Can We Map Success? Successful people typically don't plan their success. Instead they develop a unique philosophy or attitude that works for them. They stumble across strategies which are shortcuts to success, and latch onto them. Events hand them opportunities they could not have anticipated. Often their peers with equal or greater talent fail while they succeed. It is too easy to attribute success to inherent, unstoppable genius. Bestselling author and

serial entrepreneur Richard Koch charts a map of success, identifying the nine key attitudes and strategies can propel anyone to new heights of accomplishment: Self-belief Olympian Expectations Transforming Experiences One Breakthrough Achievement Make Your Own Trail Find and Drive Your Personal Vehicle Thrive on Setbacks Acquire Unique Intuition Distort Reality With this book, you can embark on a journey towards a new,

unreasonably successful future.

With the passage of the Riegle-Neal Interstate Banking and Branching Efficiency Act in 1994, some Americans celebrated the dawn of a new banking era. This law represented the first

revision of the Glass-Steagall Act of 1933. In the intervening sixty years, the U.S. banking industry had undergone dramatic changes, both domestically and internationally, and yet the laws associated with banking remained fixed and intransigent. The new legislation represented a rapid realignment of American banking laws with societal norms; as such, it generated confusion and uncertainty for many bankers and their constituents, for example, stockholders,

customers, and employees. Matasar and Heiney examine public data since 1994 in an effort to fully apprise scholars and practitioners of the changes that have irrevocably altered the landscape of American banking.

Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report

published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-

ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental

organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.

Founder of The Boston Beer Company, brewer of Samuel Adams Boston

Lager, and a key catalyst of the American craft beer revolution, Jim Koch offers his unique perspective when it comes to business, beer, and turning your passion into a successful company or career. In 1984, it looked like an unwinnable David and Goliath struggle: one guy against the mammoth American beer industry. When others scoffed at Jim Koch's plan to leave his consulting job and start a brewery that would challenge American palates, he chose a nineteenth-century family

recipe and launched Samuel Adams. Now one of America's leading craft breweries, Samuel Adams has redefined the way Americans think about beer and helped spur a craft beer revolution. In Quench Your Own Thirst, Koch offers unprecedented insights into the whirlwind ride from scrappy start-up to thriving public company. His innovative business model and refreshingly frank stories offer counterintuitive lessons that you can apply to business and to life. Koch

covers everything from finding your own Yoda to his theory on how a piece of string can teach you the most important lesson you'll ever learn about business. He also has surprising advice on sales, marketing, hiring, and company culture. Koch's anecdotes, quirky musings, and bits of wisdom go far beyond brewing. A fun, engaging guide for building a career or launching a successful business based on your passions, Quench Your Own Thirst is the key to the ultimate dream: being

successful while doing what you love.

Times Bestseller A former Wall Street quant sounds an alarm on the mathematical models that pervade modern life -- and threaten to rip apart our social fabric We live in the age of the algorithm. Increasingly, the decisions that affect our lives-- where we go to school, whether we get a car loan, how much we pay for health insurance--are being made not by humans, but by mathematical models. In theory, this should lead to greater fairness: Everyone is judged according to the

same rules, and bias is eliminated. But as Cathy O'Neil reveals in this urgent and necessary book, the opposite is true. The models being used today are opaque, unregulated, and uncontestable, even when they're wrong. Most troubling, they reinforce discrimination: If a poor student can't get a loan because a lending model deems him too risky (by virtue of his zip code), he's then cut off from the kind of education that could pull him out of poverty, and a vicious

spiral ensues. Models are propping up the lucky and punishing the downtrodden, creating a "toxic cocktail for democracy." Welcome to the dark side of Big Data. Tracing the arc of a person's life, O'Neil exposes the black box models that shape our future, both as individuals and as a society. These "weapons of math destruction" score teachers and students, sort resumes, grant (or deny) loans, evaluate workers, target voters, set parole, and monitor our

health. O'Neil calls on modelers to take more responsibility for their algorithms and on policy makers to regulate their use. But in the end, it's up to us to become more savvy about the models that govern our lives. This important book empowers us to ask the tough questions, uncover the truth, and demand change. -- Longlist for National Book Award (Non-Fiction) -- Goodreads, semi-finalist for the 2016 Goodreads Choice Awards (Science and Technology) -- Kirkus,

DECIDE WHAT NOT TO DO # 46 TEACH PEOPLE HOW TO USE YOUR TIME # 97 TAKE BACK THE WEEKEND In Cut to the Chase, bestselling author Stuart R. Levine reveals 100 no-nonsense rules on how to be more effective at work and make the best use of your most precious

resource: your time. Just before CEO and consultant Stuart Levine appeared on the Today show to discuss his book The Six Fundamentals of Success, co-host Matt Lauer said to him, "You know what really drives me nuts? When people come into my office for a five-minute conversation and an hour later, they're still there! Why can't they cut to the chase?" Lauer's question echoed the concerns Levine has heard from business people and top executives at every level: How can I

get more done? How can I stay focused? How can I condense my workday so that I can become more successful and still spend more time with the people I love? Levine's answer? By cutting to the chase. Successful individuals are the ones who make the best use of their time and energy. They approach each task with clarity, focus, and purpose. They prioritize. They don't allow others to waste their time. They understand the importance of refueling their batteries outside of work. In *Cut to the Chase*,

Levine distills the expertise of hundreds of CEOs, leaders, and professionals into 100 concise, invaluable lessons about how to get to the point, stay on track, and be more successful in everything you do. In an age where we spend more hours at work than ever before, *Cut to the Chase* is the indispensable guide for taking control over your time so that you can lead a happier, more balanced life.
