AND WHY YOU DESERVE BETTER THAN THIS

Rowman & Littlefield

Named one of the best nonfiction books of the year by The Washington Post "Tangled Up in Blue is a wonderfully insightful book that provides a lens to critically analyze urban policing and a road map for how our most dispossessed citizens may better relate to those sworn to protect and serve."

—The Washington Post "Remarkable . . . Brooks has produced an engaging page-turner that also outlines many broadly applicable lessons and sensible policy reforms." —Foreign Affairs Journalist and law professor Rosa Brooks goes beyond the "blue wall of silence" in this radical inside examination of American policing In her forties, with two children, a spouse, a dog, a mortgage, and a full-time job as a tenured law professor at Georgetown University, Rosa Brooks decided to become a cop. A liberal academic and journalist with an enduring interest in law's troubled relationship with violence, Brooks wanted the kind of insider experience that would help her understand how police officers make sense of their world—and whether that world can be changed. In 2015, against the advice of everyone she knew, she applied to become a sworn, armed reserve police officer with the Washington, DC, Metropolitan Police Department. Then as now, police violence was constantly in the news. The Black Lives Matter movement was gaining momentum, protests wracked America's cities, and each day brought more stories of cruel, corrupt cops, police violence, and the racial disparities that mar our criminal justice system. Lines were being drawn, and people were taking sides. But as Brooks made her way through the police academy and began work as a patrol officer in the poorest, most crime-ridden neighborhoods of the nation's capital, she found a reality far more complex than the headlines suggested. In Tangled Up in Blue, Brooks recounts her experiences inside the usually closed world of policing. From street shootings and domestic violence calls to the behind-the-scenes police work during Donald Trump's 2016 presidential inauguration, Brooks presents a revelatory account of what it's like inside the "blue wall of silence." She issues an urgent call for new laws and institutions, and argues that in a nation increasingly divided by race, class, ethnicity, geography, and ideology, a truly transformative approach to policing requires us to move beyond sound bites, slogans, and stereotypes. An explosive and groundbreaking investigation, Tangled Up in Blue complicates matters rather than simplifies them, and gives pause both to those who think police can do no wrong—and those who think they can do no right.

In recent years, scholars have noted the rise of a particular type of authoritarianism worldwide, in which rulers manipulate institutions designed to implement the rule of law so that they instead facilitate the exercise of arbitrary power. Even as scholars puzzle over this seemingly new phenomenon, scholarship on African politics offers helpful answers. This book places literature on the post-colonial African state in conversation with literature on modern authoritarianism, using this to frame over ten months of qualitative field research on Uganda's informal security actors - including vigilante groups, local militias, and community police. Based on this research, the book presents an original framework - called 'institutionalized arbitrariness' - to explain how modern authoritarian rulers project arbitrary power even in environments of relatively functional state institutions, checks and balances and the rule of law. In regimes characterized by institutionalized arbitrariness, the state's stochastic assertions and withdrawals of power inject unpredictability into the political relationship between both local authorities and citizens. This arrangement makes it difficult for citizens to predict which authority, if any, will claim jurisdiction in a given scenario, and what rules will apply. This environment of pervasive political unpredictability limits space for collective action and political claim-making, while keeping citizens marginally engaged in the democratic process. The book is grounded in empirical research and literature theorizing the African state, while seeking to inform a broader debate about contemporary forms of authoritarianism, state-building, and state consolidation. Oxford Studies in African Politics and International Relations is a series for scholars and students working on African politics and International Relations and related disciplines. Volumes concentrate on contemporary developments in African political science, political economy, and International Relations, such as electoral politics, democratization, decentralization, gender and political representation, the political impact of natural resources, the dynamics and consequences of conflict, comparative political thought, and the nature of the continent's engagement with the East and West. Comparative and mixed methods work is particularly encouraged, as is interdisciplinary research and work that considers ethical issues relating to the study of Africa. Case studies are welcomed but should demonstrate the broader theoretical and empirical implications of the study and its wider relevance to contemporary debates. The focus of the series is on sub-Saharan Africa, although proposals that explain how the region

