Socio-economic inequalities in health are present to a greater or lesser extent in all European countries and the available data suggests that the health gap is increasing. Many studies have been conducted to explain inequalities in health and from them much has been learnt about the different contributory factors. However, in practice it seems hard to translate the knowledge of causes into

effective interventions and policies. Reducing Inequalities in Health: a European Perspective: \* brings together an unrivalled collection of contemporary data on successful policies and interventions \* compares differences in approach in several European countries \* includes recent evaluation studies \* discusses conceptual issues for research \* provides examples of good and bad practice in Europe \* draws out the policy and research implications for the future With contributions from leading researchers in 14 different European countries, this book provides a comprehensive source of reference for the reader interested in what really works in the field of health promotion and what sort of policies reduce the health gap.

History of Moral Science Princeton University Press

Dr. Meisami discloses previously neglected stylistic qualities and ethical purposes in medieval Persian court poetry, and shows that court poets were also moral instructors who examined and

celebrated the values they shared with their audiences. The book also takes into account the close relationship between Persian and Arabic court poetry. Originally published in 1987. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

### RE-THINKING KINSHIP AND FEUDALISM IN EARLY MEDIEVAL EUROPE

Routledge

In the age of the Grand Tour, foreigners flocked to Italy to gawk at its ruins and paintings, enjoy its salons and cafés, attend the opera, and revel in their own discovery of its past. But they also marveled at the people they saw, both male and female. In an era in which castrati were "rock stars," men served women as cicisbei, and dandified Englishmen became macaroni, Italy was perceived to be a place where men became women. The great publicity surrounding female poets, journalists, artists, anatomists, and scientists, and the visible roles for such women in salons, academies, and universities in many Italian cities also made visitors wonder whether women had become men. Such images, of course, were stereotypes, but they were nonetheless grounded in a reality that was unique to the Italian peninsula. This volume illuminates the social and cultural landscape of eighteenth-century Italy by exploring how questions of gender in music, art, literature, science, and medicine shaped perceptions of Italy in the age of the Grand Tour.

Selvbiografi af den tidligere iranske premierminister (1880-1967), hvor han beretter om sit liv og om kampen for nationalisering af olieindustrien in Iran

**Two Treatises** Boydell Press

In mid seventeenth-century Venice, opera first emerged from courts and private drawing rooms to become a form of public entertainment. Early commercial operas were elaborate spectacles, featuring ornate costumes and set design along with dancing and music. As ambitious works of theater, these productions required not only significant financial backing, but also strong managers to oversee several months of rehearsals and performances. These impresarios were responsible for every facet of production from contracting the cast to balancing the books at season's end. The systems they created still survive, in part, today. *Inventing the Business of Opera* explores public opera in its infancy, from 1637 to 1677, when theater owners and impresarios established Venice as the operatic capital of Europe. Drawing on extensive new documentation, the book studies all of the components necessary to opera production, from the financial backing of various populations of Venice, to the commissioning and creation of the libretto and the score; the recruitment and employment of singers, dancers, and instrumentalists; the production of the scenery and the costumes, and, the nature of the audience; and, finally, the issue of patronage. Throughout the book, the problems faced by impresarios come into new focus. The authors chronicle the progress of

Marco Faustini, the impresario most well known today, who made his way from one of Venice's smallest theaters to one of the largest. His companies provide the most personal view of an impresario and his partners, who ranged from Venetian nobles to artisans. Throughout the book, Venice emerges as a city that prized novelty over economy, with new repertory, scenery, costumes, and expensive singers the rule rather than the exception. The authors examine the challenges faced by four separate Venetian theaters during the seventeenth century: San Cassiano, the first opera theater, the Novissimo, the small Sant'Aponal, and San Luca, established in 1660. Only two of them would survive past the 1650s. Through close examination of an extraordinary cache of documents--including personal papers, account books, and correspondence -- Beth and Jonathan Glixon provide a comprehensive view of opera production in mid-seventeenth century Venice. For the first time in a study of opera, an emphasis is placed on the physical production -- the scenery, costumes, and stage machinery -- that tied these opera productions to the social and economic life of the city. This original and meticulously researched study will be of strong interest to all students of opera and its history.

*Imaginative Biography*, by Sir Egerton Brydges University of Michigan Library

Edward Everett Hale (1822-1909) was an American author and Unitarian clergyman. This is a collection of his short stories, many of which gave him a prominent position among short-story writers of 19th century America.

God's Caliph Oxford University Press

Annotation. Muhammad Musaddiq was the first of the great charismatic anti-colonial campaigners of the post-war world. As Prime Minister of Iran between 1951 and 1953 he nationalized the Anglo-Iranian Oil Company, led the nation's defiant attempt to run its oil industry independently during an economic blockade, and attempted to strengthen the role of parliament in Iraq. Mussadiq's crusade led to conflict with powerful foreign interests, and in 1953 the CIA, at British instigation, removed him in a coup d'état which restored the Shah's absolute powers. This book is a full-scale biography of Musaddiq which also charts the history of the Popular Movement from Mussadiq's downfall in 1953 to his death in 1967.

