In the year 1990, when the rest of the world was fast asleep, oblivious to the dangers of Islam, and figures like Geert Wilders and Marie le Pen were still un-germinated seeds, a Dutch Muslim immigrant had already written a book, under the pseudonym Mohamed Rasoel, warning Europeans about the dangers that come with the open-door immigration policy. Immediately upon its publication, the book created a firestorm, making it the most discussed issue in the country (TV, newspapers and magazines), as reprints of the book sold out within days, until the left-wing government panicked and banned the book. The author went into hiding under police protection, but was taken to court by the Anne Frank Foundation, charged with discrimination, and fined 4000 dollars. Many years later, in 2003, a language professor, T.A. van Dijk, who did a thorough research into the book, wrote a 250 pages book, arguing that the book had not been written by Rasoel, but by a highly respected writer Gerrit Komrij, who in return wrote a 40 pages book, denying the accusations and taking van Dijk to court. The book gained further popularity when, in 2007, the Dutch right-wing party leader Geert Wilders proposed to the parliament that the book be distributed in all secondary schools. Since then, many other authors have also referred to its contents, in books such as *Western Europe and its Islam*, *Defeating Eurabia*, and *Difference Diffidence Threat*. About the contents: with almost every prediction in the book having come true, the author warns that immigrants arrive carrying the same mentality that created the situations they fled from in the first place, only to recreate the same situations in Europe. Furthermore, the book proposes that the outcome of the volatile situation in Europe can either be a civil war, or the sacrificing of parts of Europe and bestowing them to the Muslims. Although the book refers mainly to the Netherlands, it applies to other European countries as well, of course. It is amazing though how everything being said today about Islam had already been said three decades ago, along with many other amazing arguments that people haven't yet considered. This book was translated from Dutch to English, without the authorization of the author, whose whereabouts and true identity are still a mystery.

Tanya is no ordinary girl. She can see fairies. But not the fairies we imagine. Evil fairies who cast spells on her, rousing her from her sleep and propelling her out of bed. At wit's end with her daughter's inexplicable behavior, Tanya's mother sends her away to live with her grandmother at Elveden Manor, a secluded countryside mansion on the outskirts of a peculiar Essex town. There is plenty to explore, as long as Tanya stays away from Hangman's Wood- a vast stretch of forest, full of catacombs and notorious for people losing their lives. Fifty years ago a girl vanished in the woods, a girl Tanya's grandmother will not speak of. As Tanya learns more about this girl, she finds herself dangerously close to vanishing into the fairy realm forever. Debut author Michelle Harrison weaves an intricate mystery into a beautiful and haunting fantasy that captures a rich world of fairy lore where only the color red can offer protection.

NEW YORK TIMES BESTSELLER • This sweeping novel from the author of *A Long Petal of the Sea* tells the epic story of Violeta Del Valle, a woman whose life spans one hundred years and bears witness to the greatest upheavals of the twentieth century. ONE OF THE MOST ANTICIPATED BOOKS OF 2022—Oprah Daily, The Washington Post, Business Insider, Marie Claire, Bustle, Ms. magazine, PopSugar, The Week, Electric Lit, The Millions, She Reads, Lit Hub, Book Riot Violeta comes into the world on a stormy day in 1920, the first girl in a family with five boisterous sons. From the start, her life is marked by extraordinary events, for the ripples of the Great War are still being felt, even as the Spanish flu arrives on the shores of her South American homeland

almost at the moment of her birth. Through her father's prescience, the family will come through that crisis unscathed, only to face a new one as the Great Depression transforms the genteel city life she has known. Her family loses everything and is forced to retreat to a wild and beautiful but remote part of the country. There, she will come of age, and her first suitor will come calling. She tells her story in the form of a letter to someone she loves above all others, recounting times of devastating heartbreak and passionate affairs, poverty and wealth, terrible loss and immense joy. Her life is shaped by some of the most important events of history: the fight for women's rights, the rise and fall of tyrants, and ultimately not one, but two pandemics. Through the eyes of a woman whose unforgettable passion, determination, and sense of humor carry her through a lifetime of upheaval, Isabel Allende once more brings us an epic that is both fiercely inspiring and deeply emotional.

I, WOZ offers readers a unique glimpse into the offbeat and brilliant but ethical mind that conceived the Macintosh. After 25 years avoiding the public eye, Steve Wozniak reveals the full story of the Apple computer, from its conception to his views on the iconic cult status it has achieved today. In June 1975 Steve's curiosity and determination inspired him to build a computer, the first Apple. Six months later, he sold the machine, and for the self-professed 'engineer's engineer', success was imminent. But this story is full of life lessons, critical decisions, huge triumphs and big mistakes. Steve speaks also of his childhood, phone hacking pranks, working at Hewlett-Packard, the life-changing plane crash and teaching.

Information behavior has emerged as an important aspect of human life, however our knowledge and understanding of it is incomplete and underdeveloped scientifically. Research on the topic is largely contemporary in focus and has generally not incorporated results from other disciplines. In this monograph Spink provides a new understanding of information behavior by incorporating related findings, theories and models from social sciences, psychology and cognition. In her presentation, she argues that information behavior is an important instinctive sociocognitive ability that can only be fully understood with a highly interdisciplinary approach. The leitmotifs of her examination are three important research questions: First, what is the evolutionary, biological and developmental nature of information behavior? Second, what is the role of instinct versus environment in shaping information behavior? And, third, how have information behavior capabilities evolved and developed over time? Written for researchers in information science as well as social and cognitive sciences, Spink's controversial text lays the foundation for a new interdisciplinary theoretical perspective on information behavior that will not only provide a more holistic framework for this field but will also impact those sciences, and thus also open up many new research directions.

How to make customers feel good about doing what you want Learn how companies make us feel good about doing what they want. Approaching persuasive design from the dark side, this book melds psychology, marketing, and design concepts to show why we're susceptible to certain persuasive techniques.

Packed with examples from every nook and cranny of the web, it provides easily digestible and applicable patterns for putting these design techniques to work. Organized by the seven deadly sins, it includes: Pride — use social proof to position your product in line with your visitors' values Sloth — build a path of least resistance that leads users where you want them to go Gluttony — escalate customers' commitment and use loss aversion to keep them there Anger — understand the power of metaphysical arguments and anonymity Envy — create a culture of status around your product and feed aspirational desires Lust — turn desire into commitment by using emotion to defeat rational behavior Greed — keep customers engaged by reinforcing the behaviors you desire Now you too can leverage human fallibility to create powerful persuasive interfaces that people will love to use — but will you use your new knowledge for good or evil? "...A compulsively readable tour de force." —The Wall Street Journal New York Times Book Review recommends M.T. Edvardsson's *A Nearly Normal Family* and lauds it as a "page-turner" that forces the reader to confront "the compromises we make with ourselves to be the people we believe our beloveds expect." (NYTimes Book Review Summer Reading Issue) M.T. Edvardsson's *A Nearly Normal Family* is a gripping legal thriller

that forces the reader to consider: How far would you go to protect the ones you love? In this twisted narrative of love and murder, a horrific crime makes a seemingly normal family question everything they thought they knew about their life—and one another. Eighteen-year-old Stella Sandell stands accused of the brutal murder of a man almost fifteen years her senior. She is an ordinary teenager from an upstanding local family. What reason could she have to know a shady businessman, let alone to kill him? Stella's father, a pastor, and mother, a criminal defense attorney, find their moral compasses tested as they defend their daughter, while struggling to understand why she is a suspect. Told in an unusual three-part structure, *A Nearly Normal Family* asks the questions: How well do you know your own children? How far would you go to protect them?
