MAPPING PLACE NAMES OF INDIA

Peter Lang
Peter Gottschalk offers a compelling study of how, through the British implementation of scientific taxonomy in the subcontinent, Britons and Indians identified an inherent divide between mutually antagonistic religious communities. England's ascent to power coincided with the rise of empirical science as an authoritative way of knowing not only the natural world, but the human one as well. The British scientific passion for

classification, combined with the Christian impulse to differentiate people according to religion, led to a designation of Indians as either Hindu or Muslim according to rigidly defined criteria that paralleled classification in botanical and zoological taxonomies. Through an historical and ethnographic study of the north Indian village of Chainpur, Gottschalk shows that the Britons' presumed categories did not necessarily reflect the Indians' concepts of their own identities, though many Indians came to embrace this scientism and gradually accepted the categories the British instituted

through projects like the Census of India, the Archaeological Survey of India, and the India Museum. Today's propogators of Hindu-Muslim violence often cite scientific formulations of difference that descend directly from the categories introduced by imperial Britain. Religion, Science, and Empire will be a valuable resource to anyone interested in the colonial and postcolonial history of religion in India. The emergence of periodicals in Hindi for women and girls in early-twentieth-century India helped shape the nationalist-feminist thought in the country.

Analysing the format and structure of periodical literature, Shobna Nijhawan shows how it became a medium for elite and middle-class women to think in new idioms and express themselves collectively at a time of social transition and political emancipation. With case studies of Hindi women's periodicals including *Stri Darpan*, *Grihalakshmi*, and *Arya Mahila*, and explorations of Hindi girls' periodicals like *Kumari Darpan* and *Kanya Manoranjan*, the study brings to light the nationalist demand for home rule for women. Discussing domesticity, political emancipation, and language politics, Shobna argues that women's periodicals instigated change and

were not mere witnesses. With a perceptive Introduction setting the context, the work showcases rare archival material: advice texts, advertisements and book reviews, and multiple narratives specifically meant for women and girls of early twentieth-century north India.

PARYAVARAN VIGYAN (HINDI VERSION)

Routledge
Why would love for their language lead several men in southern India to burn themselves alive in its name? Passions of the Tongue analyzes the discourses of love, labor, and life that transformed Tamil into an object of such passionate attachment, producing in the process one of modern India's most intense movements for linguistic revival and separatism. Sumathi Ramaswamy suggests that these discourses cannot be contained

within a singular metanarrative of linguistic nationalism and instead proposes a new analytic, "language devotion." She uses this concept to track the many ways in which Tamil was imagined by its speakers and connects these multiple imaginings to their experience of colonial and post-colonial modernity. Focusing in particular on the transformation of the language into a goddess, mother, and maiden, Ramaswamy explores the pious, filial, and erotic aspects of Tamil devotion. She considers why, as its speakers sought political and social empowerment, metaphors of motherhood eventually came to dominate

representations of the language.

The second edition of this textbook brings together general political theory and the comparative method to interpret socio-political phenomena and issues that have occupied the Indian state and society since 1947. It considers the progress that India has made in some of the most challenging aspects of post-colonial politics such as governance, democracy, economic growth, welfare, and citizenship. Looking at the changed global role of India, its standing in the G-20 and BRICS, as well as the implications of the 2014 Indian

general elections for state and society, this updated edition also includes sections on the changing socio-political status of women in India, corruption and terrorism. The author raises several key questions relevant to Indian politics, including: • Why has India succeeded in making a relatively peaceful transition from colonial rule to a resilient, multi-party democracy in contrast to its South Asian neighbours? • How has the interaction of modern politics and traditional society contributed to the resilience of post-colonial democracy? • How did India's economy moribund—for several decades following Independence—make a

breakthrough into rapid growth and can India sustain it? • And finally, why have collective identity and nationhood emerged as the core issues for India in the twenty-first century and with what implications for Indian democracy? The textbook goes beyond India by asking about the implications of the Indian case for the general and comparative theory of the post-colonial state. The factors which might have caused failures in democracy and governance are analysed and incorporated as variables into a model of democratic governance. In addition to pedagogical features such as text boxes, a set of further readings is provided to guide readers who wish

to go beyond the remit of this text. The book will be essential reading for undergraduate students and researchers in South Asian and Asian studies, political science, development studies, sociology, comparative politics and political theory.

 Written in the voice of the mythical atheist, naysayer, and general all-purpose heretic of Indian philosophy, *The Truths and Lies of Nationalism* as Narrated by Charvak presents a completely new way of telling the history of Indian nationalism. Severely criticizing the doctrines of both Hindu nationalism and pluralist secularism, it examines the ongoing debates over Indian civilization and recounts in detail how the present borders of India were defined by British colonial policy, the partition of 1947, and the integration of the princely states and the French and Portuguese territories. The emphasis is not so much on the state

machinery inherited from colonial times but on the moral foundation of a new republic based on the solidarity of different but equal formations of the people. After a trenchant critique of the present-day conflicts over religion, caste, class, gender, language, and region in India, the book proposes a new politics of revitalized federalism. Intended for a general readership, and eschewing academic jargon, this book will be of interest to anyone concerned about the future of India.

This is the first academic study of Christian literature in Hindi and its role in the politics of language and religion in contemporary India. In public portrayals, Hindi has been the language of Hindus and Urdu the language of Muslims, but Christians have usually been associated with the

English of the foreign 'West'. However, this book shows how Christian writers in India have adopted Hindi in order to promote a form of Christianity that can be seen as Indian, *desī*, and rooted in the religio-linguistic world of the Hindi belt. Using three case studies, the book demonstrates how Hindi Christian writing strategically presents Christianity as linguistically Hindi, culturally Indian, and theologically informed by other faiths. These works are written to sway public perceptions by promoting particular forms of citizenship in the context of fostering the use of Hindi. Examining the content and context of Christian attention to Hindi, it is shown to

have been deployed as a political and cultural tool by Christians in India. This book gives an important insight into the link between language and religion in India. As such, it will be of great interest to scholars of Religion in India, World Christianity, Religion and Politics and Interreligious Dialogue, as well as Religious Studies and South Asian Studies. This book is the first of its kind to chart the terrain of contemporary India's many place names. It explores different 'place connections', investigates how places are named and renamed, and looks at the forces that are remaking the future place name map of India. Lucid and accessible, this book explores the bonds between names, places and people through a unique amalgamation of toponymy, history, mythology and political studies within a geographical expression. This volume addresses questions on the status and value of place names, their interpretation and classification. It brings to the fore the connections between

place names and the cultural, geographical and historical significations they are associated with. This will be an essential read for scholars and researchers of

geography, law, politics, history and sociology, and will also be of interest to policy-makers, administrators and the reader interested in India.
