The authors want  
students to understand  
how and why policy  
analysis is used to  
assess policy  
alternatives--not only  
to question the  
assumptions of policy  
analysts, but to  
recognize how analysis  
is used in support of  
political arguments. To  
encourage critical and

creative thinking on  
issues ranging from the  
federal deficit to the  
Affordable Care Act to  
gun control, the  
authors introduce and  
fully integrate an  
evaluative approach to  
policy. Public Policy  
begins with a concise  
review of institutions,  
policy actors, and  
major theoretical  
models. The authors  
then discuss the nature  
of policy analysis and  
its practice, and show  
students how to  
employ evaluative  
criteria in six  
substantive policy

areas. Public Policy arms students with analytic tools they need to understand that the motivations of policy actors--both within and outside of government--influence a complex, yet comprehensible, policy agenda.

The Model Rules of  
Professional Conduct  
provides an up-to-date  
resource for  
information on legal  
ethics. Federal, state  
and local courts in all  
jurisdictions look to the

Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

In *Red Dynamite*, Carl R. Weinberg argues that creationism's tenacious hold on American public life depended on culture-war politics inextricably embedded in religion. Many Christian conservatives were convinced that evolutionary thought promoted immoral and even bestial social, sexual, and political behavior. The "fruits" of subscribing to Darwinism were, in their minds, a dangerous rearrangement of God-given standards and the unsettling of traditional hierarchies of power. Despite claiming to focus exclusively on science and religion, creationists were practicing politics. Their anticommunist campaign, often

infused with conspiracy theory, gained power from the fact that the Marxist founders, the early Bolshevik leaders, and their American allies were staunch evolutionists. Using the Scopes "Monkey" Trial as a starting point, *Red Dynamite* traces the politically explosive union of Darwinism and communism over the next century. Across those years, social evolution was the primary target of creationists, and their "ideas have consequences" strategy instilled fear that shaped the contours of America's culture wars. By taking the anticommunist arguments of creationists seriously, Weinberg reveals a neglected dimension of antievolutionism and

illuminates a source of the creationist movement's continuing strength. America's model of representational government rests on the premise that elected officials respond to the opinions of citizens. This is a

myth, however, not a reality, according to James N. Druckman and Lawrence R. Jacobs. In *Who Governs?*, Druckman and Jacobs combine existing research with novel data from US presidential archives to show that presidents make policy by largely ignoring the views of most citizens in favor of affluent and well-connected political insiders. Presidents treat the public as pliable, priming it to focus on personality traits and often ignoring it on policies that fail to become salient. Melding big debates about democratic theory with existing research on American politics and innovative use of the archives of three modern presidents—Johnson,

Nixon, and Reagan—Druckman and Jacobs deploy lively and insightful analysis to show that the conventional model of representative democracy bears little resemblance to the actual practice of American politics. The authors conclude by arguing that polyarchy and the promotion of accelerated citizen mobilization and elite competition can improve democratic responsiveness. An incisive study of American politics and the flaws of representative government, this book will be warmly welcomed by readers interested in US politics, public opinion, democratic theory, and the fecklessness of American leadership and decision-making.

## and the Making of an American Religion

This book dissects the causes and consequences of state licensing of businesses, services and occupations in the USA. Licensure is the granting of a permit from an authority to own or use something, to provide a particular service, or to carry out a trade. By and large, states rule industry licensing. Yet state differences in licensing requirements are far from idiosyncratic. In short, there is a political side to state licensing that has largely gone uncharted. This book rectifies this omission. Adopting a multidisciplinary approach, it illuminates the significance of politics to the study of state licensing by

establishing the relevance of legislator motives and preferences.

Presenting economic and political data for US states, including extensive data on campaign contributions, lobbying, and state licensing statutes, it demonstrates that state licensing requirements are driven by political motivations rather than protecting the public interest. It will appeal to scholars and students of public policy, public administrators, industry lobbyists, economists and political scientists who are interested in understanding the motivations behind regulations.

