SELAH ELSA

GB, GB/T, GBT - Product Catalog. Translated English of Chinese Standard (All national standards GB, GB/T, GBT, GBZ) Springer
Policymakers and program managers are continually seeking ways to improve accountability in achieving an entity's mission. A key factor in improving accountability in achieving an entity's mission is to implement an effective internal control system. An effective internal control system helps an entity adapt to shifting environments, evolving demands, changing risks, and new priorities. As programs change and entities strive to improve operational processes and implement new technology,

management continually evaluates its internal control system so that it is effective and updated when necessary. Section 3512 (c) and (d) of Title 31 of the United States Code (commonly known as the Federal Managers' Financial Integrity Act (FMFIA)) requires the Comptroller General to issue standards for internal control in the federal government.

The Contracts for Difference (Standard Terms) Regulations 2014
Univ. Press of Mississippi

Indonesia's criminal law system faces major challenges. Despite the country's transition to democracy, both the Criminal Code and the Criminal Procedure Code are badly out of date, the former only superficially changed since colonial times and the latter remaining as it was under Soeharto's authoritarian New Order regime. Law enforcement officers and judges are widely

seen as corrupt or incompetent, and new laws, including new Islamic laws passed at the regional level, often contradict the Criminal Code and national statutes, including human rights laws. This book, based on extensive original research by leading scholars in the field, provides an overall assessment of the state of criminal law, law enforcement and penal policy in Indonesia, considers in depth a wide range of specific areas of criminal law, and discusses recent efforts at reform and their prospects for success.

Climate Change Impacts on Fisheries and Aquaculture, 2 Volumes
Taylor & Francis

Capacity remuneration mechanisms (or simply capacity mechanisms) have become a fact of life in member states' energy markets and are one of the hottest topics in the wider European regulatory debate. Concerned about the security of electricity supply, national governments are implementing subsidy schemes to encourage investment in conventional power generation capacity, alongside already heavily subsidized renewable energy sources. With the increasingly connected European electricity markets, the introduction of a capacity mechanism in one country not only tends to distort its national market but may also have unforeseeable consequences for neighbouring electricity markets. As these mechanisms are adopted by member states with limited supra-national coordination as well as consideration for the cross-border impact, they tend to cause serious market distortions and put the future of the European internal electricity market at risk. This second edition will take stock of how capacity mechanisms have actually worked so far and consider the consequences they have for the

European internal electricity market. It will include a detailed overview of national capacity mechanisms, their implications for the EU internal market, and will outline the nature of market failures which are likely to occur in the European electricity markets. This edition is intended to serve as a point of reference for regulators and policy-makers on how to design optimal capacity mechanisms in Europe. It will be an invaluable resource for anyone interested in energy market design, regulation, and competition issues.

Control of Price Related Terms in Standard Form

Commercial Contracts: A Practical Guide to Standard Terms
Bloomsbury Publishing

The Future of Mental Health, Disability and Criminal Law

Routledge

This book explores various approaches around the world regarding price term control, and particularly discusses the effectiveness of two major paths: ex ante regulatory and ex post judicial intervention. Price control and its limits are issues that affect all liberal market economies, as well as more regulated markets. For the past several years, courts in many different countries have been confronted with the issue of whether, and to what extent, they should intervene regarding price-related terms in standard form contracts - especially in the area of consumer contracts. Open price clauses, flat remunerations, price adjustment clauses, clauses giving the seller/supplier the right to ask for additional payments, bundling or partitioning practices, etc.: a variety of price related terms are used to manipulate customers' choices, often also by exploiting their behavioral

biases. The result is an unfavorable contract that is later challenged in court. However, invalidating a given price term in standard forms e.g. of a banking or utilities contract only has an inter partes effect, which means that in thousands if not millions of similar contracts, the same clauses continue to be used. Effective procedural rules are often lacking. Therefore, pricing patterns that serve to hide rather than to reveal the real cost of goods and services require special attention on the part of regulators. The aim of this book is to determine the various approaches in the world regarding price term control, and particularly to discuss the efficiency of both paths, ex ante regulatory and ex post judicial intervention. Thanks to its broad comparative analysis, this book offers a thorough overview of the methods employed in several countries. It gathers twenty-eight contributions from national rapporteurs and one supra-national rapporteur (EU) to the 2018 IACL Congress held in Fukuoka. These are supplemented by a general report presented at the same IACL Congress, which includes a comparative analysis of the national and supranational reports. The national contributors hail from around the globe, including Africa (1), Asia (5), Europe (17), the European Union (1) and the Americas (5).

