Encyclopedia of Social Media and Politics

Behavioral finance presented in this book is the second-

generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to

satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

A collection of poetry from the 2020 winner of the National Poetry Series, selected by Ocean Vuong Engaging the matriarchal structure of the beehive, Amanda Moore explores the various roles a woman plays in the family, the home, and the world at large. Beyond the productivity and excess, the sweetness and sting, Requeening brings together poems of motherhood and daughterhood, an evolving relationship of care and tending, responsibility and joy, dependence and deep love. The poems that anchor this collection don't shy away from the inevitability of a hive's collapse and consider the succession of "requeening" a hive as "a new heart ready to be fed and broken and fed again." The collapse is both physical—there are poems of illness and recovery—and emotional, as the mother-daughter relationship shifts, the daughter becoming separate, whole, and poised to displace. The liminal spaces these poems traverse in human relationships is echoed in a range of poetic and hybrid form, offering freedom and stricture as they contemplate the way we hold one another in love and grief. Requeening is a vivid and surprising collection of poems from a winner of the National Poetry Series Open Competition.

### **THE YEAR'S BEST HORROR STORIES**

Univ of California Press

In Hands on the Freedom Plow, fifty-two women--northern and southern, young and old, urban and rural, black, white, and Latina--share their courageous personal stories of working for the Student Nonviolent Coordinating Committee (SNCC) on the front lines of the Civil Rights Movement. The testimonies gathered here present a sweeping personal history of SNCC: early sit-ins, voter registration campaigns, and freedom rides; the 1963 March on Washington, the Mississippi Freedom Summer, and the movements in Alabama and Maryland; and Black Power and antiwar activism. Since the women spent time in the Deep South, many also describe risking their lives through beatings and

arrests and witnessing unspeakable violence. These intense stories depict women, many very young, dealing with extreme fear and finding the remarkable strength to survive. The women in SNCC acquired new skills, experienced personal growth, sustained one another, and even had fun in the midst of serious struggle. Readers are privy to their analyses of the Movement, its tactics, strategies, and underlying philosophies. The contributors revisit central debates of the struggle including the role of nonviolence and self-defense, the role of white people in a black-led movement, and the role of women within the Movement and the society at large. Each story reveals how the struggle for social change was formed, supported, and maintained by the women who kept their "hands on the freedom plow." As the editors write in the introduction, "Though the voices are different, they all tell the same story--of women bursting out of constraints, leaving school, leaving their hometowns, meeting new people, talking into the night, laughing, going to jail, being afraid, teaching in Freedom Schools, working in the field, dancing at the Elks Hall, working the WATS line to relay horror story after horror story, telling the press, telling the story, telling the word. And making a difference in this world."

This interdisciplinary study examines the relationships between law and the humanities. On the one side, chapters focus attention on legal restraints in the media, censorship of the arts, copyright protection on the Internet, and artists' rights in the past and in the present cyberspace era. On the other, the role played by law

in literature and the theatre is explored, and one essay examines the architectural design of the U.S. Supreme Court and how its architect fit into political history.

Harvard professors Steven Levitsky and Daniel Ziblatt have spent more than twenty years studying the breakdown of democracies in Europe and Latin America, and they believe the answer is yes. Democracy no longer ends with a bang—in a revolution or military coup—but with a whimper: the slow, steady weakening of critical institutions, such as the judiciary and the press, and the gradual erosion of long-standing political norms. The good news is that there are several exit ramps on the road to authoritarianism. The bad news is that, by electing Trump, we have already passed the first one. Drawing on decades of research and a wide range of historical and global examples, from 1930s Europe to contemporary Hungary, Turkey, and Venezuela, to the American South during Jim Crow, Levitsky and Ziblatt show how democracies die—and how ours can be saved. Praise for *How Democracies Die* "What we desperately need is a sober, dispassionate look at the current state of affairs. ### **CONVERGENT JOURNALISM AN INTRODUCTION**

Cambridge University Press

The *Encyclopedia of Social Media and Politics* explores how the rise of social media is altering politics both in the United States and in key moments, movements, and places around the world. Its scope encompasses the disruptive technologies and activities that are changing basic patterns in American politics and the amazing transformations that social media use is rendering in other political systems heretofore resistant to democratization and change. In a time when social media are revolutionizing and galvanizing politics in the United States and around the world, this encyclopedia is a must-have reference. It reflects the changing landscape of politics where old modes and methods of

political communication from elites to the masses (top down) and from the masses to elites (bottom up) are being displaced rapidly by social media, and where activists are building new movements and protests using social media to alter mainstream political agendas. **Key Features** This three-volume A-to-Z encyclopedia set includes 600 short essays on high-interest topics that explore social media’s impact on politics, such as “Activists and Activism,” “Issues and Social Media,” “Politics and Social Media,” and “Popular Uprisings and Protest.” A stellar array of world renowned scholars have written entries in a clear and accessible style that invites readers to explore and reflect on the use of social media by political candidates in this country, as well as the use of social media in protests overseas Unique to this book is a detailed appendix with material unavailable anywhere else tracking and illustrating social media usage by U.S. Senators and Congressmen. This encyclopedia set is a must-have general, non-technical resource for students and researchers who seek to understand how the changes in social networking through social media are affecting politics, both in the United States and in selected countries or regions around the world.

