 Since the two angles shown add up to 90 degrees, and the remaining angle must therefore be 90 degrees, this is a right triangle. For a right triangle, the length of a side is related to the hypotenuse by the sine of the opposite angle. Thus, $A = C \sin(30^\circ)$ and since the sine of a 30-degree angle is 0.5 or $1/2$, $A = C/2$.