ICICKM2014-Proceedings of the 11th International Conference on Intellectual Capital, Knowledge Management and Organisational Learning Government Printing Office

In his research, Martin Kowalczyk empirically investigates the challenges of designing and establishing successful decision support with Business Intelligence and Analytics (BI&A). The results from his work elucidate organizational and individual perspectives of BI&A support in decision processes. The

organizational perspective considers the processual aspects of decision making and addresses process phases, roles and their interactions. The individual perspective reflects upon decision making of human individuals including their cognition and behaviors involved in decision making. The support of managerial decision making with BI&A gains increasing priority for many businesses in their desire to achieve better decision outcomes and improved organizational performance.

STANDARDS FOR INTERNAL CONTROL IN THE FEDERAL GOVERNMENT

Academic Conferences Limited

Practical Research with Children is designed to help the reader understand techniques for research with children, based on real world experience. The book describes a wide range of research methods, focusing equally on quantitative and qualitative approaches, and considers how different methods can be integrated. It highlights the benefits and challenges of each method and gives emphasis to best practice, with expert guidance on how to avoid potential pitfalls in order to obtain valuable insights into how children develop. The volume includes fifteen chapters arranged over three sections. Each chapter explores a particular method, or combination of methods, and discusses both theoretical and practical issues, using a diversity of domains, including different ages, cultures, populations and settings. Uniquely, the book includes newer methods (such as eye tracking and digital technologies) alongside well-established behavioural methods which are used for research with children. With contributions from internationally renowned researchers and

practitioners from a range of disciplines, the book will be indispensable reading for a wide audience, including for students in psychology, education and nursing undertaking research projects with children, and also for anyone looking to understand the research behind current theories in child development.

ECRM2014-Proceedings of the 13th European Conference on Research Methodology for Business and Management Studies Taylor & Francis

An essential, in-depth analysis of the key legal issues that governments face when adopting cloud computing services. Routledge

The book is an attempt to bring together what are often seen as incommensurable scientific and philosophical positions. Its core argument is that a main reason for the divisions about what constitutes scientific knowledge relates to disagreements on philosophical issues. The book explores what these disagreements are about, and discusses whether they can be overcome. Taking a historical perspective, the book traces the divides in science back to three main philosophical traditions: realism, idealism, and scepticism. It maps how these have inspired three main current positions in science: logical empiricism, phenomenology, and sociology of scientific knowledge. The book is intended for a general audience concerned with today's debates on scientific knowledge and society. It will be useful for students and researchers studying philosophy of science, sociology of scientific knowledge, realism, phenomenology, positivism, logical empiricism, analytical philosophy, and sustainable scientific knowledge.

Asylum-Seeker and Refugee Protection in Sub-Saharan

Africa Cambridge University Press

Packed full of practical tips to use in the classroom, case studies to provide theoretical grounding and ideas to improve inclusion, Teaching Adult Learners with Dyslexia and English as an Additional Language covers all the key areas necessary to ensure inclusive and effective teaching practice in higher and further education settings. This book provides a coherent framework for those looking to develop their knowledge and skills in this challenging area and explores key areas such as: teaching and learning strategies, differentiation, assessment, feedback and supporting students using technology. It provides a unique insight into how to develop a thorough understanding of the needs of learners and the principles and practices of how to meet those needs within a classroom setting. This is an essential introductory book for anyone working or training to work in either Further or Higher Education and who wishes to develop knowledge and skills in the challenging area of supporting and teaching adult EAL learners with learning differences.

Teaching Adult Learners with Dyslexia and English as an Additional Language Lulu.com

Islamic archaeology is young discipline, emerging only over the course of the 1980s and 1990s. The Oxford Handbook of Islamic Archaeology is the first work of its kind to cover the archaeology of the Islamic world on a global scale, from North Africa to China and Europe to sub-Saharan Africa.

