OUP Oxford

The International Baccalaureate® (IB) was founded in Geneva, Switzerland in 1968 as a non-profit educational foundation that endeavored to develop inquiring, knowledgeable and caring young people who would go on to create a better and more peaceful world through intercultural understanding and respect. What began as a single program for internationally mobile students preparing for college, has grown into a series of programs for students up to age 19. Barron's is pleased to offer a brand new review guide for the IB

Biology exam. The content of the exam is compiled from the newly revised IB Biology course syllabus. This review book focuses specifically on the syllabus material to ensure that students are fully prepared and includes: An overview of the tests/papers, including an explanation of scoring, command terms, and optional topics based on the brand new 2014 syllabus Connections to the Nature of Science (NOS) theme that runs throughout the syllabus Study tips and strategies for maximizing scores A section on mathematical calculation and statistical analysis review 2 full-length paper 1, 2, and 3 practice exams with

fully explained answers  
The book is formatted  
to prepare students for  
either the one-year SL  
(standard level) or the  
two-year HL (higher  
level) biology exam.

Written specially for  
students following the  
International  
Baccalaureate (IB)  
Diploma, Biology for  
the IB Diploma is a  
major new textbook

covering the latest syllabus requirements for this experimental science. Chapters are presented in syllabus order and their content reflects the necessary coverage of all core Topics and Options for students at both Standard and Higher levels. Throughout, the processes of science and something of its history are introduced selectively to illustrate the possibilities and limitations of science. A Chapters open with a list of 'Starting points' that summarise essential concepts. A Topics and Options coverage accurately reflects the Objectives and Command terms in which syllabus assessment statements are phrased. A Material for Standard level and Higher level is clearly

identified. A Text is written in straightforward language with key terms simply defined, and examples are drawn from a wide range of international sources. A Main sections specify the syllabus sub-topic being addressed, making links between the text and syllabus content self-evident. A Photographs, electron micrographs and full-colour illustrations complement the text, and illustrate principles and processes in context. A Self-assessment questions and typical exam questions aid comprehension and familiarise students with the syllabus requirements, improving exam performance. A Links to Theory of

Knowledge provide opportunities for cross-curriculum study. A Extension boxes broaden information beyond the core requirements. A Includes a chapter on the integration of theory with practicals and projects and their presentation for Internal Assessment, written by a guest author, Gary Seston, an experienced IB teacher and examiner. A The glossary provides an invaluable reference for students. The CD contains all the teaching material needed for the Options."
