This guidebook provides a comprehensive and detailed description of the GR131, an island-hopping trail across the seven Canary Islands. The 560km (348 mile) route begins on Lanzarote and finishes on El Hierro and is presented in 32 daily stages. The route is well waymarked but some navigational skills are required, and the remote and occasional rocky sections need to be treated with care. Also included is an optional ascent of El Teide, the highest peak on Spanish territory at 3718m. The guide is split into seven parts, one for each island. Overview statistics, detailed navigational

description and 1:50,000 mapping is provided for each stage and the guide also includes key information about transport to and between the Canary Islands and availability of accommodation and services. There is background information on the geology, history, plants and wildlife and notes on local points of interest. An appendix contains a helpful glossary. As a geologically young area, the Canaries boast rare wildlife across their dramatic volcanic terrain. The islands contain a number of national parks, and the landscape varies from semi-desert to forests and barren mountainsides. This month-long route is a great opportunity for walkers to fully immerse themselves in the diverse culture and scenery of the Canary Islands.

Godgeleerde waarheden aaneengeschakelt, als een kostelyke schat versamelt, en by elkanderen gebragt, zoo door het hooren, als spreken van, en over die bybelwaarheden. Wat Artificiële Intelligentie is en vooral wat het niet is ? Jean en Didier hebben dit boek geschreven om een duidelijker beeld te schetsen van wat Artificiële Intelligentie is en vooral wat het niet is. Wij maken graag het onderscheid tussen welke toepassingen vandaag bestaan, waar die wetenschap vandaag toe in staat is en wat nog volledig toebehoort aan de vrije fantasie. Het verschil tussen 'science' en 'sciencefiction'. Wij hopen met dit boek de lezer te overtuigen dat

AI op dit moment een verlengstuk kan zijn, dat de mens beter zal maken. Niet vervangen. Het enige wat AI op dit moment van hr zal overnemen, zijn een aantal 'machinale taken', wat ons zal toelaten om meer tijd vrij te maken voor de menselijke kant van hr. En dat is uiteindelijk een heel mooi streven. Een boek op menselijke hulpbronnen dat het onderscheid tussen welke toepassingen vandaag bestaan maakt, waar die wetenschap vandaag toe in staat is en wat nog volledig toebehoort aan de vrije fantasie. EXTRAIT Eén ding is duidelijk: artificiële intelligentie is niet meer weg te denken uit onze dagdagelijkse wereld. Er bestaan al slimmere computers dan je zou denken, en alle bouwstenen liggen klaar. Maar wat is artificiële intelligentie nu juist, en moeten we er bang voor

zijn? Ook bij Voka – Kamer van Koophandel West-Vlaanderen kloppen heel wat organisaties aan met vragen over artificiële intelligentie en de impact ervan op de samenleving en het bedrijfsleven. Vragen met een onzekere ondertoon komen daarbij ook steeds terug. “Vormt AI een bedreiging voor onze jobs?” en “Zullen robots de jobs van mensen overnemen?” zijn slechts enkele voorbeelden. Wij willen artificiële intelligentie vooral demystifiëren zodat onze ondernemers er zelf mee aan de slag kunnen gaan. We zetten acties op die zowel wetenschappers als technologen en ondernemers samenbrengen en die artificiële intelligentie in een begrijpelijke taal gieten voor andere ondernemers. We zetten ook niet toevallig in op thema’s

zoals de menselijke factor achter artificiële intelligentie, de interactie tussen mens en robot en op artificiële intelligentie geïnspireerd leiderschap. À PROPOS DE L'AUTEUR Didier Decaestecker, geboren te Delft in 1969 uit Gentse expat-ouders. Woonde onder meer in Nederland, Kenia, Saudi-Arabië en Oman, om op zijn 18de terug te keren naar Gent voor enige vorm van opleiding. Gepassioneerd door marketing en sales stond Didier mee aan de wieg van bedrijven zoals onder andere VT4, Be One Radio en PubliNetworks. Didier werkte ook 10 jaar als Managing Director bij LijnCom en Ticketmaster Belgium. Zijn interesse voor toekomst, talent en technologie maakten de geest van Artificiële Intelligentie in hem wakker. Zijn missie is om het toe te passen als

verlengstuk van de mens - in tegenstelling tot het vaak terugkerende schrikbeeld van als vervanger van de mens. Jean Faniel, geboren te Wilrijk in 1963. Vader van twee inmiddels volwassen kinderen en gehuwd met een rasechte recruiter, Griet Dekocker. Als ondernemer bezeten door technologie, stond hij aan de wieg van diverse tech-bedrijven, zoals Shop24 (robotgestuurde winkels) en Blue Corner (laadinfrastructuur voor elektrische wagens). Binnen zijn actueel project, Joboxx.com, een tech start-up in de recruitingsector is Jean CTO. Samen met zijn team Belgische en Marokkaanse developers bepaalt hij de architectuur van het product. Mede door dit project is Artificiële Intelligentie een ware passie geworden.