This four-volume set introduces, on the management side, principles and procedures of economics, budgeting and finance; leadership; governance; communication; business law and ethics; and human resources practices; all in the sports context. On the marketing side this reference resource explores two broad streams: marketing of sport and of sport-related products

(promoting a particular team or selling team- and sport-related merchandise, for example), and using sports as a platform for marketing non-sports products, such as celebrity endorsements of a particular brand of watch or the corporate sponsorship of a tennis tournament. Together, these four volumes offer a comprehensive and authoritative overview of the state of sports management and marketing today, providing an invaluable print or online resource for student researchers.

A lavishly illustrated collection of forty-two profiles of Texas music pioneers, most underrated or overlooked, *All Over the Map: True Heroes of Texas Music* covers the musical landscape of a most musical state. The first edition was published in 2005 to wide acclaim. This second edition includes updated information, a bonus section of six behind-the-scenes heroes, and fifteen new portraits of Lefty Frizzell, Janis Joplin, and others, spanning such diverse styles as blues, country, hip-hop, conjunto, gospel, rock, and jazz. D.J. Stout and Pentagram designed the reborn edition, with photographer Scott Newton providing portraits. Michael Corcoran has been writing about Texas music for more than thirty years, for the *Dallas Morning News* and *Austin American Statesman*, as well as in such publications as *Texas Monthly* and *Spin*. These pieces are based on his personal interviews with their subjects as well as in-depth research. Expertly written with flair, the book is a musical waltz across Texas.

Mignon R. Moore brings to light the family life of a group that has been largely invisible—gay women of color—in a book that challenges long-standing ideas about racial identity, family formation, and motherhood. Drawing from interviews and surveys of one hundred black gay women in New York City, *Invisible Families* explores the ways that race and class have influenced how these women understand their sexual orientation, find partners, and form families. In particular, the study looks at the ways in which the past experiences of women who came of age in the 1960s and 1970s shape their thinking, and have structured their lives in communities that are not always accepting of their openly gay status. Overturning generalizations about lesbian families derived largely from research focused on white, middle-class feminists, *Invisible Families* reveals experiences within black American and Caribbean communities as it asks how people with multiple stigmatized identities imagine and construct an individual and collective sense of self.

Learn how to deliver news in any and all media. This one volume teaches you how to master all of the skills needed to be a converged journalist. Don't think only broadcast or print. Think online, air waves, magazines, PDAs, cell phones and electronic paper. *Convergent Journalism an Introduction* explains what

makes a news story effective today and how to recognize the best medium for a particular story. That medium may be the web, broadcast, radio, or a newspaper or magazine - or, more likely, all of the above. This text will explain how a single story can fulfil its potential through any media channel. Convergent Journalism an Introduction shows you, the news writer, editor, reporter, and producer how to tailor a story to meet the needs of various media, so your local news story can be written in a form appropriate for the web, print, PDA screen and broadcast.

"One is tempted to say 'the only book you'll need on starting a business.' Brilliant! Genius! Choose your superlative-it'll fit."-Tom Peters People starting out in business tend to seek step-by-step formulas or rules, but in reality there are no magic bullets.

Rather, says veteran company-builder Norm Brodsky, there's a mentality that helps street-smart entrepreneurs solve problems and pursue opportunities as they arise. Brodsky shares his hard-earned wisdom every month in Inc. magazine, in the hugely popular "Street Smarts" column he cowrites with Bo Burlingham. Now they've adapted their best advice into a comprehensive guide for anyone running a small business.

Over the course of a generation, algorithms have gone from mathematical abstractions to powerful mediators of daily life. Algorithms have made our lives more efficient, more entertaining, and, sometimes, better informed. At the same time, complex algorithms are increasingly violating the basic rights of individual citizens. Allegedly anonymized datasets routinely leak our most sensitive personal information; statistical models for

everything from mortgages to college admissions reflect racial and gender bias. Meanwhile, users manipulate algorithms to "game" search engines, spam filters, online reviewing services, and navigation apps. Understanding and improving the science behind the algorithms that run our lives is rapidly becoming one of the most pressing issues of this century. Traditional fixes, such as laws, regulations and watchdog groups, have proven woefully inadequate. Reporting from the cutting edge of scientific research, *The Ethical Algorithm* offers a new approach: a set of principled solutions based on the emerging and exciting science of socially aware algorithm design. Michael Kearns and Aaron Roth explain how we can better embed human principles into machine code - without halting the advance of data-driven scientific exploration. Weaving together innovative research with stories of citizens, scientists, and activists on the front lines, *The Ethical Algorithm* offers a compelling vision for a future, one in which we can better protect humans from the unintended impacts of algorithms while continuing to inspire wondrous advances in technology.
