Now in paperback from Annabel Karmel, the acclaimed bestselling author and leading authority on feeding children, comes an outstanding guide to planning nutritious meals for your whole family. Do you find you are serving the same old meals week in, week out? Do you catch yourself staring at the contents of your

fridge hoping for inspiration? Do you long for some original ideas to help you cook quick, healthy and tasty meals for the whole family? If so, help is at the hand from bestselling author and leading authority on feeding children, Annabel Karmel. *Favorite Family Meals* is packed with more than 150 delicious, easy-to-prepare recipes that will appeal to the whole family, including brain-boosting breakfasts; “healthy junk food” like burgers, pizzas, and chicken nuggets; wholesome muffins; fabulous desserts; fish dishes that will tempt even the most finicky eaters; and dishes that children will enjoy preparing themselves (like animal-shaped cheese bread). Every recipe has been taste-tested by a panel of children, because it’s not enough to prepare healthy foods for kids—they

have to want to eat them, too. Filled with dozens of essential time-saving tips for shopping, stocking, freezing, and planning ahead, four weekly menu plans, lunch box suggestions, ideas for spectacular party foods and sensible snacks, and inspiring color photographs, busy parents will wonder how they ever managed without *Favorite Family Meals*. Smith & Deli-cious Simon and Schuster The Brooklyn destination the New York Times called “one of the most extraordinary restaurants in the country”—which began as a pizza place and quickly redefined the urban food landscape—releases its highly anticipated debut cookbook. When Roberta’s opened in 2008 in a concrete bunker in Bushwick, it was a pizzeria where you could stop in for dinner and

stumble out hours later, happy. It's still a down-the-rabbit-hole kind of place but has also become a destination for groundbreaking food, a wholly original dining experience, and a rooftop garden that marked the beginning of the urban farming movement in New York City. The forces behind Roberta's—chef Carlo Mirarchi and co-owners Brandon Hoy and Chris Parachini—share recipes, photographs, and stories meant to capture the experience of Roberta's for those who haven't been, and to immortalize it for those who've been there since the beginning.

UnSelling is about everything but the sell. We put all of our focus on the individual purchase transaction, while putting the rest of our business actions

second. We've become blind to customer service, support, branding, experiences and even product quality. Sixty percent of a purchasing decision is made before a customer even contacts you. We have funnel vision, and it needs to stop.

Unselling is about the big picture: creating repeat customers, not one-time buyers. Create loyal clients that refer others, not faceless numbers. Becoming the go-to company for something, before they even need you. You don't need social media, but you can be connecting with your clients socially. Your video doesn't have to be viral in front of a million people, just contagious in front of your specific market. Content, connection, engagement. It's time to separate from the pack of noise. It's time to UnSell.

The A.O.C. Cookbook Springer Nature

High stakes tests are the gatekeepers to many educational and professional goals. As such, the incentive to cheat is high. This Handbook is the first to offer insights from experts within the testing community, psychometricians, and policymakers to identify and develop best practice guidelines for the design of test security systems for a variety of testing genres. Until now this information was scattered and often resided inside testing companies. As a result, rather than being able to learn from each other's experiences, each testing entity was left to re-create their own test security wheel. As a whole the book provides invaluable insight into the prevalence of cheating and "best practices" for designing security plans, training personnel, and detecting and

investigating misconduct, to help develop more secure testing systems and reduce the likelihood of future security breaches. Actual case studies from a variety of settings bring to life how security systems really work. Examples from both domestic and international programs are provided. Highlights of coverage include:

- Best practices for designing secure tests
- Analysis of security vulnerabilities for all genres of testing
- Practical cheating prevention and detection strategies
- Lessons learned in actual security violations in high profile testing programs.

