The Remarkable Story of a True Hero of American Aviation The U.S. Navy's Blue Angels are the most famous flight demonstration team in the world. While millions of aviation enthusiasts see their shows every year, the story of the man who formed the squadron has never been told. He is Roy Marlin "Butch" Voris, a World War II Ace and one of only two aviators ever to command the Blue Angels twice. *First Blue* details the epic journey of an unassuming man whose strong character and desire to fly launched him into a life of drama, heroism, and accomplishment unique in his field. Because he wanted to serve his country during World War II, a young Butch Voris found himself flying fighter planes as part of the pitifully prepared and outmanned front in the early stages of the Pacific theater. He was nearly killed there but went on to be a leader in one of the most fearsome naval air squadrons in the Pacific. As a pilot, Butch is unquestionably in the same class as more recognized aviator heroes such as Chuck Yeager and Pappy Boyington. While his World War II experience alone could comprise a book, Butch may be best known for his efforts in the creation of the naval air demonstration team, the Blue Angels. After the war, Voris was personally chosen by Admiral Nimitz to start the Blue Angels and to lead them, first in prop planes and later in jets. The story of his efforts is as exciting as it is inspirational, and it's told here in meticulous detail and with great humor. Today the Blue Angels still follow traditions established by Butch. Butch's involvement in military flight didn't end with the Blue Angels; he became a major player in the development of the F-14 Tomcat and NASA's Lunar Explorer Module for Grumman. Butch dedicated his life to his work, and here, finally, is the remarkable, untold account of this true American aviation pioneer and hero: a man whose life had unparalleled influence on naval aviation and whose legacy continues to inspire millions of Americans each year.

How Japan's World War II race to build an atomic bomb fathered North Korea's nuclear threat. This revised and greatly updated third edition of *Japan's Secret War* is a groundbreaking, thoroughly sourced investigation into one of the least-known, yet highly significant episodes of World War II: Japan's frantic race to develop its own atomic bomb. We'll discover how that effort then evolved into North Korea's nuclear program and the looming threat it presents to mankind. Japan's WWII development of a nuclear program is not universally known. After decades of research into national intelligence archives both in the US and abroad, Robert Wilcox builds on his earlier accounts and provides the most detailed account available of the creation of Japan's version of our own Manhattan Project—from the project's inception before America's entry into WWII, to the possible detonation of a nuclear device in 1945 in present-day North Korea. Wilcox weaves a fascinating portrait of the secret giant industrial complex in northern Korea where Japan's atomic research and testing culminated. And it is there that North Korea, following the Japanese defeat, salvaged what remained of the complex and fashioned its own nuclear program. This program puts not only Japan, but also its allies, including the US, in jeopardy.

NEW YORK TIMES BESTSELLER • From the author of *The Eighty-Dollar Champion*, the remarkable story of the heroic rescue of priceless horses in the closing days of World War II WINNER OF THE PEN AWARD FOR RESEARCH NONFICTION In the chaotic last days of the war, a small troop of battle-weary American soldiers captures a German spy and makes an astonishing find—his briefcase is empty but for photos of beautiful white horses that have been stolen and kept on a secret farm behind enemy lines. Hitler has stockpiled the world's finest purebreds in order to breed the perfect military machine—an equine master race. But with the starving Russian army closing in, the animals are in imminent danger of being slaughtered for food. With only hours to spare, one of the U.S. Army's last great cavalymen, Colonel Hank Reed, makes a bold decision—with General George Patton's blessing—to mount a covert rescue operation. Racing against time, Reed's small but determined force of soldiers, aided by several turncoat Germans, steals across enemy lines in a last-ditch effort to save the horses. Pulling together this multistranded story, Elizabeth Letts introduces us to an unforgettable cast of characters: Alois Podhajsky, director of the famed Spanish Riding School of Vienna, a former Olympic medalist who is forced to flee the bomb-ravaged Austrian capital with his entire stable in tow; Gustav Rau, Hitler's imperious chief of horse breeding, a proponent of eugenics who dreams of genetically engineering the perfect warhorse for Germany; and Tom Stewart, a senator's son who makes a daring moonlight ride on a white stallion to secure the farm's surrender. A compelling account for animal lovers and World War II buffs alike, *The Perfect Horse* tells for the first time the full story of these events. Elizabeth Letts's exhilarating tale of behind-enemy-lines adventure, courage, and sacrifice brings to life one of the most inspiring chapters in the annals of human valor. Praise for *The Perfect Horse* "Winningly readable . . . Letts captures both the personalities and the stakes of this daring mission with such a sharp ear for drama that the whole second half of the book reads like a WWII thriller dreamed up by Alan Furst or Len Deighton. . . . The right director could make a Hollywood classic out of this fairy tale."—*The Christian Science Monitor* "Letts, a lifelong equestrienne, eloquently brings together the many facets of this unlikely, poignant story underscoring the love and respect of man for horses."—*Kirkus Reviews*

In *Sleuthing the Alamo*, historian James E. Crisp draws back the curtain on years of mythmaking to reveal some surprising truths about the Texas Revolution—truths often obscured by both racism and "political correctness," as history has been hijacked by combatants in the culture wars of the past two centuries. Beginning with a very personal prologue recalling both the pride and the prejudices that he encountered in the Texas of his youth, Crisp traces his path to the discovery of documents distorted, censored, and ignored—documents which reveal long-silenced voices from the Texan past. In each of four chapters focusing on specific documentary "finds," Crisp uncovers the clues that led to these archival discoveries. Along the way, the cast of characters expands to include: a prominent historian who tried to walk away from his first book; an unlikely teenaged "speechwriter" for General Sam Houston; three eyewitnesses to the death of Davy Crockett at the Alamo; a desperate inmate of Mexico City's Inquisition Prison, whose scribbled memoir of the war in Texas is now listed in the Guinness Book of World Records; and the stealthy slasher of the most famous historical painting in Texas. In his afterword, Crisp explores the evidence behind the mythic "Yellow Rose of Texas" and examines some of the powerful forces at work in silencing the very voices from the past that we most need to hear today. Here then is an engaging first-person account of historical detective work, illuminating the methods of the serious historian—and the motives of those who prefer glorious myth to unflattering truth.

The Pope at War Simon and Schuster

In August 1942, the Allies launched a raid against the German-held port of Dieppe on the French channel coast. It was largely a disaster, with the Canadian forces bearing the brunt of the catastrophe. However, it wasn't all a failure, and history has tended to overlook the role of 4 Commando, who, along with their US Ranger counter-parts, landed and successfully disabled the German guns threatening the rest of the landings. Their actions proved an excellent demonstration of the military adage "train hard, fight easy" and showed the advantage of proper operational planning and brilliant leadership. This controversial raid also included members of the Free French and it was the first time US land forces engaged the Germans on mainland Europe. Set in the context of the Dieppe raid as a whole, Will Fowler studies the contribution of No. 4 Commando and Operation Cauldron, and evaluates how and why they achieved their objectives in this daring Commando raid of World War II.
