## Organizational Behaviour

Management of Organizational Behavior  
Organizational Behavior is a multidimensional product to allow for student development in knowledge, analysis, synthesis and personal development with pedagogical features designed to bring Organizational Behavior to life. This product reframes the content of organizational behavior to reflect the inherent interdependence of factors that explain human behavior.

Traditional OB topics are introduced as part of an integrated framework for answering practically-relevant questions about why people behave as they do and how to effectively self manage and influence others.

arrived in America, she  
couldn't speak English.

She didn't know that young women had to go to work, that they traded an education for long hours of labor, that she was expected to grow up fast. But that didn't stop Clara. She went to night school, spent hours studying English, and helped support her family by sewing in a shirtwaist factory. Clara never quit, and she never accepted that girls should be treated poorly and paid little. Fed up with the mistreatment of her fellow laborers, Clara led the largest walkout of women workers the country had seen. From her short time in America, Clara learned that everyone deserved a fair chance. That you had to stand together and fight for what you wanted. And, most importantly, that

you could do anything you put your mind to. This picture book biography about the plight of immigrants in America in the early 1900s and the timeless fight for equality and justice should not be missed.
