The information provided is the result of many years of participation with industries worldwide. Pultex Pultrusion Design Manual - Creative Pultrusions EPTA - The European Pultrusion Technology Association was created in 1989 by the leading Pultruders in Europe with the mission to support the growth of the composite profiles industry by maximizing external communication efforts and having an actively contributing membership. EPTA -

The European Pultrusion Technology Association began to develop fibreglass pultrusion capabilities in 1989, and started manufacturing with polyester resin in 1992. Now, Inline is pioneering the production of window frames using an innovative polyurethane pultrusion process. By pultruding polyurethane resin, Inline can now produce larger, stronger parts, with thinner walls.