## **JURIX 2013: THE TWENTY-SIXTH ANNUAL CONFERENCE**

Palgrave Macmillan  
In Faith in Freedom,  
Andrew R. Polk argues  
that the American civil  
religion so many have  
identified as  
indigenous to the  
founding ideology was,  
in fact, the result of a  
strategic campaign of  
religious propaganda.  
Far from being the  
natural result of the  
nation's religious  
underpinning or the  
later spiritual  
machinations of  
conservative  
Protestants, American  
civil religion and the  
resultant "Christian  
nationalism" of today  
were crafted by secular  
elites in the middle of  
the twentieth century.  
Polk's genealogy of the  
national motto, "In God

We Trust," revises the  
very meaning of the  
contemporary  
American nation. Polk  
shows how Presidents  
Franklin D. Roosevelt,  
Harry S Truman, and  
Dwight D. Eisenhower,  
working with  
politicians, advertising  
executives, and  
military public relations  
experts, exploited  
denominational  
religious affiliations  
and beliefs in order to  
unite Americans during  
the Second World War  
and, then, the early  
Cold War. Armed  
opposition to the  
Soviet Union was  
coupled with militant  
support for free  
economic markets,  
local control of  
education and housing,  
and liberties of speech  
and worship. These  
preferences were  
cultivated by state  
actors so as to support

a set of right-wing positions including anti-communism, the Jim Crow status quo, and limited taxation and regulation. Faith in Freedom is a pioneering work of American religious history. By assessing the ideas, policies, and actions of three US Presidents and their White House staff, Polk sheds light on the origins of the ideological, religious, and partisan divides that describe the American polity today.

America's Latina/o

population has now reached over 50 million, or 15% of the estimated total U.S. population of 300 million, and a growing portion of the world's population now lives and works in cities that are increasingly diverse. Latino Urbanism provides the first national perspective on Latina/o urban policy, addressing a wide range of planning policy issues that impact both Latinas/os in the US, as well as the nation as a whole, tracing how cities develop, function, and are affected by socio-economic change. . The three sections of the book address the politics of planning and its historic relationship with Latinas/os, the relationship between the Latina/o

community and conventional urban planning issues and challenges, and the future of urban policy and Latina/o barrios. Moving beyond a traditional analysis of Latinas/os in the Southwest, the volume expands the understanding of the important relationships between urbanization and Latinas/os including Mexican Americans of several generations within the context of the restructuring of cities, in view of the cultural and political transformation currently encompassing the nation.

The JURIX Foundation has been organizing annual international conferences in the area of computer science and law since 1988, and continues to support cutting-edge research and applications at the interface between law and computer technology. This book contains the 16 full papers and 6 short papers presented at the 26th International Conference on Legal Knowledge and Information Systems (JURIX 2013), held in December 2013 in Bologna, Italy. The papers cover a wide range of research topics and application areas concerning the advanced

management of legal information and knowledge, including computational techniques for: classifying and extracting information from, and detecting conflicts in, regulatory texts; modeling legal argumentation and representing case narratives; improving the retrieval of legal information and extracting information from legal case texts; conducting e-discovery; and, applications involving intellectual property and IP licensing, online dispute resolution, delivering legal aid to the public and organizing the administration of local law and regulations. The book will be of interest to all those associated with the legal profession whose

work involves the use of computer technology.

The development of the Cultivation System from the years 1840 to 1860 is the focus of this work by the Dutch scholar Cornelis Fasseur. The author presents a general overview of Dutch policy and decision-making, and considers how these policies influenced the evolution of the Cultivation System and how the system itself altered Dutch views of governance in Java.

COVID-19 is the most significant global crisis of any of our lifetimes. The numbers have been stupefying, whether of infection and mortality, the scale of public health measures, or the economic consequences of shutdown. Coronavirus Politics identifies key threads in the global comparative discussion that continue to shed light on COVID-19 and

shape debates about what it means for scholarship in health and comparative politics. Editors Scott L. Greer, Elizabeth J. King, Elize Massard da Fonseca, and André Peralta-Santos bring together over 30 authors versed in politics and the health issues in order to understand the health policy decisions, the public health interventions, the social policy decisions, their interactions, and the reasons. The book's coverage is global, with a wide range of key and exemplary countries, and contains a mixture of comparative, thematic, and templated country studies. All go beyond reporting and monitoring to develop explanations that draw

on the authors' expertise while engaging in structured conversations across the book.

### **The Report**

After 1815 the usual form became a number of chapters on Britain, paying particular attention to the proceedings of Parliament, followed by chapters covering other countries in turn, no longer limited to Europe. The expansion of the History came at the expense of the sketches, reviews and other essays so that the nineteenth-century publication ceased to have the miscellaneous character of its eighteenth-century forebear, although poems continued to be included until 1862, and a small number of official papers and other important texts

continue to be reproduced to this day. Includes a long historical essay on the "History of the Present War" (the Seven Years' War 1756-63). In his preface to the 1758 volume Burke noted the difficulties he had faced in writing the history section of the book. Taking the "broken and unconnected materials" and creating from them "one connected narrative" had been, he commented, "a work of more labour than may at first appear." The 1758 volume is considered a unique, contemporaneous account of the Seven Years' War, analyzing its origins and development with a perspective not readily available at the time in newspapers or

magazines.
