Racism has never been simple. It wasn't more obvious in the past, and it isn't less potent now. From the birth of the United States to the contemporary police shooting death of an unarmed Black youth, *Beneath the Surface* of White Supremacy investigates ingrained practices of racism, as well as unquestioned assumptions in the study of racism, to upend and deepen our understanding. In Moon-Kie Jung's unsettling book, *Dred Scott v. Sandford*, the notorious 1857 Supreme Court case, casts a shadow over current immigration debates and the "war on terror." The story of a 1924 massacre of Filipino sugar workers in Hawai'i pairs with statistical relentlessness of Black economic suffering to shed light on hidden dimensions of mass ignorance and indifference. The histories of Asians, Blacks, Latina/os, and Natives relate in knotty ways. State violence and colonialism come to the fore in taking measure of the United States, past and present, while the undue importance of assimilation and colorblindness recedes. Ultimately, Jung challenges the dominant racial common sense and develops new concepts and theory for radically rethinking and resisting racisms.

Looking Beneath the Surface explores Arab-Islamic and Western perspectives on medical ethical issues: genetic research and treatment, abortion,

organ donation, and palliative sedation and euthanasia. The contributions in this volume discuss the state of the (medical) art, the role of laws, counseling, and spiritual counseling in the decision-making process. The different approaches to the ethical issues, ways of moral reasoning, become clear in these contributions, especially the role of tradition for Islam and the importance of autonomy for the West. Beneath the differences, however, the reader will also discover common values, such as the role of dignity and the value of life, and similar practices. Some of the main differences are sociocultural in nature, rather than religious as such. Well-known experts in the fields of medicine and ethics have contributed to this volume from different religious and secular backgrounds. The book offers a carefully written introduction and final chapter on intercultural comparisons. Looking Beneath the Surface is more than a collection of writings on issues in medical ethics: it helps the reader to compare different paradigms of accountability and moral reasoning.

Through the simple act of a hair cut, readers are taken on a geographical and emotional journey into the lives of humans experiencing homelessness in different cities across the world. "Coombes is a hairdresser, and he believes that small acts of love can make a big impact." --Morgan Freeman, in *The Story of Us* "Joshua's stories show the power that empathy and compassion have to turn a common, everyday act into something transformative. They are the revelations of connection." --Michael Sheen, actor and activist "A simple, big-hearted, and world-shaking idea." --Nick Cave, singer, songwriter "The most vulnerable among us deserve our empathy, compassion, and advocacy. In leading by example, Joshua Coombes is both thought-provoking and inspiring, making us each ask what more we might do to better see and care for our communities. Joshua's work has always struck a chord with me, and I'm certain this book will strike a chord in the hearts of readers everywhere." --Sophia Bush, actor and activist "Joshua Coombes takes a simple concept--giving free haircuts to homeless people--and turns it into an spiritual parable. Armed with clippers, scissors, dry shampoo, and unpretentious decency, Coombes introduces the reader to those he met living on the streets of America, Australia, India, France, Holland, and his native UK, and in a warm and witty voice transforms his characters from invisible to unforgettable just as he did with the haircuts." -- Danny Goldberg, author of *Serving the Servant: Remembering Kurt Cobain* "Cutting someone's hair is a deeply intimate act, and when done for free, it conveys a profound affirmation of personal value. Do Something for Nothing reclaims the revolutionary power of small acts of human compassion across the boundaries that too often divide us." --Mark Andersen, coauthor of *We Are the Clash: Reagan, Thatcher, and the Last Stand of a Band That Mattered* "Joshua Coombes's work gives us what we so desperately need right now: hope, optimism, kind curiosity, and real human connection. This book will make you want to do something, just because you can." --Emma Gannon, author of *The Multi-Hyphen Life* When you're on the fringes of society, being noticed can mean everything. In 2015, while working at a London hair salon, Joshua Coombes took to the streets with his scissors to build relationships with people sleeping rough in the capital. This inspired him to begin posting transformative images on social media to amplify their voices. These stories resonated and thousands of people got involved in their own way. #DoSomethingForNothing was born--a movement that encourages people to connect their skills and time to those who need it. Via the simple act of a haircut, readers are taken on a geographical and emotional journey into the lives of humans experiencing homelessness in different cities across the world. Featuring never-before-seen photographs and all-new writing, *Do Something for Nothing* explores themes of love, acceptance, shame, and perseverance, while inviting us to see ourselves in one another and dissolve the negative stigmas surrounding homelessness. Additionally, a portion of the proceeds from this book will be donated to organizations dedicated to assisting unsheltered people.

From the New York Times bestselling author of *Evidence of Harm* and *Animal Factory*—a groundbreaking scientific thriller that exposes the dark side of SeaWorld, America's most beloved marine mammal park *Death at SeaWorld* centers on the battle with the multimillion-dollar marine park industry over the controversial and even lethal ramifications of keeping killer whales in captivity. Following the story of marine biologist and animal advocate at the Humane Society of the US, Naomi Rose, Kirby tells the gripping story of the two-decade fight against PR-savvy SeaWorld, which came to a head with the tragic death of trainer Dawn Brancheau in 2010. Kirby puts that horrific animal-on-human attack in context. Brancheau's death was the most publicized among several brutal attacks that have occurred at Sea World and other marine mammal theme parks. *Death at SeaWorld* introduces real people taking part in this debate, from former trainers turned animal rights activists to the men and women that champion SeaWorld and the captivity of whales. In section two the orcas act out. And as the story progresses and orca attacks on trainers become increasingly violent, the warnings of Naomi Rose and other scientists fall on deaf ears, only to be realized with the death of Dawn Brancheau. Finally he covers the media backlash, the eyewitnesses who come forward to challenge SeaWorld's glossy image, and the groundbreaking OSHA case that challenges the very idea of keeping killer whales in captivity and may spell the end of having trainers in the water with the ocean's top predators.

For more than a century, skin lighteners have been a ubiquitous feature of global popular culture—embraced by consumers even as they were fiercely opposed by medical professionals, consumer health advocates, and antiracist thinkers and activists. In *Beneath the Surface*, Lynn M. Thomas constructs a transnational history of skin lighteners in South Africa and beyond. Analyzing a wide range of archival, popular culture, and oral history sources, Thomas traces the changing meanings of skin color from precolonial times to the postcolonial present. From indigenous skin-brightening practices and the rapid spread of lighteners in South African consumer culture during the 1940s and 1950s to the growth of a billion-dollar global lightener industry, Thomas shows how the use of skin lighteners and experiences of skin color have been shaped by slavery, colonialism, and segregation as well as by consumer capitalism, visual media, notions of beauty, and protest politics. In teasing out lighteners' layered history, Thomas theorizes skin as a site for antiracist struggle and lighteners as a technology of visibility that both challenges and entrenches racial and gender hierarchies.
