This collection of eleven essays originally appeared in France thirty years ago and created a literary whirlwind on the Left Bank. Cioran writes incisively about Western civilizations, the writer, the novel, mystics, apostles, and philosophers. *The Temptation to Exist* first introduced this brilliant European thinker twenty years ago to American readers, in a superb translation by Richard Howard. This literary mystique around Cioran continues to grow, and *The Temptation to Exist* has become an underground classic. In this work Cioran writes about Western civilizations, the writer, the novel, about mystics, apostles, philosophers. For those to whom the very word philosophy brings visions of arduous reading, be assured: Cioran is crystal-clear, his style quotable

and aphoristic. “A sort of final philosopher of the Western world. His statements have the compression of poetry and the audacity of cosmic clowning”—*The Washington Post*

Simon and Schuster

E. M. Cioran confronts the place of today's world in the context of human history—focusing on such major issues of the twentieth century as human progress, fanaticism, and science—in this nihilistic and witty collection of aphoristic essays concerning the nature of civilization in mid-twentieth-century Europe. Touching upon Man's need to worship, the feebleness of God, the downfall of the Ancient Greeks and the melancholy baseness of all existence,

Cioran's pieces are pessimistic in the extreme, but also display a beautiful certainty that renders them delicate, vivid, and memorable. Illuminating and brutally honest, *A Short History of Decay* dissects Man's decadence in a remarkable series of moving and beautiful pieces.

It's awkward, stressful, and there's the uncontrollable blushing to worry about. When she boards a plane to fly home after an overseas holiday, she plans to stick her nose in a book and ignore

everyone around her. Aiden's terrified of flying, and it's his first time on a plane. If he can distract himself by talking non-stop for the entire flight, he will. Too bad for Sarah he's sitting right next to her. Against all Sarah's expectations, she ends up enjoying Aiden's company. They laugh, argue, concoct stories about other passengers, and accidentally hold hands during the turbulence. When the time comes to say goodbye, Sarah can't help the crazy thought that she shouldn't let Aiden go. Then he kisses her. And then he's gone. With her world turning upside down in more ways than one, Sarah has to make a decision: stick with the safe, predictable life that's been mapped out for her, or find the courage to go after what she truly wants. - - - Nominated as an InD'tale RONE Award Finalist in 2015,

Acclaimed English translation of poems by one of the most gifted and colourful of Japan's early modern poets: Nakahara Chuya. Now ranked among the finest Japanese verse of the 20th century, influenced by both Symbolism and Dada, he created lyrics renowned for their songlike eloquence, their personal imagery and their poignant charm.

*The Trouble with Hating You* Basic Books  
A fiercely independent engineer walks out on the man her parents have set her up with -- only to start working side-by-side with him at her job in this laugh-out-

loud debut with "delicious banter, deep wounds, heartwarming friendships, and a path to love that often feels impossibly hard, and [a payoff] satisfying enough to give you a book hangover the size of Texas" (Sonali Dev, USA Today bestselling author of *Recipe for Persuasion*). Liya Thakkar is a successful biochemical engineer, takeout enthusiast, and happily single woman. The moment she realizes her parents' latest dinner party is a setup with the man they want her to marry, she's out the back door in a flash. Imagine her surprise when the same guy shows up at her office a week later -- the new lawyer hired to save her struggling company. What's not surprising: he's not too thrilled to see her either after that humiliating fiasco. Jay Shah looks good

on paper...and off. Especially if you like that whole gorgeous, charming lawyer-in-a-good-suit thing. He's also infuriating. As their witty office banter turns into late-night chats, Liya starts to think he might be the one man who truly accepts her. But falling for each other means exposing their painful pasts. Will Liya keep running, or will she finally give love a real chance?

The Feminine Mystique Simon and Schuster

"Concise, clear and convincing. . . a vision for the country as a whole."  
—James Fallows, *The New York Times* Book Review A leading sociologist's brilliant and revelatory argument that the future of politics, work, immigration, and more may be found in California  
Once upon a time, any mention of

California triggered unpleasant reminders of Ronald Reagan and right-wing tax revolts, ballot propositions targeting undocumented immigrants, and racist policing that sparked two of the nation's most devastating riots. In fact, California confronted many of the challenges the rest of the country faces now—decades before the rest of us. Today, California is leading the way on addressing climate change, low-wage work, immigrant integration, overincarceration, and more. As white residents became a minority and job loss drove economic uncertainty, California had its own Trump moment twenty-five years ago, but has become increasingly blue over each of the last seven presidential elections. How did the Golden State manage to emerge from its

unsavory past to become a bellwether for the rest of the country? Thirty years after Mike Davis's hellish depiction of California in *City of Quartz*, the award-winning sociologist Manuel Pastor guides us through a new and improved California, complete with lessons that the nation should heed. Inspiring and expertly researched, *State of Resistance* makes the case for honestly engaging racial anxiety in order to address our true economic and generational challenges, a renewed commitment to public investments, the cultivation of social movements and community organizing, and more.