Commercial Contracts: A Practical Guide to Standard Terms Routledge

The first comprehensive review of the current and future effects of climate change on the world's fisheries and aquaculture operations. The first book of its kind, *Climate Change Impacts on Fisheries and Aquaculture* explores the impacts of climate change on global fisheries resources and on marine aquaculture. It also offers expert suggestions on possible adaptations to reduce those impacts. The world's climate is changing more rapidly than scientists had envisioned just a few years ago, and the potential impact of climate change on world food production is quite alarming. Nowhere is the sense of alarm more keenly felt than among those who study the warming of the world's oceans. Evidence of the dire effects of climate change on fisheries and fish farming has now mounted to such an extent that the need for a book such as this has become urgent. A landmark publication devoted exclusively to how climate change is affecting and is likely to affect commercially vital fisheries and aquaculture operations globally, *Climate Change Impacts on Fisheries and Aquaculture* provides scientists and fishery managers with a summary of and reference point for information on the subject which has been gathered thus far. Covers an array of critical topics and assesses reviews of climate change impacts on fisheries and aquaculture from many countries, including Japan, Mexico, South Africa, Australia, Chile, US, UK, New Zealand, Pacific Islands, India and others. Features chapters on the effects of climate change on pelagic species, cod, lobsters, plankton,

macroalgae, seagrasses and coral reefs. Reviews the spread of diseases, economic and social impacts, marine aquaculture and adaptation in aquaculture under climate change. Includes special reports on the Antarctic Ocean, the Caribbean Sea, the Arctic Ocean and the Mediterranean Sea. Extensive references throughout the book make this volume both a comprehensive text for general study and a reference/guide to further research for fisheries scientists, fisheries managers, aquaculture personnel, climate change specialists, aquatic invertebrate and vertebrate biologists, physiologists, marine biologists, economists, environmentalist biologists and planners.

THE USE OF FORCE IN INTERNATIONAL LAW

Bloomsbury Publishing

This document provides the comprehensive list of Chinese National Standards - Category: GB; GB/T, GBT.

GOVERNMENT CLOUD PROCUREMENT

Springer Nature

It is not often acknowledged that the great majority of African refugee movement happens within Africa rather than from Africa to the West. This book examines the specific characteristics and challenges of the refugee situation in Sub-Saharan Africa, offering a new and critical vision on the situation of asylum-seekers and refugees in the African continent. Cristiano d'Orsi considers the international, regional and domestic legal and institutional frameworks linked to refugee protection in Sub-Saharan Africa, and explores the contributions African refugee protection has brought to the cause on a global scale. Key issues covered in the

book include the theory and the practice of non-refoulement, an analysis of the phenomenon of mass-influx, the concept of burden-sharing, and the role of freedom fighters. The book goes on to examine the expulsions of refugees and the historical role played by UNHCR in Sub-Saharan Africa. As a work which follows the persecution and legal challenges of those in search of a safe haven, this book will be of great interest and use to researchers and students of immigration and asylum law, international law, human rights, and African studies.

Improving Bayesian Reasoning: What Works and Why?

<https://www.chinesestandard.net>

These proceedings represent the work of researchers participating in the 11th International Conference on Intellectual Capital, Knowledge Management & Organisational Learning - ICICKM 2014, which this year is being held at The University of Sydney Business School, The University of Sydney, Australia. The Conference Co-Chairs are Dr John Dumay from Macquarie University, Sydney, Australia and Dr Gary Oliver from the University of Sydney, Australia. The conference will be opened with a keynote by Goran Roos, Advanced Manufacturing Council, Adelaide, Australia who will address the topic of "Intellectual capital in Australia: Economic development in a high cost economy." The second day will be opened with a from James Guthrie, University of Sydney, Australia on the topic of "Intellectual Capital and the Public Sector Research: Past, Present, and Future."

