The main purpose of the book is to explore basic music theory so thoroughly that the interested student will then be able to easily pick up whatever further theory is wanted. Music history and the physics of sound are included to the extent that they shed light on music theory. The main premise of this course is that a better understanding of where the basics come from will lead to better and faster comprehension of more complex ideas. It also helps to remember, however, that music theory is a bit like grammar. Catherine Schmidt-Hones is a music teacher from Champaign, Illinois and she has been a pioneer in open education since 2004. She is currently a doctoral candidate at the University of Illinois in the Open Online Education program with a focus in Curriculum and Instruction.

Teachers, students, composers, performers, and other practitioners of sacred sound will appreciate this volume because, unlike any book currently available on sacred music, it treats the history, development, current practices, composition, and critical views of the liturgical music of both the Jewish and Christian traditions. Contributors trace Jewish music from its place in Hebrew Scriptures through the nineteenth-century Reform movement. Similar accounts of Christian music describe its growth up to the Protestant Reformation, as well as post-Reformation development. Other essays explore liturgical music in contemporary North America by analyzing it against the backdrop of the continuous social change that characterizes our era.

Jamaican music can be roughly divided into four eras, each with a distinctive beat - ska, rocksteady, reggae and dancehall. Ska dates from about 1960 to mid-1966, rocksteady from 1966 to 1968, while from 1969 to 1983 reggae was the popular beat. The reggae era had two phases, 'early reggae' up to 1974 and 'roots reggae' up to 1983. Since 1983 dancehall has been the prevalent sound. The authors

describe each stage in the development of the music, identifying the most popular songs and artists, highlighting the significant social, political and economic issues as they affected the musical scene. While they write from a Jamaican perspective, the intended audience is 'any person, local or foreign, interested in an intelligent discussion of reggae music and Jamaica.'

"Due to significant political and social changes over the last decade in their countries and worldwide, many scholars in the Nordic nations and in Southern Africa have been researching on 'music and identity' - an area with a paucity of literature. It is our hope that this book will be beneficial to scholars interested in the field of music and identity. This volume is the result of the Swedish South African Research Network (SSARN) project, funded from 2004-2006 by the Swedish International Development Cooperation Agency (SIDA) and the National Research Foundation (NRF) of South Africa, under the theme 'Music and Identity'. SSARN was founded by Stig-Magnus Thorsén of the University of Gothenburg, Sweden, in 2002 when he invited Nordic and Southern African scholars to participate in a research group focusing broadly on the topic 'Music and Identity'"--Publisher's website.

THE MONTHLY MUSICAL RECORD

Ashgate Publishing, Ltd.
Music from the late eighteenth and early nineteenth century is a central part of the

singer's repertoire today, but until now no book has addressed the principles which governed song performance at the time this music was written. Robert Toft describes these principles in detail and places them in a broad cultural perspective. He shows that singing in the period was closely allied with speaking, drawing on many of the same performance techniques, including emphasis, accent, tone of voice, pauses, and gestures. He also shows how modern singers can use this historical background to move and delight modern audiences. [Journal of the Society of Arts](#) Bloomsbury Publishing
