New Testament Interpretation through Rhetorical Criticism provides readers of the Bible with an important tool for understanding the Scriptures. Based on the theory and practice of Greek rhetoric in the New Testament, George Kennedy's approach acknowledges that New Testament writers wrote to persuade an audience of the truth of their messages. These writers employed rhetorical conventions that were widely known and imitated in the society of the times. Sometimes confirming but often challenging common interpretations of texts, this is the first systematic study of the rhetorical composition of the New Testament. As a complement to form criticism, historical criticism, and other methods of biblical analysis, rhetorical criticism focuses on the text as we have it and seeks to discover the basis of its powerful appeal and the intent of its authors. Kennedy shows that biblical writers employed both "external" modes of persuasion, such as scriptural authority, the evidence of miracles, and the testimony of witnesses, and "internal" methods, such as ethos (authority and character of the speaker), pathos (emotional appeal to the audience), and logos (deductive and inductive argument in the text). In the opening chapter Kennedy presents a survey of how rhetoric was taught in the New Testament period and outlines a rigorous method of rhetorical criticism that involves a series of steps. He provides in succeeding chapters examples of rhetorical analysis, looking closely at the Sermon on the Mount, the Sermon on the Plain, Jesus'

farewell to the disciples in John's Gospel, the distinctive rhetoric of Jesus, the speeches in Acts, and the approach of Saint Paul in Second Corinthians, Thessalonians, Galatians, and Romans.

### THE AUTOBIOGRAPHY OF GEORGE FOREMAN

Concept Publishing Company

In the first part of the book, George Kennedy explores analogies to human rhetoric in animal communication, possible rhetorical factors in the origin of human speech, and rhetorical conventions in traditionally oral societies in Australia, the South Pacific, Africa, and the Americas. Topics discussed include forms of reasoning, the function of metaphor, and the forms and uses of formal language. The second part of the book provides an account of rhetoric as understood and practiced in early literate societies in the Near East, China, India, Greece, and Rome, identifying unique or unusual features of Western discourse in comparison to uses elsewhere.

### ADVANCED ELECTRONIC COMMUNICATIONS SYSTEMS

Elsevier Science Limited

The first four chapters of the text describe different types of signals, modulation and demodulation of these signals, various transmission channels and noise encountered by the signals during propagation from sender to receiver end. Apart from this, this part of the book also deals with different forms of line communication systems. A brief introduction of information theory is also given at the end of the text so that the students become familiar with this aspect of communication systems.

*An Historical and Cross-cultural Introduction* McGraw-Hill Higher Education

In his book *Cotton Fields to Summits*, former senior Foreign Service officer, educator, and entrepreneur George Kennedy, describes his 35-year journey to fulfill a lifelong dream to live life beyond his horizons. Each chapter reinforces the view that each of us seeks a measure of success in our lives; that real and gratifying success, the kind that produces those moments of sheer exhilaration, comes from hard work and often difficult choices. George believes strongly that a careful blend of personal qualities and behaviors fortified by a solid skill set and a passion for learning can produce moments of fist-pumping success and a rich and rewarding life. This is the approach that took him from the cotton fields to international summits in Williamsburg, Virginia; London, U.K.; Venice, Italy; and Paris and Strasbourg, France...to name a few. His career did not just evolve. A career that spanned more than three decades with the former U.S. Information Agency, the U.S. Department of State, and the U.S. Department of Commerce, while learning four languages (Italian, German, French, and Korean) was the result of disciplined, focussed, and

careful planning for a life of his own design. Life is ultimately about choices is a constant refrain with George therefore, he advises, always bring your best judgment possible to the choices you make. Then take action...and don't look back.
