**Electrical
Engineering Manual**

University of Pittsburgh
Press

In the four centuries
leading up to the death
of Euripides, Greek
singers, poets, and
theorists delved deeply
into auditory
experience. They

charted its capacity to
develop topologies
distinct from those of
the other senses;
contemplated its use
as a communicator of
information; calculated
its power to express
and cause extreme
emotion. They made
sound too, artfully and
self-consciously
creating songs and
poems that reveled in
sonorousness.
Dissonance reveals the

commonalities between ancient Greek auditory art and the concerns of contemporary sound studies, avant-garde music, and aesthetics, making the argument that “classical” Greek song and drama were, in fact, an early European avant-garde, a proto-exploration of the aesthetics of noise. The book thus develops an alternative to that romantic ideal which sees antiquity as a frozen and silent world.

Presenting more than two hundred of the greatest haiku ever written about the game. There are moments in every baseball game that make fans catch their breath: the pause while a pitcher looks in for the sign, the moment a cocksure rookie gets picked off first, or the instant a batter lashes a game-winning homer into the night sky, just before the sell-out crowd explodes onto its feet. Haiku captures these moments like no other poetic form, and Baseball Haiku captures the sights, the sounds, the smells, and the emotions of

the game like no previous collection. Some of the most important haiku poets of both America and Japan are featured in this anthology; including Jack Kerouac, a longtime baseball fan who pioneered English-language haiku; Alan Pizzarelli, one of the top American haiku and senryu poets of the last thirty years; and Masaoka Shiki, one of the four great pillars of Japanese haiku—a towering figure—who was instrumental in popularizing baseball in Japan during the 1890s. With over two hundred poems spanning more than a century of ball playing, *Baseball Haiku* reveals the intricate ways in which this enduring and indelible sport—which is played on a field, under an

open sky—has always been linked to nature and the seasons. And just as a haiku happens in a timeless now, so too does *Baseball Haiku* evoke those unforgettable images that capture the actions and atmospheres of the national pastime: each poem resonates like the lonely sound of cleats echoing in the tunnel as a grizzled veteran leaves his final game. The largest collection of haiku and senryu on baseball ever assembled, *Baseball Haiku* is an extraordinary treasure for any true baseball fan.

 In Sounding Composition
 Steph Ceraso reimagines listening education to account for twenty-first-century sonic practices and experiences. Sonic technologies such as

audio editing platforms and music software allow students to control sound in ways that were not always possible for the average listener. While digital technologies have presented new opportunities for teaching listening in relation to composing, they also have resulted in a limited understanding of how sound works in the world at large. Ceraso offers an expansive approach to sonic pedagogy through the concept of multimodal listening—a practice that involves developing an awareness of how sound shapes and is shaped by different contexts, material objects, and bodily, multisensory experiences. Through a mix of case studies and

pedagogical materials, she demonstrates how multimodal listening enables students to become more savvy consumers and producers of sound in relation to composing digital media, and in their everyday lives.

 Concurrency is an integral part of everyday life. The concept is so ingrained in our existence that we benefit from it without realizing. When faced with a taxing problem, we automatically involve others to solve it more easily. Such concurrent solutions to a complex problem may, however, not be quite straightforward and communication becomes crucial to ensure the successful solution of the problem.