The Routledge Companion to Accounting in Emerging Economies
Springer Nature

This volume asks how the current Information Technology

Revolution influences archaeological interpretations of techno-social change. Does cyber-archaeology provide a way to breathe new life into grand narratives of technological revolution and culture change, or does it further challenge these high-level theoretical explanations? Do digital recording methods have the potential to create large, regional-scale databases to ease investigation of high-level theoretical issues, or have they simply exposed deeper issues of archaeological practice that prevent this? In short, this volume cuts beyond platitudes about the revolutionary potential of the Information Technology Revolution and instead critically engages both its possibilities and limitations. The contributions to this volume are drawn from long-term regional studies employing a cyber-archaeology framework, primarily in the southern Levant, a region with rich archaeological data sets spanning the Paleolithic to the present day. As such, contributors are uniquely placed to comment on the interface between digital methods and grand narratives of long-term techno-social change. Cyber-Archaeology and Grand Narratives provides a much-needed challenge to current approaches, and a first step toward integrating innovative digital methods with archaeological theory.

New York Supreme Court, General Term First Department Case on Appeal to General Term Codeofchina Inc.

This book considers the extent to which religious interests are protected at work, with particular reference to the protection against religious discrimination provided by the Equality Act 2010. It establishes a principled basis for determining the proper scope of religious freedom at work, and considers the interaction of freedom of religion with the right not to be discriminated

against on grounds of religion and belief. The book locates the debates surrounding religion and belief equality within a philosophical and theoretical framework in which the importance of freedom of religion and its role within the workplace are fully debated. This second edition is fully revised and updated in the light of recent case law from the UK and the European Court of Human Rights, which deals with religious discrimination and freedom of religion.

SMART AND SUSTAINABLE PLANNING FOR CITIES AND REGIONS

Springer

Today, nutrition is mainly discussed under nutritional, medical-health or ideological aspects (e.g. vegetarianism, veganism, etc.). Although the food industry represents one of the most important markets, questions of food production, agriculture, food trade and biodiversity are mostly discussed under national auspices. Not only on the producer side, but also from the consumer perspective, food markets - although still nationally structured - have become more and more global markets, which can be seen, for example, in the development of food commodity prices. In addition, large food corporations are pursuing the strategy of standardizing the entire value chains in the agricultural and food sectors - under their control, mind you. The book addresses economic issues related to food production, agriculture, food trade and biodiversity. Alternatives to traditional agriculture, factory farming, and biodiversity loss are discussed - and reflected upon from an economic perspective. Particular attention is paid to aspects of globalization. This book is a translation of the

original German 1st edition Ernährung, Nahrungsmittelmärkte und Landwirtschaft by Christian J. Jäggi, published by Springer Fachmedien Wiesbaden GmbH, part of Springer Nature in 2018. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.

FEDERAL ENERGY GUIDELINES

Springer Nature

Winner of the 2020 Chicago Folklore Prize CHOICE Outstanding Academic Title for 2020 Despite predictions that commercial mass culture would displace customs of the past, traditions firmly abound, often characterized as folklore. In *The Practice of Folklore: Essays toward a Theory of Tradition*, author Simon J. Bronner works with theories of cultural practice to explain the social and psychological need for tradition in everyday life. Bronner proposes a distinctive “praxic” perspective that will answer the pressing philosophical as well as psychological question of why people enjoy repeating themselves. The significance of the keyword practice, he asserts, is the embodiment of a tension between repetition and variation in human behavior. Thinking with practice, particularly in a digital world, forces redefinitions of folklore and a reorientation toward interpreting everyday life. More than performance or enactment in social theory, practice connects localized culture with the

vernacular idea that “this is the way we do things around here.” Practice refers to the way those things are analyzed as part of, rather than apart from, theory, thus inviting the study of studying. “The way we do things” invokes the social basis of “doing” in practice as cultural and instrumental. Building on previous studies of tradition in relation to creativity, Bronner presents an overview of practice theory and the ways it might be used in folklore and folklife studies. Demonstrating the application of this theory in folkloristic studies, Bronner offers four provocative case studies of psychocultural meanings that arise from traditional frames of action and address issues of our

times: referring to the boogieman; connecting “wild child” beliefs to school shootings; deciphering the offensive chants of sports fans; and explicating male bravado in bawdy singing. Turning his analysis to the analysts of tradition, Bronner uses practice theory to evaluate the agenda of folklorists in shaping perceptions of tradition-centered “folk societies” such as the Amish. He further unpacks the culturally based rationale of public folklore programming. He interprets the evolving idea of folk museums in a digital world and assesses how the folklorists' terms and actions affect how people think about tradition.
