This book focuses on the inter-relationship between reading, writing and speaking and listening. Psychologists and educationalists, influenced by the work of Vygotsky, have emphasised the importance of social interaction in learning, and the National Writing, Oracy and LINC Projects highlighted the need for quality interactive pupil discourse and

effective teacher-pupil interaction. However, although the DfEE claims that the successful teaching of literacy is characterised by good quality oral work, speaking and listening is not included in the National Literacy Strategy Framework and the Literacy Training Pack does not address the issue. Literacy and Learning through Talk blends theory, research and practice to show how an integrated programme of work can be developed to ensure that literacy is taught in a vibrant and stimulating way. Strategies for developing successful group work and whole class, interactive discourse are examined and effective teaching roles and questioning techniques are explored. Transcripts of group discussions and examples of children's work illustrate various points and work plans and practical classroom activities are described.

The 3rd Edition of Literacy & Learning in the Content Areas helps readers build the knowledge, motivation, tools, and confidence they need as they integrate literacy into their middle and high school content area classrooms. Its unique approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing and the very activities that they will use to teach

literacy to their own students in middle and high school classrooms. Rather than passively learning about strategies for incorporating content area literacy activities, readers get hands-on experience in such techniques as mapping/webbing, anticipation guides, booktalks, class websites, and journal writing and reflection. Readers also learn how to integrate children's and young adult literature, primary sources, biographies, essays, poetry, and online content, communities, and websites into their classrooms. Each chapter offers concrete teaching examples and practical suggestions to help make literacy relevant to students' content area learning. Author Sharon Kane demonstrates how relevant reading, writing, speaking, listening, and visual learning activities can improve learning in content area subjects and at the same time help readers meet national content knowledge standards and benchmarks.
