This study of shipping makes visible a sector that has led European economic

growth for centuries, yet rarely appears in business or economic histories.

Mariner's Weather W. W. Norton & Company

A hen frigate is any boat with the captain's wife on board. This is their story of life on the high seas.

The Shipmaster's Business Companion BRILL

A comprehensive review of the laws and regulations governing the shipmaster including customary law, case law, statutory law, treaty law and regulatory law, covering:

- A brief history of the shipmaster
- Manning and crewing requirements in relation to vessel

registration • Comparison of regimes of law of agency for shipmasters and crews across jurisdictions • Examination of shipmaster liability (civil and criminal)

SHIPMASTER'S BUSINESS COMPANION

Cornell Maritime Press/Tidewater Publishers

This is the first biography of Capt. Peter Strickland, a little-known Connecticut Yankee who crossed the Atlantic 100 times in command of a sailing vessel, traded with French and Portuguese colonies during the period 1864-1905, and served as the first American consul to French

West Africa for over 20 years. We know about Peter Strickland's long life (1837-1921) because he wrote a daily journal from the age of 19 until the year he died. He broke away from a long line of Connecticut farmers to adopt a seafaring life at the age of 15. Capt. Strickland's merchant marine career led him from the east coast of the United States to the west coast of Africa. He introduced American tobacco and wood products into French and Portuguese colonies and on the return trips carried animal hides and peanuts in his 100-ton schooners. He wrote and published a book on behalf of sailors. The most knowledgeable American in the African trade for 40 years, Strickland struggled to maintain an American competitive edge among the dominant commercial presence of French trading houses from Bordeaux and Marseilles. The U.S. State Department asked him to become the first consul in French West Africa, with residence in Senegal. The captain accepted the terms: he would receive no salary, but he could keep the port fees he collected and continue to practice his import-export business. Living on the former slave island of Gorée,

Strickland battled epidemics of cholera and yellow fever. He suffered from malaria and catarrh. His 23-year-old son George accidentally drowned off the coast of Dakar, Senegal. Demoralized and ill, Strickland retired to Boston in 1905 and became a gentleman farmer. At age 77, he recopied his entire journal into bound volumes.

The Visible Hand UNC Press Books

A modern comprehensive reference covering registry, classification, crew matters, carriage of passengers & goods, marine insurance, limitation of liability, & much more.

SHIPMASTER'S BUSINESS COMPANION AND BUSINESS GUIDE

Simon and Schuster

In this engagingly written biography, Tamara Plakins Thornton delves into the life and work of Nathaniel Bowditch (1773-1838), a man Thomas Jefferson once called a "meteor in the hemisphere." Bowditch was a mathematician, astronomer, navigator, seafarer, and business executive whose Enlightenment-inspired perspectives shaped nineteenth-century capitalism while transforming

American life more broadly. Enthralled with the precision and certainty of numbers and the unerring regularity of the physical universe, Bowditch operated and represented some of New England's most powerful institutions—from financial corporations to Harvard College—as clockwork mechanisms. By examining Bowditch's pathbreaking approaches to institutions, as well as the political and social controversies they provoked, Thornton's biography sheds new light on the rise of capitalism, American science, and social elites in the early republic. Fleshing out the multiple careers of Nathaniel Bowditch, this book is at once a lively biography, a window into the birth of bureaucracy, and a portrait of patrician life, giving us a broader, more-nuanced understanding of how powerful capitalists operated during this era and how the emerging quantitative sciences shaped the modern experience.

the breakthroughs that enabled him to craft high-performance ships of unprecedented versatility. 50,000 first printing.

Shipmasters' Business Companion: Including Hints to Young Shipmasters on Insurance, Shipmasters' Business, Bills of Lading, Etc Cambridge University Press

The single most important fact of life to the racing yachtsman, cruiser, or merchant seaman is the weather. This book about the weather, written by a master mariner, sets out to fill the gap between instant knowledge books which provide a veneer of jargon, and heavy texts requiring prior knowledge of meteorology. This book presents instead a seamanlike survey of the basics of weather, offering a foundation for practical observation and interpretation as well as a ground-work for advanced study. Basic information on the atmosphere, winds, heat and its consequences, clouds, fogs, fronts, tropical cyclones, ice, instruments and charts is provided here.