"We're doomed." So begins the work of the philosopher whose unabashed and

aphoristic indictments of the human condition have been cropping up recently in popular culture. Today we find ourselves in an increasingly inhospitable world that is, at the same time, starkly indifferent to our species-specific hopes, desires, and disappointments. In the Anthropocene, pessimism is felt everywhere but rarely given its proper place. Though pessimism may be, as Eugene Thacker says, the lowest form of philosophy, it may also contain an enigma central to understanding the horizon of the human. Written in a series of fragments, aphorisms, and prose poems, Thacker's *Cosmic Pessimism* explores the varieties of pessimism and its often-conflicted relation to philosophy. "Crying, laughing, sleeping—what other responses are

adequate to a life that is so indifferent?"

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of

structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Ilina Zarifopol-Johnston's critical biography of the Romanian-born French philosopher E. M. Cioran focuses on his crucial formative years as a mystical revolutionary attracted to right-wing nationalist politics in interwar Romania, his writings of this period, and his self-imposed exile to France in 1937. This move led to his transformation into one of the most famous French moralists of the 20th century. As an enthusiast of the anti-rationalist philosophies widely popular in Europe during the first decades of the 20th century, Cioran became an advocate of the fascistic Iron Guard. In her quest to understand how Cioran and other brilliant young intellectuals could have been attracted to such passionate national revival movements, Zarifopol-Johnston, herself a

Romanian emigrant, sought out the aging philosopher in Paris in the early 1990s and retraced his steps from his home village of Rasinari and youthful years in Sibiu, through his student years in Bucharest and Berlin, to his early residence in France. Her portrait of Cioran is complemented by an engaging autobiographical account of her rediscovery of her own Romanian past.

"I loved this book. It's one of those books that you just want to give to everybody."  
—Nancy Pearl on NPR's Morning Edition  
"An astute, engaging debut" (Publishers Weekly), *The Trouble with Goats and Sheep* is a quirky and utterly charming tale of a community in need of reconciliation and two girls learning what

it means to belong. England, 1976. Mrs. Creasy is missing and the Avenue is alive with whispers. The neighbors blame her sudden disappearance on the heat wave, but ten-year-olds Grace and Tilly aren't convinced, and decide to take matters into their own hands. Spunky, spirited Grace and quiet, thoughtful Tilly go door to door in search of clues. The cul-de-sac starts to give up its secrets, and the amateur detectives uncover more than they ever imagined. A complicated history of deception begins to emerge—everyone on the Avenue has something to hide. During that sweltering summer, the lives of all the neighbors begin to unravel. The girls come to realize that the lies told to conceal what happened one fateful day about a decade ago are the same ones

Mrs. Creasy was starting to peel back just before she disappeared... “A thoughtful tale of loyalty and friendship, family dynamics and human nature” (Kirkus Reviews), this glorious debut is part coming-of-age story, part mystery. *The Trouble with Goats and Sheep* radiates an unmistakable warmth and intelligence and is “rife with tiny extraordinaries” (The New York Times Book Review). “Joanna Cannon is an author to watch” (Booklist, starred review).

*Better Never to Have Been* Beacon Press  
A critique of the American obsession with diversity argues that we are ignoring the ever-widening economic divide in American society, that diversity has created a false notion of social justice, and that we need to emphasize

equality over diversity.

From the bestselling author of *The Bomber Mafia*, learn what sets high achievers apart—from Bill Gates to the Beatles—in this seminal work from "a singular talent" (New York Times Book Review). In this stunning book, Malcolm Gladwell takes us on an intellectual journey through the world of "outliers"—the best and the brightest, the most famous and the most successful. He asks the question: what makes high-achievers different? His answer is that we pay too much attention to what successful people are like, and too little attention to where they are from: that is, their culture, their family, their generation, and the

idiosyncratic experiences of their upbringing. Along the way he explains the secrets of software billionaires, what it takes to be a great soccer player, why Asians are good at math, and what made the Beatles the greatest rock band. Brilliant and entertaining, *Outliers* is a landmark work that will simultaneously delight and illuminate.

*The Trouble with Diversity* University of Alabama Press

The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this “vital, necessary, and beautiful book” (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white

fragility and “allows us to understand racism as a practice not restricted to ‘bad people’ (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

### **STATE OF RESISTANCE**

Little, Brown

How the obsession with quantifying

human performance threatens business, medicine, education, government—and the quality of our lives Today, organizations of all kinds are ruled by the belief that the path to success is quantifying human performance, publicizing the results, and dividing up the rewards based on the numbers. But in our zeal to instill the evaluation process with scientific rigor, we've gone from measuring performance to fixating on measuring itself—and this tyranny of metrics now threatens the quality of our organizations and lives. In this brief, accessible, and powerful book, Jerry Muller uncovers the damage metrics are causing and shows how we can begin to fix the problem. Filled with examples from business, medicine, education, government, and other fields, the book

explains why paying for measured performance doesn't work, why surgical scorecards may increase deaths, and much more. But Muller also shows that, when used as a complement to judgment based on personal experience, metrics can be beneficial, and he includes an invaluable checklist of when and how to use them. The result is an essential corrective to a harmful trend that increasingly affects us all.
