Personal property security is an important subject in commercial practice, as it is the key to much of the law of banking and sale. This second edition has been fully updated and expanded to cover all important issues and changes within this highly complex area of law. It explains traditional methods of securing debts (such as mortgages, charges, and pledges) on property other than land, describing how these are created, how they must be registered (or otherwise 'perfected') if they are to be valid, the rights and duties of the parties, and how the security is enforced if the debt is not paid. The new edition includes an expanded section on priorities in which it explains how 'priority' disputes between competing interests over the same property are resolved. In addition the book covers the law governing other transactions that perform a similar economic function (such as finance

leases, retention of title clauses, and sales of a company's book debts). These are not currently treated by the law as security and are therefore subject to different rules on perfection, priority, and enforcement. There is much expansion of the discussion relating to enforcement including the issue of 'right of use' following Lehman, more analysis on administration and all forms of non-possessory security and quasi-security, and a new chapter on enforcement of security addressing the right of appropriation under FC/FCAR and the Cukurova case. The conflict of laws section includes developments under the Rome I Regulation affecting assignment issues, the UNIDROIT Convention 2009 in relation to tiered holdings and the Cape Town Convention's extensions made to coverage of asset-backed security over equipment. It also addresses the changes brought about by the abolition of Slavenburg registration. This edition contains relevant points from the Banking Act 2009 concerning its impact on security, such as the power to protect certain interests on a transfer of property, and also considers amendments regarding liquidators' expenses under the Insolvency Rules. The authors additionally deal with the role of step-in rights and why they are part of the statutory definition of project finance in the Enterprise Act. Previously published as The Law of Personal Property Security, this new edition brings together all of the law on this complex area, providing guidance in the context of commercial practice, especially with increased coverage of conflict of laws, priority, insolvency, and enforcement.

"Once more, we were delighted to take on the task of updating this text for its 14th edition, having taken over editorial responsibilities from the late John Adams from the 13th edition. In our preface to the previous edition, we recorded the sudden passing of Professor Adams. Sadly, in this preface, we must note another passing: on 30 March 2018, Patrick Atiyah, who wrote the 1st-8th editions of this book and continues to give the book its name, passed away at the age of 87. Patrick was one of those giants of academic contract law whose contributions continue to be read and to inspire scholars everywhere. We are both mindful of our task to maintain the scholarly rigour which he gave to this book as we take it into the future. This edition is also the first time since the 9th edition without a Scottish editor. Professor Hector MacQueen had been responsible for adding Scottish content since the 10th edition (2001), but decided that he would discontinue this role after the 13th edition was published in 2016. We are very grateful for Hector's contributions to the work. On the advice of the book's publishers, this edition has been put together without the benefit of a Scottish editor, although we have, of course, continued to take decisions from the Scottish courts into account in updating the various chapters. Since the last edition was published, there have been few major developments in the law on the sale of goods, aside from the difficult ruling by the Supreme Court in *PST Energy 7 Shipping LLC v OW Bunker Malta Ltd* [2016] UKSC 23 (which arrived too late for proper consideration in the previous edition). We have updated the text in light of recent cases and academic writings where appropriate. Furthermore, we have continued our task of streamlining the running order of the chapters, and we have sought to make gentle updates to the language of the book, preserving its rigour but ensuring it remains accessible to a contemporary audience. In some instances, we have ^curtailed or removed altogether the detailed discussion of the pre-1994 case-law which had become redundant as a result of the changes made to the Sale of Goods Act at that time. The rise of digital technology and new business models in the digital economy will invariably have an impact on the law concerning the sale of goods, but at this point, the real impact is not yet known. In some places, we have alluded to the possible significance of digital technology, and this could well become a more significant theme in future editions"--

Commercial Remedies: Resolving Controversies Routledge

This book is the first to provide an extensive analysis of the range of defences to payment under letters of credit and demand guarantees. It considers the extent to which different defences undermine the abstraction of these instruments. This is a fundamental issue, since letters of credit and demand guarantees are designed to be abstract, or autonomous, from the underlying contract that called for their use. The purpose of that abstraction is to provide certainty of payment, but the various defences diminish that certainty. The book examines the spectrum of defences that are frequently litigated and debated in international practice: fraud in the documents, nullity, fraud affecting deferred payment letters of credit, fraud as no honest belief, unconscionable conduct and illegality. Vitaly, the book provides analysis of the relevant judicial decisions and offers clear practical guidance on which defences are most suitable for each instrument. As the instruments are heavily used in international trade, this work is particularly suited to financial and commercial law practitioners who draft agreements, as well as those who advise on disputes concerning these instruments. Accessible and engaging, the book is also relevant for academics and students.