The #1 New York Times bestseller that has all America talking: as seen/heard on CNN's Fared Zakaria GPS, Morning Joe, CBS This Morning, The Bill Simmons Podcast, Rich Roll, and more. "The most important business—and parenting—book of the year." —Forbes "Urgent and important. . . an essential read for bosses, parents, coaches, and anyone who cares about improving performance." —Daniel H. Pink Shortlisted for the Financial Times/McKinsey Business Book of the Year Award Plenty of experts argue that anyone who wants to develop a skill, play an instrument, or lead their field should start early, focus intensely, and rack up as many hours of deliberate

practice as possible. If you dabble or delay, you'll never catch up to the people who got a head start. But a closer look at research on the world's top performers, from professional athletes to Nobel laureates, shows that early specialization is the exception, not the rule. David Epstein examined the world's most successful athletes, artists, musicians, inventors, forecasters and scientists. He discovered that in most fields—especially those that are complex and unpredictable—generalists, not specialists, are primed to excel. Generalists often find their path late, and they juggle many interests rather than focusing on one. They're also more creative, more agile, and able to make connections their more specialized peers can't see. Provocative, rigorous, and

engrossing, *Range* makes a compelling case for actively cultivating inefficiency. Failing a test is the best way to learn. Frequent quitters end up with the most fulfilling careers. The most impactful inventors cross domains rather than deepening their knowledge in a single area. As experts silo themselves further while computers master more of the skills once reserved for highly focused humans, people who think broadly and embrace diverse experiences and perspectives will increasingly thrive.

Walking the Via Francigena Pilgrim

Route - Part 3 Avalon Travel Pub

This guidebook describes the Way of St Francis a 550km month-long pilgrimage trail from Florence through Assisi to Rome. Split into 28 day stages, the walk begins in Florence and finishes in the

Vatican City. Stages range from 8km to 30km with plenty to see, including ancient ruins, picturesque towns, national treasures, and stunning churches. This comprehensive guidebook fits in a jacket pocket or rucksack, and contains information on everything from accommodation and transport in Italy, to securing your credential (pilgrim identity card), budgeting, what to take, and where to do laundry. Stories of Francis of Assisi's life are also included. Although the route includes climbs and descents of up to 1200m, no special equipment is required - although your hiking boots and socks definitely need to get along. Following the steps of heroes, conquerors and saints on this pilgrim trail is manageable all year round, but is best done from

April to June and mid-August to October. Route maps are given for every stage, and basic Italian phrases are included in the guidebook.

An indispensable guidebook to the final 400km of the Via Francigena from Lucca to Rome. This is the most popular stretch of the pilgrim route connecting Canterbury to the Vatican City. Crossing Italy's heartland, this last section of the Via Francigena goes through two of Tuscany's loveliest cities, Lucca and Siena, and visits medieval San Gimignano, Monteriggioni and Radicofani. Divided into 18 day stages, the route is suitable for any averagely fit walker. Full stage directions are accompanied by maps showing the route line and the facilities available at different locations. Accommodation

listings give invaluable information on low-cost pilgrim hostels and where to stay. There are useful city maps for Lucca, Siena, Rome and Viterbo, and a stage planning table lists intermediate distances between accommodation, so you can customise your own walking schedule. Containing a wealth of advice on planning, preparation and tips for making the most of the walk, this is a must-have guide for any pilgrim. One of three volumes covering the complete Via Francigena.

The Way of St Francis Rider

This guidebook contains over 60 walks which explore the best of the Julian Alps of Slovenia. The walks and treks in this guidebook are organised around five bases in the Julian Alps - Kranjska Gora, Bovec, Kobarid, Bled and Bohinj - all of which have a range of accommodation and public transport facilities. There is something here for everyone - from easy valley walks and rougher forest trails to high-mountain protected routes, including multiple routes up Triglav, Slovenia's highest peak. Several possibilities for multi-day walks are included. The Julian Alps are situated in the small independent republic of Slovenia, at the south-eastern end of the

Alpine chain. Their highest peak, Triglav, at 2864m, may be smaller than some of the better-known western giants, but what the mountains lack in stature they make up for in interest and accessibility. The dramatic limestone peaks drop steeply through forests to flower meadows, and will give you a feast for the eyes no matter which direction you turn.

A beautifully illustrated full-color history of mapmaking across centuries -- a must-read for history buffs and armchair travelers. Theater of the World offers a

fascinating history of mapmaking, using the visual representation of the world through time to tell a new story about world history and the men who made it. Thomas Reinertsen Berg takes us all the way from the mysterious symbols of the Stone Age to Google Earth, exploring how the ability to envision what the world looked like developed hand in hand with worldwide exploration. Along the way, we meet visionary geographers and heroic explorers along with other unknown heroes of the map-making world, both ancient and modern. And the stunning visual material allows us to witness the extraordinary breadth of this history with our own eyes.
