corruption and improper influence from unscrupulous sports persons, bookmakers and others. Sports betting in the last ten years or so has developed and changed quite fundamentally with the advent of modern technology – not least the omnipresence of the Internet and the rise of on-line sports betting. This book covers the law and policy on sports betting in more than forty countries around the

world whose economic and social development, history and culture are quite different. Several chapters deal with the United States of America. This book also includes a review of sports betting under European Union (EU) Law. The book appears in the ASSER International Sports Law Series, under the editorship of Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der

efficiency. The last two years have seen a record

number of Americans tune in for climatic Triple Crown races featuring Smarty Jones and Funny Cide; in 2004, television viewership jumped a whopping 61 percent over the record set in 2003, and the Belmont Stakes race itself drew a record crowd of more than 120,000! This easy-to-understand guide shows first-time visitors to the track how to enjoy the sport of horse racing-and make smart

bets. It explains what goes on at the track, what to look for in horses and jockeys, how to read a racing form and do simple handicapping, and how to manage betting funds and make wagers that stand a good chance of paying off. Complete with coverage of off-track and online betting, it's just what anyone needs to play the ponies-and win! Richard Eng (Las Vegas, NV) is a racing writer and

Dr. Quirin offers brand new

approaches to picking winning horses by going beyond the usual speed handicapping methods to incorporate pace, trip, and other factors-- for beginners and experienced players alike.

THE SKEPTICAL HANDICAPPER

R Daily Racing Form The Gambler Who Cracked the Horse-Racing Code Bill Benter did the impossible: He wrote an algorithm that

couldn't lose at the track. Close to a billion dollars later, he tells his system. This book examines the elements necessary for a practical and successful computerized horse race handicapping and wagering system. Data requirements, handicapping model development, wagering strategy, and feasibility are addressed. A logit-based technique and a corresponding heuristic measure of improvement

are described for combining a fundamental handicapping model with the public's implied probability estimates. The author reports significant positive results in five years of actual implementation of such a system. This result can be interpreted as evidence of inefficiency in pari-mutuel racetrack wagering. This paper aims to emphasize those aspects of computer handicapping which the author has found most

important in practical application of such a system. Also included the Bill Benter "What Are My Odds?" Presentation at ICCM in 2004.

WINNING AT THE TRACK

Pedigree Handicapping reveals how evaluating a horse's bloodline is most commonly used in maiden special weight races. It also points out the many other areas where pedigree handicapping has proven to be a powerful tool.
