**Information Diffusion Management and Knowledge
Sharing: Breakthroughs in Research and Practice**

ScholarlyEditions

In the most advanced service economies, services create up to three-quarters of the wealth and 85% of employment, and yet we know relatively little about managing innovation in this sector. The critical role of services, in the broadest sense, has long been recognized, but is still not well understood. Most research and management prescriptions have been based on the experience of

manufacturing and high technology sectors. There is a clear need to distinguish which, if any, of what we know about managing innovation in manufacturing is applicable to services, what must be adapted, and what is distinct and different. Such is the goal of this book. This unique collection brings together the latest academic research and management practice on innovation in services, and identifies a range of successful organizational responses to current technological opportunities and market imperatives. The contributors include leading researchers, consultants and practitioners in the field, who provide rigorous yet practical insights into managing and organizing innovation in services. Two themes help to integrate the contributions in this book: • That generic good practices exist in the management and

organization of innovation in services, which the authors seek to identify, but that these must be adapted to different contexts, specifically the scale and complexity of the tasks, the degree of customization of the offerings, and the uncertainty of the environment. • That innovation in services is much more than the application of information technology (IT). In fact, the disappointing returns to IT investments in services have resulted in a widespread debate about the causes and potential solutions — the so-called “productivity paradox” in services. Instead here the authors adopt a broader notion of innovation, including technological, organizational and market change. The key is to match the configuration of organization and technology to the specific market environment. Contents: Conceptual and Analytical Frameworks for Service Innovation: Services and the Knowledge-Based Economy (I Miles) Service Innovation: Aiming to Win (T Clayton) Sector and National Studies of Innovation in Services: Innovation in Healthcare Delivery (D J Bower) Product Development in Financial Services: Picking the Right Leader for Success (E Chortatsiani) Applying Innovation Management Good Practice to Services: A Composite Framework of Product Development and Delivery Effectiveness in Services (F M Hull & J Tidd) Product Development in Service Enterprises: Case Studies of Good Practice (F M Hull) and other articles Readership: Graduate students and researchers in management programs; managers. Keywords: Innovation; Services; Product Development; Technology Management; Operations Management Reviews: “... while this text is most valuable to the academician, it also should be of interest to those in service industries responsible for new product development ... this book makes a worthwhile contribution to the

academic literature as well as catering to the needs of business professionals.” *Journal of Product Innovation Management Handbook of Research on Knowledge-Intensive Organizations* Routledge

Construction Guide provides CPAs with guidance on the accounting, auditing, and reporting that are particular to the construction industry. In addition, it provides CPAs with guidance on engagements for a wide range of situations, including those special to utility contractors, road builders, home construction, home builders, real estate developers, commercial construction, residential construction, and more. The book includes work programs, practice aids, checklists, and sample reports.

Knowledge Management World Scientific

This five-volume set clearly manifests the great significance of these key technologies for the new economies of the new millennium. The discussions provide a wealth of practical ideas intended to foster innovation in thought and, consequently, in the further development of technology. Together, they comprise a significant and uniquely comprehensive reference source for research workers, practitioners, computer scientists, academics, students, and others on the international scene for years to come.

INTELLIGENT KNOWLEDGE-BASED SYSTEMS

Academic Conferences and publishing limited

In the coming decades, East Asian economies must face the challenges of an increasingly globalized marketplace. This book explores the changing parameters of competition in East Asia, and argues that success ultimately will depend on the ability of

the region's firms to harness the potential of global production networks and to build their own innovative capability. Presenting the latest findings on global production networks and the evolution of technological capabilities, it provides researchers, students, and policymakers with in-depth information and analysis on key issues related to growth and development in East Asia. East Asian firms must not only achieve greater efficiency but also become more innovative, offering differentiated products in order to vie with other first-tier suppliers of multinational corporations. These firms will also need to develop a technological edge if they are to compete with corporations from the leading OECD countries and form their own global production networks. 'Global Production Networking and Technological Change in East Asia' argues that a development strategy linked to technological advance will be necessary to foster the growth of innovative national firms that can remain competitive in global markets.

