This is a story which will make your heart sing - a story for all the family to read together. Young Judy discovers an unexpected package in her grandfather's old study. She has never met her grandfather (Poppy) as he died before she was born, but Judy is the one to unearth the puzzle which Poppy left for his family. To find the treasure which Poppy left, the family must first solve every riddle which he wrote on a beautiful scroll, and carefully wrapped in a rich purple velvet bag. Unless they solve the puzzles, they won't find the treasure. See if you can solve the puzzles before the family does. What has Poppy left them as an inheritance? Have fun with the story and enjoy the Omega Prize at the end.

Designed for undergraduates, graduate students, and industry practitioners, Bioseparations Science and Engineering fills a critical need in the field of bioseparations. Current, comprehensive, and concise, it covers bioseparations unit operations in unprecedented depth. In each of the chapters, the authors use a consistent method of explaining unit operations, starting with a qualitative description noting the significance and general application of the unit operation. They then illustrate the scientific application of the operation, develop the required mathematical theory, and finally, describe the applications of the theory in engineering practice, with an emphasis on design and scaleup. Unique to this text is a chapter dedicated to bioseparations process design and economics, in which a process simulator, SuperPro Designer® is used to analyze and evaluate the production of three important biological products. New to this second edition are updated discussions of moment analysis, computer simulation, membrane chromatography, and evaporation, among others, as well as revised problem sets. Unique features include basic information about bioproducts and engineering analysis and a chapter with bioseparations laboratory exercises. Bioseparations Science and Engineering is ideal for students and professionals working in or studying bioseparations, and is the premier text in the field.

AN ETHNOGRAPHY OF (IN)VULNERABILITY

A.L. Jackson Books

The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, Yvain, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. Yvain is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

A thousand years before the Winter War, Elgo, prince of the Vanadurin, killed the Dragon Sleeth and returned home with the fabulous wealth from the dead beast's lair. But there was more in the bounty than gems and gold, for the treasure was cursed, and in time it brought death to noble and peasant, war between Man and Dwarf, strife and destruction beyond reckoning. Now, generations later, as the conflict continues, the great Dragon Black Kalgath, in league with the Wizard Andrak, appears to avenge Sleeth's death and claim the Dragon-cursed hoard. Against this unholy alliance, two sworn enemies set forth to find a legendary long-lost weapon: a warhammer of incalculable power that may be the only hope of victory. "You damn bitch of an anarchist, I wish I could get at you. I would tear your heart out and feed it to my dog." This was one of the less obscene messages received by Emma Goldman (1869-1940), while in jail on suspicion of complicity in the assassination of McKinley. The most notorious woman of her day, she was bitterly hated by millions and equally revered by millions. The strong feelings she aroused are understandable. She was an alien, a practicing anarchist, a labor agitator, a pacifist in World War I, an advocate of political violence, a feminist, a proponent of free love and birth control, a communist, a street-fighter for justice - all of which she did with strong intellect and boundless passion. Today, of course, many of the issues that she fought over are just as vital as they were then. Her autobiography, written with vigor, ranks among the finest in the English language.

People come into our lives. Some stay, and many go. Some build us up, while most tear us down. They become our friends, our enemies, our lovers, our tormentors. Christian Davison came into mine, and I knew I'd never be the same. To Elizabeth Ayers, New York City had always been a dream. She's worked her entire young life to make it here. Groomed to one day take over his father's law firm, attending Columbia University was Christian Davison's only option. Neither wanted anything more until they sat across from each other at a caf table after being paired as study partners. Christian wants her, but Elizabeth knows better than to give into their intense attraction. Yet there is little she can do to stay away . . .

Silence isn't just the absence of noise. It's a presence that brings us energy, clarity, and deeper connection. Justin Zorn and Leigh Marz take us on an unlikely journey—from the West Wing of the White House to San Quentin's death row; from Ivy League brain research laboratories to underground psychedelic circles; from the temperate rainforests of Olympic National Park to the main stage at a heavy metal festival—to explore the meaning of silence and the art of finding it in any situation. Golden reveals how to go beyond the ordinary rules and tools of mindfulness. It's a field guide for navigating the noise of the modern world—not just the noise in our ears but also on our screens and in our heads. Drawing on lessons from neuroscience, business, spirituality, politics, and the arts, Marz and Zorn explore why auditory, informational, and internal silence is essential for physical health, mental clarity, ecological sustainability, and vibrant community. With vital lessons for individuals, families, workplaces, and whole societies, Golden is an engaging and unexpected rethinking of the meaning of quiet. Marz and Zorn make the bold and convincing argument that we can repair our world by reclaiming the presence of silence in our lives.