Part I focuses on how tests are delivered for paper-and-pencil, technology-based, and classroom testing and writing assessment. Each chapter addresses the prevalence of the problem

and threats to security, prevention, and detection. Part II addresses issues essential to maintaining a secure testing program such as planning and monitoring, physical security, the detection of group-based cheating, investigating misconduct, and communicating about security-related issues. Part III examines actual examples of cheating-- how the cheating was done, how it was detected, and the lessons learned. Part III provides insight into security issues within each of the Association of Test Publishers' four divisions: certification/licensure, clinical, educational, and industrial/organizational testing. Part III's conclusion revisits the issues addressed in the case studies and identifies common themes. Intended for

organizations, professionals, educators, policy makers, researchers, and advanced students that design, develop, or use high stakes tests, this book is also ideal for graduate level courses on test development, educational measurement, or educational policy.

Intimate, delicate prose is interwoven with recipes in this lavishly photographed cookbook. Slater offers more than 300 delectable dishes--both sweet and savory--such as Apricot and Pistachio Crumble, Baked Rhubarb with Blueberries, and Crisp Pork Belly with Sweet Peach Salsa. On a quiet cobblestoned side street north of Les Halles in Paris, a veritable food revolution is happening thanks to chef Greg Marchand's game-changing restaurant, Frenchie. Here are some of his most inspired and deeply original recipes, dishes that are radiant not just in color but in flavor, and filled with alluring hints of international influences. Chutneys, pestos, and flavored vinaigrettes take the place of heavier and more traditional French fare, and the juxtaposition of ingredients

(watermelon with ricotta salata; roasted carrots with oranges and avocado; raw baby turnips and juicy pears) adds energy to a once hidebound bistro tradition. To the question “Is there anything new under the sun?” Frenchie answers, unequivocally, “Yes!”

This book documents the state of the art in the field of ambient assisted living (AAL), highlighting the impressive potential of novel methodologies and technologies to enhance well-being and promote active ageing. sensing technologies for AAL, and smart housing. The book comprises a selection of the best papers presented at the 7th Italian Forum on Ambient Assisted Living (ForitAAL 2016), which was held in Pisa, Italy, in June 2016 and brought together end users, technology teams, and policy makers to develop a consensus on how to improve provision for elderly and impaired people. Affectionately known as 'Koss', Paul Kossoff's playing touched people. It still does today, more than forty years after his sad and untimely death at the age of twenty-five. This authorised biography pays fitting tribute to a much-loved and widely admired musician whose influence and inspiration is still very evident. It's all here: Kossoff's musical childhood, his formative years with Black Cat Bones, forming Free at seventeen, that group's dizzying success, breakup, reforming and dissolution, the solo years, Back Street Crawler - the sessions, the tours and big concerts, the triumphs, the tragedies and the heartbreak - J.P. James takes the reader right there. Over four distinct sections, Kossoff's many guitars and the equipment he used to make them sing

are fully documented; a brand-new detailed analysis of Kossoff's distinctive playing style and technique is presented for the first time; a broad overview of Kossoff's creative life draws on the voices of family, friends and fellow musicians; and finally, Kossoff's musical influences, approach to playing and his wider musical interests, hopes and dreams are explored - all drawn from his own words. Cramming so much into his short years, Paul Kossoff left a rich musical legacy, and he is indeed All Right Now. Thoroughly researched and sensitively written, given often in Kossoff's own words and packed with anecdotes from those who were there, musicians and fans alike will enjoy this authoritative and comprehensive biography.

Spreadsheets in Structural Design provides a unique and highly practical explanation of the use of spreadsheets to facilitate the design of structures in a range of key materials, such as concrete, steel and brick. Using spreadsheets in this way has important implications in terms of cost and efficiency, and represents a very useful tool hitherto largely neglected by the design community. Each chapter contains spreadsheet layouts to illustrate the method, drawn from different areas of design and using a range of materials and Codes of Practice. Examples used relate to reinforced concrete, reinforced masonry and steel but the approach is easily extended to other materials and other fields of design. Practising

structural engineers, civil engineers and architects will find this book an invaluable guide for the solution of routine design problems. It is also useful reading for advanced undergraduate and postgraduate students of structural design, civil engineering and architecture.
