, there are centuries of law that must be painstakingly gone through. As well as some bizarre laws, the UK also has its fair share of curious

customs and time-honoured traditions that have been observed for centuries. On the surface, many appear to be nothing more than theatrical pomp and pageantry. However, they are all born from strong rationale. The UK parliament seems to have had a particular penchant for passing laws related to fish and animals, indecency and passing sentences with some humiliating public punishments. This compendium book, a combination of all 3 volumes from this book series, is a highly entertaining read for anyone who enjoys learning about the more bizarre applications of UK law throughout the centuries, along with some rather macabre consequences along

the way. Have you ever heard a bizarre law and thought, that can't possibly be true? Is it genuine? Was it ever in existence or just an urban myth that became so embellished over time? There are surprisingly, a great many laws still in existence on the statute books today, that would make your jaw drop. Whilst bizarre as these laws may now seem to us, it begs the question, are we in fact, unknowingly breaking these laws on a regular basis? For example... It is illegal to own a pet whale but not a tiger It is illegal to keep a 'lunatic' without a licence Unsurprisingly, it is illegal to cause a nuclear explosion Magistrates are legally required to bind over every person of good

behaviour It is illegal for any person to be drunk in a pub Granny farming is illegal during general elections It is illegal to be found on church grounds, dressed as a giant gerbil whilst digging up the petunias ...all these questions and more will be answered in this latest book by Monty Lord, with a foreword by the former Lord Chancellor, The Rt Hon Sir Robert Buckland KBE KC MP. Reading this book, you may be inclined to laugh heartily, let out a sorrowful cry or recoil in abject horror at some of the more gruesome sentences passed for breaking these weird laws. With over 440 bizarre but nevertheless true, laws and customs, you can use this book to satisfy your curiosity about

what our ancestors had to contend with over the years, or perhaps as a reference guide for trivia quizzes.

Bizarre Laws & Curious Customs of the UK

Motoring World

2018 Springer Nature
A sorta-biography following the whys and

wherefores of two English townies slowly finding themselves wooed by more and more remote Greece. Fate finally stepped in and they made the life-changing move. A thirty year roller-coaster journey of coincidences and sometimes unnerving omens it covers the positives and negatives of both the move and new life, and hopefully explains some of the subtle seductions of the islands, especially Crete. Packed with strange adventures and encounters, and eccentric characters (not least the two main subjects). Inspiring and daunting reading for anyone thinking of moving abroad.
