The best-selling guide for coping with changes in life and work, named one of the 50 all-time best books in self-help and personal development Whether you choose it or it is thrust upon you, change brings both opportunities and turmoil. Since Transitions was first published, this supportive guide has helped hundreds of thousands of readers cope with these issues by providing an elegantly simple yet profoundly insightful roadmap of the transition process. With the understanding born of both personal and professional experience, William Bridges takes readers step by step through the three stages of any transition: The Ending, The Neutral Zone, and, eventually, The New Beginning.

Bridges explains how each stage can be understood and embraced, leading to meaningful and productive movement into a hopeful future. With a new introduction highlighting how the advice in the book continues to apply and is perhaps even more relevant today, and a new chapter devoted to change in the workplace, *Transitions* will remain the essential guide for coping with the one constant in life: change.

Zen Sand is a classic collection of verses aimed at aiding practitioners of kōan meditation to negotiate the difficult relationship between insight and language. As such it represents a major contribution to both Western Zen practice and English-language Zen scholarship. In Japan the traditional Rinzaï Zen kōan curriculum includes the use of jakugo, or "capping phrases." Once a monk has successfully replied to a kōan, the Zen master orders the search for a classical verse to express the monk's insight into the kōan. Special collections of these jakugo were compiled as handbooks to aid in that search. Until now, Zen students in the West, lacking this important resource, have been severely limited in carrying out this practice. *Zen Sand* combines and translates two standard jakugo handbooks and opens the way for incorporating this important tradition fully into Western Zen practice. For the scholar, *Zen Sand* provides a detailed description of the jakugo practice and its place in the overall kōan curriculum, as well as a brief history of the Zen phrase book. This volume also contributes to the understanding of East Asian culture in a broader sense.

How can I apply learning and social justice theory to become a better facilitator? Should I prepare differently for workshops around specific identities? How do I effectively respond when things aren't going as planned? This book is intended for the increasing number of faculty and student affairs administrators - at whatever their level of experience -- who are being asked to become social justice educators to prepare students to live successfully within, and contribute to, an equitable multicultural society. It will enable facilitators to create programs that go beyond superficial discussion of the issues to fundamentally address the structural and cultural causes of inequity, and provide students with the knowledge and skills to work for a more just society. Beyond theory, design, techniques and advice on practice, the book concludes with a section on supporting student social action. The authors illuminate the art and complexity of facilitation, describe multiple approaches, and discuss the necessary and ongoing reflection process. What sets this book apart is how the authors illustrate these practices through personal narratives of challenges encountered,

and by admitting to their struggles and mistakes. They emphasize the need to prepare by taking into account such considerations as the developmental readiness of the participants, and the particular issues and historical context of the campus, before designing and facilitating a social justice training or selecting specific exercises. They pay particular attention to the struggle to teach the goals of social justice education in a language that can be embraced by the general public, and to connect its structural and contextual analyses to real issues inside and outside the classroom. The book is informed by the recognition that "the magic is almost never in the exercise or the handout but, instead, is in the facilitation"; and by the authors' commitment to help educators identify and analyze dehumanizing processes on their campuses and in society at large, reflect on their own socialization, and engage in proactive strategies to dismantle oppression.

The *Business of Mining* complete set of three Focus books will provide readers with a holistic all-embracing appraisal of the analytical tools available for assessing the economic viability of prospective mines. Each volume has a discrete focus. This first volume presents an overview of the mining business, followed by an analysis of project variables and risk, an overall coverage of the royalty agreements, pricing and contract systems followed by a final chapter on accounting standards and practises for the minerals industry. The books were written primarily for undergraduate applied geologists, mining engineers and extractive metallurgists and those pursuing course-based postgraduate programs in mineral economics. However, the complete series will also be an extremely useful reference text for practicing mining professionals as well as for consultant geologists, mining engineers or primary metallurgists.

A proposal for a new global approach for fisheries focused on reducing fishing capacity and providing incentives for long-term sustainability. The Earth's oceans are overfished, despite more than fifty years of cooperation among the world's fishing nations. There are too many boats chasing too few fish. In *Saving Global Fisheries*, J. Samuel Barkin and Elizabeth DeSombre analyze the problem of overfishing and offer a provocative proposal for a global regulatory and policy approach. Existing patterns of international fisheries management try to limit the number of fish that can be caught while governments simultaneously subsidize increased fishing capacity, focusing on fisheries as an industry to be developed rather than on fish as a resource to be conserved. Regionally based international management means that protection in one area simply shifts fishing efforts to other species or regions. Barkin and DeSombre argue that global rather than regional regulation is necessary for successful fisheries management and emphasize the need to reduce subsidies. They propose an international system of individual transferable quotas that would give holders of permits an interest in the long-term health of fish stocks and help create a sustainable level of fishing capacity globally.