engages with North Africa and other parts of the world are of interest. Series Editors: Nic Cheeseman, Professor of Democracy and International Development, University of Birmingham; Peace Medie, Senior Lecturer in Gender and International Politics, University of Bristol; and Ricardo Soares de Oliveira, Professor of the International Politics of Africa, University of Oxford. This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. Love them or hate them, the tweets of President Donald J. Trump rule the Twittersverse. Until our last presidential campaign, television, particularly campaign ads, dominated the political landscape. But with the rise of Donald J. Trump came a new political tool: the internet. Trump used this to communicate instantly and very effectively with the American people. And it worked. Establishing his political positions by tweeting numerous times a day, Trump pulled a major upset by defeating Hillary Rodham Clinton to become the 45th president of the United States. Once in office, Trump did not abandon his penchant for using Twitter as his populist platform. Instead, he doubled down on it, making it his primary means of communicating with the American people. Knowing how effective a tweet can be, Trump once wrote, "Boom. I press it and within two seconds we have breaking news." With a massive Twitter following of 78 million by the spring of 2020, Trump's direct impact upon Americans cannot be dismissed, nor can the value of his tweets as an essential part of the historical record be denied. To put the enormous impact of his tweets into perspective, Trump won the White House with 63 million votes—a number significantly lower than his massive Twitter following. Now you can read the collected tweets of wisdom—or ridiculousness—from President Donald J. Trump, from his inauguration through February 2020 in this historically significant collection.

This book analyses police corruption across four country case studies, exploring how the problem manifests in each country and how it can be reduced. The problem of police corruption ranges from having to pay a bribe to a traffic cop to avoid a speeding fine, right up to more serious forms, such as collusion with organised crime groups and terrorists. The issue therefore constitutes a significant security threat and a human rights issue, but it is often difficult to understand the extent of the problem, and how it varies across contexts. This book analyses the corruption situation in Bulgaria, Germany, Russia and Singapore, identifies similarities and differences across them, and analyses the various means of addressing the problem: punitive, incentivising, technological, administrative and imaging, and the role of civil society. Drawing on existing literature and research, the book also makes extensive use of local sources and original survey data across the four countries. As comparative literature on police corruption remains rare, this book's survey of the situation in two developed states and two post-communist transition states will be of considerable interest to students and researchers across corruption studies, criminology, police studies and security studies, as well as practitioners working in anti-corruption and law enforcement agencies.

From the bottom to the top of our economy, capitalism is too blunt an instrument to tackle Britain's epidemic of inequality. Soaring rents, unfair taxation and a growing gig economy have brought about unprecedented economic shame: Amazon warehouse workers living in tents, nurses turning to foodbanks, London firemen commuting hundreds of miles to work. Even those higher up the ladder are losing their grip on the life they were promised. Barristers take home less than the minimum wage and doctors are starting out with £100,000 student debts on salaries lower than the national average. We're all facing a new economic phenomenon - in-work poverty. At the same time a generation of young professionals is coming to terms with never being able to own even the cheapest home in their area. A high school honors student with no police record encounters the police outside his home. He emerges from the confrontation bruised and beaten. The police charge him with serious crimes; he swears he did nothing wrong. When the story becomes public, an American city faces protests, deep division and a long quest for justice. "City Divided" tells the story of the case involving 18-year-old Jordan Miles and three Pittsburgh Police officers. The book takes an in-depth look at the opposing stories, and at race and the fear it incites, to find answers. What happened between the police and the teen, and what went wrong? Can the courts respond with a just solution? And how can we prevent these tragedies in the future?

This book is the first volume to explore criminal justice work and criminological research through the lens of emotional labour. A concept first coined 30 years ago, emotional labour seeks to explore the ways in which people manage their emotions in order to achieve the aims of their organisations, and the subsequent impact of this is on workers and service users. The chapters in this edited collection explore work in a wide range of criminal justice institutions as well as the penal voluntary sector. In addition to literature review chapters which consolidate what we already know, this book includes case study chapters which extend our knowledge of how emotional labour is performed in specific contexts, and in relation to certain types of work. *Emotional Labour in Criminal Justice and Criminology* covers topics such as prisoners who die from natural causes in prison, to the work of independent domestic violence advisors and the use of emotion by death penalty lawyers in the US. An accessible and compelling read, this book presents ground-breaking qualitative and quantitative research which will be critical to criminologists, criminal justice practitioners, students of criminology and academics in the fields of social policy and public service.

