

This carefully crafted collection provides a snapshot of the evolution of David Nunan's theoretical and empirical contributions to the field of second language education over the last 40 years. The volume focuses on the development of his work on second language curricula, and in particular, the work for which he is best known: learner-centered education and task-based learning and teaching. David Nunan has been a language teacher, researcher and consultant for 40 years. He has lived and worked in many countries, principally in the Asia-Pacific region, but also in the Americas, Europe and the Middle-East. In addition to his research and scholarly work, he is the author of several major textbook series for the teaching and learning of English as a foreign language. These texts are based on his task-based language teaching approach, and are widely used in schools, school systems and universities around the world.

The third edition succeeds the fifth update of second edition. One of the main features has been the adoption of new and revised international standards, notably the International Standard Identifier for Libraries and Related Organizations, the ISBN 13 and the linking ISSN. New fields have been added for recording the Persistent Record Identifier. Uniform Conventional Headings for Legal and Religious texts are now catered for with separate fields. A number of fields have been revised: archival materials, manuscripts and documentation produced by the ISSN International Centre.

Adult and Continuing Education has become a field of action, reflection, and research all over the world. To learn from successful models developed worldwide, this book documents and discusses the progress of comparative adult education - aims, contents, methods, obstacles, and prospects. The first part examines basic questions of comparative adult education. The contributions offer a deeper understanding and include warnings of obstacles and pitfalls. They help to design research by building up on the theoretical framework developed in prior research. The second part presents experiences and «lessons learned», suggesting advice and warnings for successful comparative work. The studies in the third part illustrate research methods as well as topics important to researchers in various regions of the world. Descriptions of international institutions in the last part may assist to use their assistance and services.

A lexically based, corpus-driven theoretical approach to meaning in language that distinguishes between patterns of normal use and creative exploitations of norms. In *Lexical Analysis*, Patrick Hanks offers a wide-ranging empirical investigation of word use and meaning in language. The book fills the need for a lexically based, corpus-driven theoretical approach that will help people understand how words go together in collocational patterns and constructions to make meanings. Such an approach is now possible, Hanks writes, because of the availability of new forms of evidence (corpora, the Internet) and the development of new methods of statistical analysis and inferencing. Hanks offers a new theory of language, the Theory of Norms and Exploitations (TNE), which makes a systematic distinction between normal and abnormal usage—between rules for using words normally and rules for exploiting such norms in metaphor and other creative use of language. Using hundreds of carefully chosen citations from corpora and other texts, he shows how matching each use of a word against established contextual patterns plays a large part in determining the meaning of an utterance. His goal is to develop a coherent and practical lexically driven theory of language that takes into account the immense variability of everyday usage and that shows that this variability is rule governed rather than random. Such a theory will complement other theoretical approaches to language, including cognitive linguistics, construction grammar, generative lexicon theory, priming theory, and pattern grammar.

Traditional media is over. The internet reigns. And in the attention economy, influencers are royalty. But who are they... and how do you become one? Break the Internet takes a deep dive into the influencer industry, tracing its evolution from blogging and legacy social media such as Tumblr to today's world in which YouTube, Instagram, and TikTok dominate. Surveying the new media landscape that the rise of online celebrity has created, it is an insider account of a trend which is set to dominate our future--the economy of influence will be valued at \$15bn globally by 2022. Olivia Yallop enrolls in an

influencer bootcamp, goes undercover at fan meetups, and shadows online celebrities to understand how digital personas are built, uncovering what it is really like to live a branded life and trade in a "social stock market". From mumfluencers and activists to governments and investors, everyone wants to build their online influence. But how do you stay authentic in a system designed to commodify identity? Break the Internet examines both the dangers and the transformative potential of digital culture.