"Pollan keeps you turning the pages . . . clear-eyed and assured." —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable

Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's "mental travelogue" is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

The Art of Effective Facilitation Penguin

This book presents the first comprehensive analysis of Confucius Institutes (CIs), situating them as a tool of public diplomacy in the broader context of China’s foreign affairs. The study establishes the concept of public diplomacy as the theoretical framework for analysing CIs. By applying this frame to in-depth case studies of CIs in Europe and Oceania, it provides in-depth knowledge of the structure and organisation of CIs, their activities and audiences, as well as problems, challenges and potentials. In addition to examining CIs as the most prominent and most controversial tool of China’s charm offensive, this book also explains what the structural configuration of these institutes can tell us about China’s understanding of and approaches towards public diplomacy. The study demonstrates that, in contrast to their international counterparts, CIs are normally organised as joint ventures between international and Chinese partners in the field of education or cultural exchange. From this unique setting a more fundamental observation can be made, namely China’s willingness to engage and cooperate with foreigners in the context of public diplomacy. Overall, the author argues that by utilizing the current global fascination with Chinese language and culture, the Chinese government has found interested and willing international partners to co-finance the CIs and thus partially fund China’s international charm offensive. This book will be of much interest to students of public diplomacy, Chinese politics, foreign policy and international relations in general.

A proliferation of new technologies has lulled many into thinking that we actually have to think less about how we communicate. In fact, communicating and collaborating across time, distance, and cultures has never been more complex or difficult. Written as a series of bulleted tips drawn from client experiences and best practices, *Leading Effective Virtual Teams: Overcoming Time and Distance to Achieve Exceptional Results* presents practical tips to help leaders engage and motivate their geographically dispersed project team members. If you’re a leader of any type of virtual team and want to help your team members collaborate more effectively, then buy this book. You will learn how to: Build trust and cultivate relationships, virtually, across your team Design and facilitate virtual meetings that are focused and engaging Influence without authority Motivate and galvanize a virtual team for top performance Blend asynchronous and synchronous communications for better virtual collaboration Navigate cross-cultural and generational differences in the absence of vital visual cues Assess skills, strengths, aptitudes, and preferences from afar Handle other tough issues that can trip up virtual teams The ideas in this book are based on Nancy Settle-Murphy’s decades of experience working as a change management consultant, facilitator, and trainer for project teams around the world. Designed to be read section by section in any order, this book shares approaches and techniques to help you address some of the toughest challenges virtual team leaders face, including keeping team members engaged from afar.

Social media has irrevocably changed how people consume the news. With the distinction between professional and citizen journalists blurring like never before, *Digital Currents* illuminates the behind-the-scenes efforts of television newscasters to embrace the public’s participation in news and information gathering and protect the integrity of professional journalism. Using interviews with more than one hundred journalists from eight networks in Canada and the United Kingdom, Rena Bivens takes the reader inside TV newsrooms to explore how news organisations are responding to

the paradigmatic shifts in media and communication practices. The first book to examine the many ways that the public has entered the production of mainstream news, *Digital Currents* underscores the central importance of media literacy in the age of widespread news sources.

The author of *The Time Traveler's Guide to Medieval England* takes you through the world of Shakespeare and Queen Elizabeth I. From the author of *The Time Traveler's Guide to Medieval England*, this popular history explores daily life in Queen Elizabeth's England, taking us inside the homes and minds of ordinary citizens as well as luminaries of the period, including Shakespeare, Christopher Marlowe, Sir Walter Raleigh, and Sir Francis Drake. Organized as a travel guide for the time-hopping tourist, Mortimer relates in delightful (and occasionally disturbing) detail everything from the sounds and smells of sixteenth-century England to the complex and contradictory Elizabethan attitudes toward violence, class, sex, and religion. Original enough to interest those with previous knowledge of Elizabethan England and accessible enough to entertain those without, *The Time Traveler's Guide* is a book for Elizabethan enthusiasts and history buffs alike.