This book is one of the most comprehensive guides to international maritime law from the Russian perspective. It consists of three relatively independent sections: Russian Maritime Law, International Public Maritime Law, and International Private Maritime Law. First section discusses the development of the maritime law as a branch of the Russian law. It examines concepts and sources of the Russian federal laws, secondary legislation and customs, including the influences guiding the future of Russian law of the sea. . The second section examines International Public Maritime Law including the principles, sources, subjects, as well legal status of the vessel, including the vessel's state flag, her name, state registration, the problem of "flags of convenience", vessel's documents, the crew, and the master. This section further details the current international legal regime of maritime

spaces, provisions concerning legal protection of marine environments, ensuring navigation safety, international legal regulation of the work of seamen, international inter-governmental marine organizations, and settlement of international public marine disputes. The third section is devoted to International Private Maritime Law and discusses its principles and sources, conflict-of-law rules, structure and types, and the main choice-of-law principles used today in international private maritime law. This section also discusses the following institutions and sub-branches within international private maritime law including: carriage of cargoes and passengers by sea, general average, salvage, collisions of vessels, marine insurance, limitation of liability, international non-governmental maritime organizations, and settlement of international private marine disputes. [1999 Supplement](#) Harvard University Press Most Western health professionals practice in multicultural societies. The influence of culture on illness, health and rehabilitation is therefore very important. Despite this, most lower level health psychology texts

skim over these differences and assume our traditional biomedical approach will be appropriate for all. In this completely revised and updated edition of a groundbreaking book, Malcolm MacLachlan redresses the balance by showing how social and cultural aspects interact with the purely physical: from assessment and treatment all the way through to effects on rehabilitation. *Shipmaster's Business Companion and Business Guide* Standard Ebooks Candide is the picaresque tale of the titular character's fantastical journey from an insular, idealized life in a picturesque castle through the difficulties and evils of the real world. Satirical, comical, witty, and cutting, Candide was widely banned in its day for containing blasphemous and seditious concepts. Despite that, it survived controversy to become an important book in the Western literary heritage. Today Candide remains a breezy and darkly funny read. This book is part of the Standard Ebooks project, which produces free public domain ebooks. **The Maritime History of Massachusetts, 1783-1860** Routledge In *Securitising Asylum Flows*, the editors

have collected contributions that examine the human rights and rule of law challenges posed by the EU response to the so-called 'refugee crisis'. *Aristotle Onassis, the Vagliano Brothers, and the Business of Shipping, c.1820-1970* New Academia Pub Llc This study examines the shipmaster's duty to render assistance at sea under international law. This duty is assessed in the light of contemporary challenges posed by the phenomenon of irregular migration by sea, a problem which has intensified in recent years. The approach undertaken gives special emphasis to the shipmaster's responsibilities in rescue operations, and his role in the fulfilment of States' international obligations in the rendering of assistance. [Securitising Asylum Flows](#) Routledge The role of large-scale business enterprise—big business and its managers—during the formative years of modern capitalism (from the 1850s until the 1920s) is delineated in this pathmarking book. Alfred Chandler, Jr., the distinguished business historian, sets forth the reasons for the dominance of big business in American transportation,

communications, and the central sectors of production and distribution.

Universal-Publishers

The Routledge Companion to Marine and Maritime Worlds, 1400–1800 explores early modern maritime history, culture, and the current state of the research and approaches taken by experts in the field. Ranging from cartography to poetry and decorative design to naval warfare, the book shows how once-traditional and often Euro-chauvinistic depictions of oceanic 'mastery' during the early modern period have been replaced by newer global ideas. This comprehensive volume challenges underlying assumptions by balancing its assessment of the consequences and accomplishments of European navigators in the era of Columbus, da Gama, and Magellan, with an awareness of the sophistication and maritime expertise in Asia, the Arab world, and the Americas. By imparting riveting new stories and global perceptions of maritime history and culture, the contributors provide readers with fresh insights concerning early modern entanglements between humans and the vast, unpredictable ocean. With

maritime studies growing and the ocean's health in decline, this volume is essential reading for academics and students interested in the historicization of the ocean and the ways early modern cultures both conceptualized and utilized seas.

America's Greatest Naval Architect and His Quest to Build the S.S. United States John Wiley & Sons

With the Maritime Labour Convention now in force (as of August 2013), the shipping industry is faced with a new international convention that has comprehensive implications across all sectors. This vital text provides timely analysis and thought-provoking essays regarding the Convention's application and enforcement in practice. Hailed as the "Seafarer's Bill of Rights" and the "fourth pillar" of the international regulatory regime for quality shipping, the Maritime Labour Convention is set to significantly alter the playing field for key stakeholders. This book offers diverse and interesting commentary in respect of the Convention's impact on core sectors of the shipping industry, identifying both strengths and weaknesses of the Convention, as well as potential hurdles that will need to be overcome.

Each chapter focuses on a different aspect of the Convention, ranging from individual rights of the seafarer to challenges of flag State implementation. Special attention is given to enforcement through examination of the innovative measures provided in the Convention itself, along with discussion of domestic enforcement mechanisms in certain States. Furthermore, the book evaluates whether the Convention has filled existing gaps in maritime labour law, resolved prior difficulties or created new problems. This book expertly addresses issues of fundamental importance to national authorities, shipping professionals and associations, maritime lawyers and academics worldwide. ---In memory of Richard Shaw---
