The History of the Popes from the Close of the Middle Ages Little, Brown

In nineteenth-century Vienna, a drama of love, fate, and will is played out amid the intellectual ferment that defined the era. Josef Breuer, one of the founding fathers of psychoanalysis, is at the height of his career. Friedrich Nietzsche, Europe's greatest philosopher, is on the brink of suicidal despair, unable to find a cure for the headaches and other ailments that plague him. When he agrees to treat Nietzsche with his experimental "talking cure," Breuer never expects that he too will find solace in their sessions. Only through facing his own inner demons can the gifted healer begin to help his patient. In *When Nietzsche Wept*, Irvin Yalom blends fact and fiction, atmosphere and suspense, to unfold an unforgettable story about the redemptive power of friendship.

Tricentennial Guilford Publications

The nineteenth century, a time of far-reaching cultural, political, and socio-economic transformation in Europe, brought about fundamental changes in the role of women. Women achieved this by fighting for their rights in the legal, economic, and political spheres. In the various parts of Europe, this process went forward at a different pace and followed different patterns. Most historical research up to now has ignored this diversity, preferring to focus on women's emancipation movements in major western European countries such as Britain and France. The present volume provides a broader context to the movement by including countries both large and small from all regions of Europe. Fourteen historians, all of them specialists in women's history, examine the origins and development of women's emancipation movements in their respective areas of expertise. By exploring the cultural and political diversity of nineteenth-century Europe and at the same time pointing out connections to questions explored by conventional scholarship, the essays shed new light on common developments and problems.

This book examines the way in which a group of key Spanish and Latin American intellectuals of the nineteenth and twentieth-centuries discussed the concept of the Spanish language. The contributors analyse the ways in which these discussions related to the construction of national identities and the idea of an Hispanic culture. This book will be essential reading for sociolinguists, scholars of the Spanish language, historians of the Hispanic culture, and all those with an interest in the relationship between language and culture.

Waging and Winning the War Within Be Free! the Gift of Freedom

Inspired by Madres de la Plaza de Mayo's work for memory and justice, this book is an interdisciplinary study that draws on Latin American literary, trauma, performance, and cultural studies to analyze the narrative of three Argentine women writers/activists.

The Emergence and Dissolution of Hierarchy Cambridge Scholars Publishing

Using a synthesis of ecology, anthropology, philosophy and political theory, this book traces our society's conflicting legacies of freedom and domination, from the first emergence of human culture to today's global capitalism. The theme of Murray Bookchin's grand historical narrative is straightforward: environmental, economic and political devastation are born at the moment that human societies begin to organize themselves hierarchically. And, despite the nuance and detail of his arguments, the lesson to be learned is just as basic: our nightmare will continue until hierarchy is dissolved and human beings develop more sane, sustainable and egalitarian social structures.

A North Korean Girl's Journey to Freedom K G Saur Verlag Gmbh & Company

The present ecological mutation has organized the whole political landscape for the last thirty years. This could explain the deadly cocktail of exploding inequalities, massive deregulation, and conversion of the dream of globalization into a nightmare for most people. What holds these three phenomena together is the conviction, shared by some powerful people, that the ecological threat is real and that the only way for them to survive is to abandon any pretense at sharing a common future with the rest of the world. Hence their flight offshore and their massive investment in climate change denial. The Left has been slow to turn its attention to this new situation. It is still organized along an axis that goes from investment in local values to the hope of globalization and just at the time when, everywhere, people dissatisfied with the ideal of modernity are turning back to the protection of national or even ethnic borders. This is why it is urgent to shift sideways and to define politics as what leads toward the Earth and not toward the global or the national. Belonging to a territory is the phenomenon most in need of rethinking and careful redescription; learning new ways to inhabit the Earth is our biggest challenge. Bringing us down to earth is the task of politics today.

"I am most grateful for two things: that I was born in North Korea, and that I escaped from North Korea." - Yeonmi Park "One of the most harrowing stories I have ever heard - and one of the most inspiring." - The Bookseller "Park's remarkable and inspiring story shines a light on a country whose inhabitants live in misery beyond comprehension. Park's important memoir showcases the strength of the human spirit and one young woman's incredible determination to never be hungry again." —Publishers Weekly In In Order to Live, Yeonmi Park shines a light not just into the darkest corners of life in North Korea, describing the deprivation and deception she endured and which millions of North Korean people continue to endure to this day, but also onto her own most painful and difficult memories. She tells with bravery and dignity for the first time the story of how she and her mother were betrayed and sold into sexual slavery in China and forced to suffer terrible psychological and physical hardship before they finally made their way to Seoul, South Korea—and to freedom. Park confronts her past with a startling resilience. In spite of everything, she has never stopped being proud of where she is from, and never stopped striving for a better life. Indeed, today she is a human rights activist working determinedly to bring attention to the oppression taking place in her home country. Park's testimony is heartbreaking and unimaginable, but never without hope. This

Captured by the City: Perspectives in Urban Culture Studies is a collection of eighteen essays on urban places, people, and phenomena. In it, cities in North America, Europe, and Asia offer themselves as dynamic encounters to those who study them and to those who live in them on a daily basis. Different disciplines--Sociology, Anthropology, Performance Studies, Architectural History, Linguistics, Media Studies, Documentary Poetics, to name just a few--intersect here to help shape a unique field of inquiry--that of Urban Culture Studies. This multi-perspectival approach grants us a more wholesome understanding of how we inscribe cities and how cities inscribe us in return: as we plan, inhabit, remember them--in reality or in dreams.