### THE VIVALDI COMPENDIUM

I.B. Tauris

Waqfs, or religious endowments, have long been at the very center of daily Islamic life, establishing religious, cultural, and welfare institutions and serving as a legal means to keep family property intact through several generations. In this book R. D. McChesney focuses on the major Muslim shrine at Balkh--once a flourishing city on an ancient trade route in what is now northern Afghanistan--and provides a detailed study of the political, economic, and social conditions that influenced, and were influenced by, the development of a single religious endowment. From its founding in 1480 until 1889, when the Afghan government took control of it, the waqf at Balkh was a formidable economic force in a financially dynamic region, particularly during those times when the endowment's sacred character and the tax privileges it acquired gave its managers considerable financial security. This study sheds new light on the legal institution of waqf within Muslim society and on how political conditions affected the development of socio-religious institutions throughout Central Asia over a

period of four hundred years. Originally published in 1991. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

### **THE HISTORICAL ANTHROPOLOGY OF EARLY MODERN ITALY**

Cambridge University Press

The Vivaldi Compendium will serve as the most reliable and up-to-date source of quick reference on the composer Antonio Vivaldi and his music. This takes the form of a dictionary listing persons, places, musical works and many other topics connected with Vivaldi; its alphabetically arranged entries are copiously cross-referenced so as to guide the reader towards related topics. The Vivaldi Compendium also provides a gateway to further reading. This is achieved via an extensive bibliography, to which reference is made in most of the dictionary entries. These two sections are complemented by an article-length biography of the composer and a carefully organized list of his works. Knowledge about Vivaldi and his music is still advancing at an incredible rate - many discoveries occurred while the book was in preparation - and every effort has been made to ensure that The Vivaldi Compendium represents the latest in Vivaldi research, drawing on the author's close involvement with Vivaldi and Venetian music over four decades. MICHAEL TALBOT is Emeritus Professor of Music at the University of Liverpool and a Fellow of the British Academy. He is known internationally for his studies of late-baroque Italian music, which include recent books on Vivaldi's chamber cantatas (2003) and the same composer's fugal writing (2007).

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

### **MEDIEVAL PERSIAN COURT POETRY**

BRILL

This is the second collection of studies by Stephen D. White to be published by Variorum (the first being *Feuding and Peace-Making in Eleventh-Century France*). The essays in this volume look principally at France and England from Merovingian and Anglo-Saxon times up to the 12th century.

They analyze Latin and Old French discourses that medieval nobles used to construct their relationships with kin, lords, men, and friends, and investigate the political dimensions of such relationships with particular reference to patronage/clientage, the use of land as an item of exchange, and feuding. In so doing, the essays call into question the conventional practice of studying kinship and feudalism as independent systems of legal institutions and propose new strategies for studying them.

*Iran* Routledge

*Mental Disorders in the Classical World* seeks to show through interdisciplinary work how the first medical scientists and their lay contemporaries conceptualized mental disorders and attempted to diagnose, understand and treat them.

*Theophrastus de Ventis* Stanford University Press

This study examines how religious authority was distributed in early Islam. It argues the case that, as in Shi'ism, it was concentrated in the head of state, rather than dispersed among learned laymen as in Sunnism. Originally the caliph was both head of state and ultimate source of religious law; the Sunni pattern represents the outcome of a conflict between the caliph and early scholars who, as spokesmen of the community, assumed religious leadership for themselves. Many Islamicists have assumed the Shi'ite concept of the imamate to be a deviant development. In contrast, this book argues that it is an archaism preserving the concept of religious authority with which all Muslims began.

### **THE PATRON'S PAYOFF**

Princeton University Press

This volume presents an original view of the culture of early modern Italy. The book addresses particular themes - specifically those of perception and communication - as well as serving to exemplify modes of analysis in the currently developing field of historical anthropology.

*Inventing the Business of Opera* Princeton University Press

*Mental Disorders in the Classical World* BRILL

*Italy's Eighteenth Century* Penn State University Press

Beginning in the 1730s, Heather Minor tells us, Rome "began to resemble one huge construction site," with a series of ambitious and expensive new building campaigns that transformed the face and substance of the city. From renovations of the Santa Maria Maggiore and San Giovanni in Laterano and the restoration of the Arch of Constantine to the creation of the Capitoline Museum and the establishment of the papacy's Calcografia, the push for reform not only renewed papal and Church identity but also revived Italian culture as a whole. Based on extensive archival research and full of fascinating stories about the often stormy theological and intellectual debates central to the

attempts at reform, *The Culture of Architecture in Enlightenment Rome* brings to life the personalities of architects, theologians, and intellectuals and links the extensive architectural programs with powerful shifts in the intellectual climate of the time.

**Waqf in Central Asia** *Mental Disorders in the Classical World*

An analysis of Italian Renaissance art from the perspective of the patrons who made 'conspicuous

commissions', this text builds on three concepts from the economics of information - signaling, signposting, and stretching - to develop a systematic methodology for assessing the meaning of patronage.