 Issues in Industrial Relations and Management: 2013 Edition is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Management Science. The editors have built Issues in Industrial Relations and Management: 2013 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Management Science in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Industrial Relations and Management: 2013 Edition has been produced by the world's leading scientists, engineers, analysts,

research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Corporate Management in a Knowledge-Based Economy

Emerald Group Publishing

Corporate Management in a Knowledge-Based Economy traces the evolution of corporate governance over time, with a particular focus on the changing nature of power. The control of scarce resources used in production materials, labour and capital has evolved considerably over the past centuries, with government, landowners, non-owner managers, and institutional investors acting as controlling powers at different points in time. In order to appropriately protect the various, and changing, stakeholders, the system of corporate governance has also developed over the years a process that continues to the present. In today's knowledge-based economy, with the rising importance of intangible assets, a new corporate management paradigm is needed. This book incorporates theoretical work as well as practical applications to analyse these developments and explore emerging trends of the 21st century. It examines how the pursuit of profit maximization has resulted in governance failures and it focuses on the prospective role of business ethics (once again in the spotlight following the credit crisis) in helping reform flawed governance structures. It argues that, in the long term, a system based on ethics can maximize social responsibility, customer satisfaction, human capital development and economic targets.

IFIP WG 5.7 International Conference, APMS 2014, Ajaccio, France, September 20-24, 2014, Proceedings, Part II

Springer Science & Business Media

Almost 80% of CEOs say that their organization must get better at managing external relationships. According to The Economist, one of the major reasons why so many relationships end in disappointment is that most organizations 'are not very good at contracting'. This ground-breaking title from leading authority IACCM (International Association for Contract and Commercial Management) represents the collective wisdom and experience of Contract, Legal and Commercial experts from some of the world's leading companies to define how to partner for performance. This practical guidance is designed to support practitioners through the contract lifecycle and to give both supply and buy perspectives, leading to a more consistent approach and language that supports greater efficiency and effectiveness. Within the five phases described in this book (Initiate, Bid, Development, Negotiate and Manage), readers will find invaluable guidance on the whole lifecycle with insights to finance, law and negotiation, together with dispute resolution, change control and risk management. This title is the official IACCM operational guidance and fully supports and aligns with the course modules for Certification.

Governance Models for Transformative Discovery CCH

In order to keep up with the constant changes in technology, business have adopted supply chain management to improve competitive strategies on a strategic and operational level. Supply Chain Management: Concepts, Methodologies, Tools, and Applications is a reference collection which highlights the major

concepts and issues in the application and advancement of supply chain management. Including research from leading scholars, this resource will be useful for academics, students, and practitioners interested in the continuous study of supply chain management and its influences.

Construction Guide Edward Elgar Publishing

With the proper management, knowledge-based resources (human capital, relational capital, structural capital) aim to contribute to the creation of a competitive advantage not only for companies and institutions, but also for nations and economic regions. Intellectual Capital Strategy Management for Knowledge-Based Organizations brings together new perspectives on the knowledge-based view of strategy management as it considers the role of companies, organizations, and nations in the storage and measurement of their knowledge. This book is useful for industry leaders, practitioners, academics and scholars interested in emerging aspects of knowledge management and industry services.

Overview of the Current Situation and Challenges for the Educational System Springer

This timely volume brings together current research on knowledge-intensive business services (KIBS) and innovation from a geographic or territorial perspective. Researchers from across Europe and North America explore areas such as innovation related cooperation between KIBS firms and their industrial partners, how KIBS firms mediate business knowledge and the impact that KIBS make in their local, regional and international contexts.

INFORMATION SYSTEMS: DEVELOPMENT, RESEARCH, APPLICATIONS, EDUCATION

World Bank Publications

The proper use and dissemination of information among stakeholders, organizations, and societies is crucial for the development of productive and prosperous communities. Governance, Communication, and Innovation in a Knowledge Intensive Society gathers current research on knowledge management in governments, organizations, and institutions, and presents a compilation useful to academics, professionals, politicians, and policymakers invested in knowledge intensive societies. This book investigates the impact of knowledge and information technologies on fields as diverse as education, culture, science and business, in order to provide an effective framework for effectively navigating the nuances of an information-pervasive world.

Intellectual Capital Strategy Management for Knowledge-Based Organizations Springer

Provides an international collection of studies on knowledge-intensive organizations with insight into organizational realities as varied as universities, consulting agencies, corporations, and high-tech start-ups.

KNOWLEDGE ECONOMIES

IGI Global

The three volumes IFIP AICT 438, 439, and 440 constitute the refereed proceedings of the International IFIP WG 5.7 Conference on Advances in Production Management Systems, APMS 2014,

held in Ajaccio, France, in September 2014. The 233 revised full papers were carefully reviewed and selected from 271 submissions. They are organized in 6 parts: knowledge discovery and sharing; knowledge-based planning and scheduling; knowledge-based sustainability; knowledge-based services; knowledge-based performance improvement, and case studies.