TEXT, CASES, AND MATERIALS

Cambridge University Press

"That relatively few criminal cases in this country are resolved by full Perry Mason-style trials is fairly common knowledge. Most cases are settled by a guilty plea after some form of negotiation over the charge or sentence. But why? The standard explanation is case pressure: the enormous volume of criminal cases, to be processed with limited staff, time and resources. . . . But a large body of new empirical research now demands that we re-examine plea negotiation. Milton Heumann's book, *Plea Bargaining*, strongly and explicitly attacks the case-pressure argument and suggests an alternative explanation for plea bargaining based on the adaptation of attorneys and judges to the local criminal court. The book is a significant and welcome addition to the literature. Heumann's investigation of case pressure and plea negotiation demonstrates solid research and careful

The third edition of this acclaimed book continues to provide a discussion of key theoretical and policy issues in corporate finance law. It has been fully updated to reflect developments in the law and the markets. One of the book's distinctive features is its equal coverage of both the equity and debt sides of corporate finance law, and it seeks, where possible, to compare and contrast the two. This book covers a broad range of topics regarding the debt and equity-raising choices of companies of all sizes, from SMEs to the largest publicly traded enterprises, and the mechanisms by which those providing capital are protected. Each chapter provides a critical analysis of the present law to enable the reader to understand the difficulties, risks and tensions in this area, and the attempts by the legislature, regulators and the courts, as well as the parties involved, to deal with them. The book will be of interest to practitioners, academics and students engaged in the practice and study of corporate finance law.

Transnational Commercial Law Springer

This book addresses issues concerning the shifting contemporary meaning of legal certainty. The book focuses on exploring the emerging tensions that exist between the demand for legal certainty and the challenges of regulating complex, late modern societies. The book is divided into two parts: the first part focusing on debates around legal certainty at the national level, with a primary emphasis on criminal law; and the second part focusing on debates at the transnational level, with a primary emphasis on the regulation of transnational commercial transactions. In the context of legal modernity, the principle of legal certainty—the idea that the law must be sufficiently clear to provide those subject to legal norms with the means to regulate their own conduct and to protect against the arbitrary use of public power—has operated as a foundational rule of law value. Even though it has not always been fully realized, legal certainty has functioned as a core value and aspiration that has structured normative debates throughout political modernity, both at a national and international level. In recent decades, however, legal certainty has come under increasing pressure from a number of competing demands that are made of contemporary law, in particular the demand that the law be more flexible and responsive to a social environment characterized by rapid social and technological change. The expectation that the law operates in new transnational contexts and regulates every widening sphere of social life has created a new degree of uncertainty, and this change raises difficult questions regarding both the possibility and desirability of legal certainty. This book compiles, in one edited volume, research from a range of substantive areas of civil and criminal law that shares a common interest in understanding the multi-layered challenges of defining legal certainty in a late modern society. The book will be of interest both to lawyers interested in understanding the transformation of core rule of law values in the context of contemporary social change and to political scientists and social theorists.

PERSPECTIVES AND PRINCIPLES

Penguin UK

The law of personal property covers a very wide spectrum of scenarios and, unfortunately, has had little detailed scrutiny of its overarching structure over the years. It is a system and can best be understood as a system. Indeed, without understanding it as a system, it becomes much more difficult to comprehend. The second edition of this acclaimed textbook continues to provide a comprehensive yet detailed coverage of the law of personal property in England and Wales. It includes transfer of legal title to chattels, the nemo dat rule, negotiable instruments and assignment of choses in action. It also looks at defective transfers of property and the resulting proprietary claims, including those contingent on tracing, the tort of conversion, bailment and security interests. By bringing together areas often scattered throughout company law, commercial law, trusts and tort textbooks, it enables readers to see common themes and issues and to make otherwise impossible generalisations across different contexts about the nature of the concepts English law applies. Throughout the book, concepts are explained rigorously, with reference to how they are used in commercial practice and everyday life. The new edition also includes a new chapter on secured transactions law reform, and introduces new material on the Cape Town Convention, IP rights and other intangible property. The book will be of primary interest to academics and practitioners in the area. However, it will also be of use to students studying commercial or personal property law.

Transnational commercial law represents the outcome of work undertaken to harmonize national laws affecting domestic and cross-border

transactions and is upheld by a diverse spectrum of instruments. Now in its second edition, this authoritative work brings together the major instruments in this field, dividing them into thirteen groups: Treaty Law, Contracts, Electronic Commerce, International Sales, Agency and Distribution, International Credit Transfers and Bank Payment Undertakings, International Secured Transactions, Cross-Border Insolvency, Securities Custody, Clearing and Settlement and Securities Collateral, Conflict of Laws, Civil Procedure, Commercial Arbitration, and a new section on Carriage of Goods. Each group of instruments is preceded by linking text which provides important context by identifying the key instruments in each group, discussing their purposes and relationships, and explaining the major provisions of each instrument, thus setting them in their commercial context. This volume is unique in providing the full text of international conventions, including the preamble - which is important for interpretation - and the final clauses and any annexes. In addition, each instrument is accompanied by a complete list of dates of signature and ratification by all contracting states, all easily navigated through the detailed tables of contents which precedes it. This fully-indexed work provides an indispensable guide for the practitioner or academic to the primary transnational commercial law instruments.

This book offers an original academic study of the Rotterdam Rules. It analyses the salient articles that will have an impact on international sale contracts governed by English law, including the most popularly used international law instruments, terms and standard sale contracts. Looking beyond the legal relationship of carrier-shipper and carrier-receiver, this book examines the important articles of the Rotterdam Rules that affect the ability of the trading protagonists to perform their sale contract.