Doing Gender and Policing in a Gendered Organization Penguin

Bearing Witness While Black tells the story of this century's most powerful Black social movement through the eyes of 15 activists who documented it. At the height of the Black Lives Matter uprisings, African Americans filmed and tweeted evidence of fatal police encounters in dozens of US cities—using little more than the device in their pockets. Their urgent dispatches from the frontlines spurred a global debate on excessive police force, which claimed the lives of African American men, women, and children at disproportionate rates. This groundbreaking book reveals how the perfect storm of smartphones, social media, and social justice empowered Black activists to create their own news outlets, which continued a centuries-long, African American tradition of using the news to challenge racism. *Bearing Witness While Black* is the first book of its kind to identify three overlapping eras of domestic terror against African American people—slavery, lynching, and police brutality—and explain how storytellers during each period documented its atrocities through journalism. What results is a stunning genealogy—of how the slave narratives of the 1700s inspired the Abolitionist movement; how the black newspapers of the 1800s galvanized the anti-lynching and Civil Rights movements; and how the smartphones of today have powered the anti-police brutality movement. This lineage of black witnessing, Allissa V. Richardson argues, is formidable and forever evolving. Richardson's own activism, as an award-winning pioneer of smartphone journalism, informs this text. Weaving in personal accounts of her teaching in the US and Africa, and of her own brushes with police brutality, Richardson shares how she has inspired black youth to use mobile devices, to speak up from the margins. It is from this vantage point, as participant-observer, that she urges us not to become numb to the tragic imagery that African Americans have documented. Instead, *Bearing Witness While Black* conveys a crucial need to protect our right to look into the forbidden space of violence against black bodies, and to continue to regard the smartphone as an instrument of moral suasion and social change.

In Policing China, Suzanne E. Scoggins delves into the paradox of China's self-projection of a strong security state while having a weak police bureaucracy. Assessing the problems of resources, enforcement, and oversight that beset the police, outside of cracking down on political protests, Scoggins finds that the central government and the Ministry of Public Security have prioritized "stability maintenance" (weiwen) to the detriment of nearly every aspect of policing. The result, she argues, is a hollowed out and ineffective police force that struggles to deal with everyday crime. Using interviews with police officers up and down the hierarchy, as well as station data, news reports, and social media postings, Scoggins probes the challenges faced by ground-level officers and their superiors at the Ministry of Public Security as they attempt to do their jobs in the face of funding limitations, reform challenges, and structural issues. *Policing China* concludes that despite the social control exerted by China's powerful bureaucracies, security failures at the street level have undermined Chinese citizens' trust in the legitimacy of the police and the capabilities of the state.

This book unravels the institutions surrounding witchcraft in the central Indian state of Chhattisgarh through theoretical and empirical research on witchcraft, violence and modernity in contemporary times. The author pieces together 'fragments' of stories gathered utilising ethnographic methods to examine the meanings associated with witches and witchcraft, and how they connect with social relations, gender, notions of agency, law, media and the state. The volume uses the metaphor of the shattered urn to tell the story of the accusations, punishment, rescue and the aftermath of the

events of the trial of women accused of being witches. It situates the *tonhī* or witch as a key elaborating symbol that orders behaviour to determine who the socially included and excluded are in communities. Through the personal interviews and other ethnographic methods conducted over the course of many years, the author delves into the stories and practices related to witchcraft, its

relations with modernity, and the relationship between violence and ideological norms in society. Insightful and detailed, this book will be of great interest to academics and researchers of anthropology, development studies, sociology, history, violence, gender studies, tribal studies and psychology. It will also be useful for readers in both historic and contemporary witchcraft practices as well as policy makers.
