The prequel to David Downing's bestselling Station series introduces John Russell, an Englishman with a political past who must keep his head down as the Nazis solidify their power. February 27, 1933. In this stunning prequel to the John Russell espionage novels, the Reichstag parliament building in Berlin is set ablaze. It's just a month after Hitler's inauguration as Chancellor of Germany, and the Nazis use the torching to justify a campaign of terror against their political opponents. John Russell's recent separation from his wife threatens his right to reside in Germany and any meaningful relationship with his six-year-old son, Paul. He has just secured work as a crime reporter for a Berlin newspaper, and the crimes which he has to report—the gruesome murder of a rent boy,

the hit-and-run death of a professional genealogist, the suspicious disappearance of a Nazi-supporting celebrity fortune-teller—are increasingly entangled in the wider nightmare engulfing Germany. Each new investigation carries the risk of Russell's falling foul of the authorities, at a time when the rule of law has completely vanished, and the Nazis are running scores of pop-up detention centers, complete with torture chambers, in every corner of Berlin.

Oxford University Press

The New York Times bestselling author of the brilliantly inventive *The Word Is Murder* and *The Sentence Is Death* returns with his third literary whodunit featuring intrepid detectives Hawthorne and Horowitz. When Ex-Detective Inspector Daniel Hawthorne and his sidekick, author Anthony Horowitz, are invited to an exclusive literary festival on Alderney, an idyllic island off the south coast of England, they don't expect to find themselves in the middle of murder investigation—or to be trapped with a cold-blooded killer in a remote place with a murky, haunted past. Arriving on Alderney, Hawthorne and Horowitz soon meet the festival's other guests—an eccentric gathering that includes a bestselling children's author, a French poet, a TV chef turned cookbook author, a blind psychic, and a war historian—along with a group of ornery locals embroiled in an escalating feud over a disruptive power line. When a local grandee is found dead under mysterious circumstances, Hawthorne and Horowitz become embroiled in the case. The island is locked down, no one is allowed on or off, and it soon becomes horribly clear that a murderer lurks in their midst. But who? Both a brilliant satire on the world of books and writers and an immensely enjoyable locked-room mystery, *A Line to Kill* is a triumph—a riddle of a story full of brilliant misdirection, beautifully set-out clues, and diabolically clever denouements.

#### Time Enough for Love Blackstone's Police Manuals

The rousing story of the last gasp of human agency and how today's best and brightest minds are endeavoring to put an end to it. It used to be that to diagnose an illness, interpret legal documents, analyze foreign policy, or write a newspaper article you needed a human being with specific skills—and maybe an advanced degree or two. These days, high-level tasks are increasingly being handled by algorithms that can do precise work not only with speed but also with nuance. These “bots” started with human programming and logic, but now their reach extends beyond what their creators ever expected. In this fascinating, frightening book, Christopher Steiner tells the story of how algorithms took over—and shows why the “bot revolution” is about to spill into every aspect of our lives, often silently, without our knowledge. The May 2010 “Flash Crash” exposed Wall Street's reliance on trading bots to the tune of a 998-point market drop and \$1 trillion in vanished market value. But that was just the beginning. In Automate This, we meet bots that are driving cars, penning haiku, and writing music mistaken for Bach's. They listen in on our customer service calls and figure out what Iran would do in the event of a nuclear standoff. There are algorithms that can pick out the most cohesive crew of astronauts for a space mission or identify the next Jeremy Lin. Some can even ingest statistics from baseball games and spit out pitch-perfect sports journalism indistinguishable from that produced by humans. The interaction of man and machine can make our lives easier. But what will the world look like when algorithms control our hospitals, our roads, our culture, and our national security? What happens to businesses when we automate judgment and eliminate human instinct? And what role will be left for doctors, lawyers, writers, truck drivers, and many others? Who knows—maybe there's a bot learning to do your job this minute.

#### Commentaries on the Laws of England Penguin

From public health luminary Nancy Krieger comes a revolutionary way of addressing health justice and the embodied truths of lived experience. Since the 1700s, fierce debates in medicine and public health have centered around whether sources of ill health can be attributed to either the individual or the surrounding body politic. But what if instead health researchers measure—and policies address—how people biologically embody their societal and ecological context? Ecosocial Theory, Embodied Truths, and the People's Health represents a daring new foray into analyzing how population patterns of health reveal the intersections of lived experience and biology in historical context. Expanding on Nancy Krieger's original ecosocial theory of disease distribution, this volume lays new theoretical groundwork about embodiment and health justice through concrete and novel examples involving pathways such as workplace discrimination, relationship abuse, Jim Crow, police violence, pesticides, fracking, green space, and climate change. It offers a crucial counterargument to dominant biomedical and public health narratives attributing causality to either innate biology or decontextualized health behaviors and provides a key step forward towards understanding and addressing the structural drivers of health inequities and health justice. Bridging insights from politics, history, sociology, ecology, biology, and public health, Ecosocial Theory, Embodied Truths, and the People's Health presents a bold new framework to transform biomedical and population health thinking, practice, and policies and to advance health equity across a deeply threatened planet.