BUSINESS STRATEGY AND PUBLIC POLICY

IGI Global

This work offers a state-of-the art survey of information systems research on electronic customer relationship management (eCRM). It provides important new frameworks derived from current cases and applications in this emerging field. Each chapter takes a collaborative approach to eCRM that goes beyond the analytical and operational perspectives most often taken by researchers in the field. Chapters also stress integration with other enterprise information systems. The book is organized in four parts: Part I presents an overview of the role of CRM and eCRM in marketing and supply chain management; Part II focuses on the organizational success factors behind eCRM implementation; Part III presents cases of eCRM performance enhancement; and Part IV addresses eCRM issues in business-to-consumer commerce.

BPM 2015, 13TH INTERNATIONAL WORKSHOPS, INNSBRUCK, AUSTRIA, AUGUST 31 - SEPTEMBER 3, 2015, REVISED PAPERS

Routledge

This book constitutes the refereed proceedings of ten

international workshops held in Innsbruck, Austria, in conjunction with the 13th International Conference on Business Process Management, BPM 2015, in September 2015. The seven workshops comprised Adaptive Case Management and other Non-workflow Approaches to BPM (AdaptiveCM 2015), Business Process Intelligence (BPI 2015), Social and Human Aspects of Business Process Management (BPMS2 2015), Data- and Artifact-centric BPM (DAB 2015), Decision Mining and Modeling for Business Processes (DeMiMoP 2015), Process Engineering (IWPE 2015), and Theory and Applications of Process Visualization (TaProViz 2015). The 42 revised papers presented were carefully reviewed and selected from 104 submissions. In addition, four short papers and one keynote (from TAProViz) are also included in this book.

ORGANIZATIONAL FORMS AND NATIONAL INSTITUTIONS

IGI Global

"This book provides a collection of methodologies and tools that can be used in managing relationships and performance of IT outsourcing"--Provided by publisher.

Knowledge-intensive Business Services Ashgate Publishing, Ltd.

Focusing on current workplace issues and employee and employer expectations of Human Resource Management in a rapidly changing business environment, this book examines current trends of HR practices and expands on current literature.

Knowledge-based System for Flight Information

Management IGI Global

In a knowledge-based economy, the development of a particular type of services, knowledge intensive business services (KIBS),

becomes one of the characteristic trends in economic evolution. Current research focuses mainly on service innovation in developed countries, but little consideration is given to the situation in developing countries. Based on empirical research in the People's Republic of China, this book aims to contribute to a better appreciation and understanding of the innovative characteristics of KIBSs in developing countries.

KNOWLEDGE INTENSIVE BUSINESS SERVICES

Springer Science & Business Media

The idea of managing and transforming tacit to explicit knowledge is getting more and more attention in public systems domain. It has been quite sometime that authors, researchers and managers have come to realize that employees, processes and systems of decision-making in the organizations are a great reservoir of tacit knowledge. It is an important challenge to build and manage systems that can capture, store, retrieve and build new knowledge base for effective decision-making and yet have a human interface. This book is an eye opener for people having interest in knowledge management and knowledge management systems in modern organizations. This book covers ideas, models, conceptual papers and case studies covering the whole globe through the lenses of authors of different continents. For good governance and effective management of public systems, the authors have developed knowledge management processes, models and systems that can have universal appeal and applicability. The book has sixteen, well researched, thought provoking papers and case studies from India, Europe, Brazil and USA. The judicious mix of conceptual papers and case studies will

help the students/managers to understand and internalize the process and stages of knowledge management from different countries. It will also make them visualize the practice of knowledge management across the diverse organizations and countries.

Concepts, Methodologies, Tools, and Applications IGI Global Knowledge intensive entrepreneurship lies at the core of the structural shift necessary for the growth and development of a knowledge based economy, yet research reveals that the EU has fewer young leading innovators, and Europe's new firms do not adequately contribute to industrial growth. This is especially true in the high R&D intensive, high-tech sectors. This structural malaise, undermining Europe's growth potential, is well diagnosed, but poorly understood. This volume fills this important

gap by exploring new firms that have significant knowledge intensity in their activity and develop and exploit innovative opportunities in diverse sectors. Through an evolutionary and systemic approach to entrepreneurship, focusing on knowledge intensive entrepreneurship as both a micro and a macro phenomena and analyzing firms in the context of various socio-economic models, the authors explore firms creation and origins around the world, their organization, strategies and business models as well as the role of innovation systems and institutions in their formation and growth. This comprehensive research text is vital reading for academics, researchers and students of high-tech and knowledge intensive entrepreneurship as well as those with an interest in industrial dynamics, innovation management and public policy.
