Renault 4 owners. The book features
maintenance and repair procedures for

Renault 4 vehicles.

2005-2013 CRC Press

Award-winning author Jeffrey Greene
provides a portrait, by turns lyrical and
provocative, of J. David Bamberger's
unlikely transformation from first, a
vacuum cleaner salesman, then to co-
founder and CEO of Church's Fried
Chicken, to an internationally recognized

conservationist. In fact, Greene tells two integrally related stories: the evolution of one man's business sense, applying profit incentives to land restoration and nature conservancy; and the creation of a Texas Hill Country preserve where he effectively demonstrates his own principles. Growing up in rural Ohio during the Great Depression and World War II, Bamberger learned at an early age to shun waste, grow food productively, and admire the Amish for living in harmony with the land. His mother taught him to love the natural world and gave him a book that would set the course for his life: *Pleasant Valley*, by Louis Bromfield, a visionary American advocate for land restoration. Inspired by his new role model, Bamberger would say, "If I ever make

money, I want to do what Bromfield did." After finding that financial success, Bamberger bought what he describes as "the sorriest piece of land in Blanco County" and entered upon his decades-long effort to restore the ecological balance of 5,500 acres that had been virtually destroyed by more than a century of misuse. Naming his preserve *Selah*—from the Old Testament term meaning "pause and reflect"—Bamberger dedicates himself and his resources to protecting species and educating school children, conservation groups, government officials, and everyone else who will listen to his central message, delivered with evangelical zeal: We must take care of the earth, and anyone can help. Today, David and his wife, Margaret,

have received many awards, and he has been featured in The New Yorker, in Audubon, and on CNN and network news. But until now, no one has fully told the story of how a man with vision transformed a place—and in doing so, transformed himself.

Return on Ideas is a practical guide to getting more from the resources you put into your innovation process. David Nichols clearly shows why current innovation funnel models stifle rather than encourage new ideas, and offers a new methodology, 'rocketing', to tackle the problem. The first book to look in detail at innovation as a business-driving

imperative, Return on Ideas provides the tools, techniques and processes to actually upgrade the way you tackle innovation, illustrated with examples from innovative companies such as Yo! Sushi, Apple, Vodafone, Unilever, P&G, Danone, Amex and Ben & Jerry's – as well as unconventional sources such as theatre and comedy.

2002-2009 Strange Chemistry

The car industry and the way in which cars are created have changed beyond all recognition over the last half-century. Automotive styling was once the grudging afterthought when the engineers had finished their work. Now, following a short flirtation with exotic Italian design houses, it has evolved into sophisticated design carried out by multitalented in-house teams honing carefully crafted brand identities. One of the visionary designers at the forefront of that revolution has been Patrick le Quément. Most widely acclaimed for his 22 years in charge of Renault Design, resulting in such standout models as the Twingo, Scénic and Avantime, le Quément has enjoyed a 50-year career that has also taken in Simca, Ford and

Volkswagen-Audi. In his foreword to the book, Stephen Bayley calls le Quément 'perhaps the very most original designer working in the conservative car business at the turn of the millennium'. Some 60 million cars across the world now bear the unmistakable stamp of le Quément. *Design: Between the Lines* is not a straightforward autobiography; rather, le Quément charts his journey through five decades of thoughts, actions, failures and successes. He offers fascinating commentaries on design and the creative process, and on some of the extraordinary automotive brands that make up our shared cultural heritage. As Bayley notes, for le Quément, design is 'as much a matter of thinking as a matter of drawing'. On a broader, more philosophical level, le Quément also

shares his views about life in general and that remarkable contraption called 'the automobile', which has so influenced the lives of millions of people the world over from the late 1800s to the present day. Presented as a series of 50 brief essays or 'perspectives', le Quément's thoughtful and astute observations from the street, from the design studio and from his seat in the boardroom give the reader a penetrating and often amusing insight into the high-level workings of a global industry, its triumphs and tragedies, and the foibles of the decision-makers responsible for running it. A lively complementary text by the automotive journalist Stéphane Geffray accompanies each of le Quément's perspectives, and illustrations are provided by the

automobile designer Gernot Bracht. Design: *Between the Lines* will appeal to all motoring fans and enthusiasts of good design. As Chris Bangle, the former Director of BMW Design, remarks: 'Few car designers have had a career so filled with innovative successes that they have inspired a whole industry; fewer still have the skills to share it. Engaging and revealing, Patrick relates his personal experience and deep knowledge of car design in a very enjoyable manner.'
