Over the past decade there has been growing interest in the role of information in the promotion of environmentally friendly behaviour. This book examines how and why the provision of such information can affect individual decisions concerning buying or consuming a product or valuing a policy. The information can take the form of a product label or a statement in a survey questionnaire, and the decision can be what product to buy, what food to eat or how to answer a contingent valuation question. The chapters in this volume carefully explore the explanations for consumer behaviour in different scenarios where information is provided about the 'public' implications of individual decisions. The first set of chapters examines the prospects for eco-labelling as a tool of environmental policy from a variety of different perspectives. They also look at how this form of information provision compares with more familiar policy instruments in achieving efficiency goals. In the second and third sections the focus is on environmental and food labelling, in which a combination of private and public motives for purchase decisions is found. Finally, the role of information in contingent valuation surveys is considered, in particular the impact of information and time in altering stated value responses.

The Indian Listener (fortnightly programme journal of AIR in English) published by The Indian State Broadcasting Service,Bombay ,started on 22 december, 1935 and was the successor to the Indian Radio Times in english, which was published beginning in July 16 of 1927. From 22 August ,1937 onwards, it was published by All India Radio,New Delhi.In 1950,it was turned into a weekly journal. Later,The Indian listener became "Akashvani" in January 5, 1958. It was made a fortnightly again

on July 1,1983. It used to serve the listener as a bradshaw of broadcasting ,and give listener the useful information in an interesting manner about programmes,who writes them,take part in them and produce them along with photographs of performing artistS. It also contains the information of major changes in the policy and service of the organisation. Springer

This book constitutes the refereed proceedings of the 6th Conference on Knowledge Engineering and the Semantic Web, KESW 2015, held in Moscow, Russia, in September/October 2015.The 17 revised full papers presented together with 6 short system descriptions were carefully reviewed andselected from 35 submissions. The papers address research issues related to semantic web, linked data, ontologies, natural language processing, knowledge representation.

*The Oxford Handbook of Sports Economics Volume 2* Oxford University Press

This book proposes a method to evaluate the work of teachers acting in a very specific educational context: graduate programs at higher education institutions. There are many publications on the field of measurement and evaluation of teaching practices, but these studies are usually

conducted at the undergraduate level and ignore the nuances of teaching practices at the graduate level. Should professors demonstrate the same skills when they teach in undergraduate programs as they do when they teach in graduate programs? Is it appropriate to use the same assessment tools both at the undergraduate and the graduate levels? Do the teaching practices evolve the same way at the graduate and undergraduate levels? The book intends to answer these questions by introducing a methodological approach to find the relevant variables that are the foundation of professional practices at the graduate level as determined by the scientific community and through the analysis of the stakeholders' perceptions. The proposed methodological approach combines quantitative and qualitative research techniques to identify and explain, within a mixed-method framework, the most important factors that lead to teaching quality at graduate level. Therefore, How to Evaluate Teaching Practices in Graduate Practices will be a valuable resource for students, university professors and educational administrators interested in quality assurance processes in higher education institutions.

*Start Your Own Business, Sixth Edition* Springer Nature

Genre studies and genre approaches to literacy instruction continue to develop in many regions and from a widening variety of approaches. Genre has provided a key to understanding the varying literacy cultures of regions, disciplines, professions, and educational settings. GENRE IN A CHANGING WORLD provides a wide-ranging sampler of the remarkable variety of current work. The twenty-four chapters in this volume, reflecting the work of scholars in Europe, Australasia, and North and South America, were selected from the over 400 presentations at SIGET IV (the Fourth International Symposium on Genre Studies) held on the campus of UNISUL in Tubarão, Santa Catarina, Brazil in August 2007—the largest gathering on genre to that date. The chapters also represent a wide variety of approaches, including rhetoric, Systemic Functional Linguistics, media and critical cultural studies, sociology, phenomenology, enunciation theory, the Geneva school of educational sequences, cognitive psychology, relevance theory, sociocultural psychology, activity theory, Gestalt psychology, and schema theory. Sections are devoted to theoretical issues, studies

of genres in the professions, studies of genre and media, teaching and learning genre, and writing across the curriculum. The broad selection of material in this volume displays the full range of contemporary genre studies and sets the ground for a next generation of work.

*The Washington Consensus Reconsidered* OUP Oxford

Across OECD countries, almost one in every five students does not reach a basic minimum level of skills. This book presents a series of policy recommendations for education systems to help all children succeed.

**East European Accessions List** Edward Elgar Publishing

The presence of speculative bubbles in capital markets (an important area of interest in financial history) is widely accepted across many circles. Talk of them is pervasive in the media and especially in the popular financial press. Bubbles are thought to be found primarily in the stock market, which is our main interest, although bubbles are said to occur in other markets. Bubbles go hand in hand with the notion that markets can be irrational. The academic community has a great interest in bubbles, and it has produced scholarly literature that is voluminous. For some economists, doing bubble research is like joining the vanguard of a Kuhnian paradigm shift in economic thinking. Not so fast. If bubbles did exist, they would pose a serious challenge to neoclassical finance. Bubbles would contradict the ideas that markets are rational or work in an informationally efficient manner. That's what makes the topic of bubbles interesting. This book reviews and evaluates the academic literature as well as some popular investment books on the possible existence of speculative bubbles in the stock market. The main question is whether there is convincing empirical evidence that bubbles exist. A second question is whether the theoretical concepts that have been advanced for bubbles make them plausible. The reader will discover that I am skeptical that bubbles actually exist. But I do not think I or anyone else will ever be able to conclusively prove that there has never been a bubble. From studying the literature and from reading history, I find that many famous purported bubbles reflect inaccurate history or mistakes in analysis or simply cannot be shown to have existed. In other instances, bubbles might have existed. But in each of those cases, there are credible rational explanations. And good evidence exists for the idea that even if bubbles do exist, they are not of great importance to understanding the stock market.

*Addressing Inequities in Modern Educational Assessment* All India Radio (AIR), New Delhi

The International Handbook of Teacher Quality and Policy is a comprehensive resource that examines how teacher quality is conceptualized, negotiated, and contested, and teacher policies are developed and implemented by global, national, and local policy actors. Edited by two of the leading comparative authorities in the field, it draws on the research and contributions of scholars from across the globe to explore five central questions: How has teacher quality been conceptualized from various disciplinary and theoretical perspectives? How are global and transnational policy actors and networks influencing teacher policies and practices? What are the perspectives and experiences of teachers in local policy contexts? What do comparative research studies tell us about teachers and how their work and policy contexts influence their teaching? How have various countries implemented policies aimed at improving teacher quality and how have these policies influenced teachers and students? The international contributors represent a wide variety of scholars who identify global dynamics influencing policy discourses on teacher quality, and examine national and local teaching and policy environments influencing teacher policy development and implementation in various countries. Divided into five sections, the book brings together the latest conceptual and empirical studies on teacher quality and teacher policies to inform future policy directions for recruiting, educating, and supporting the teaching profession.

**Development of Water Resources in Appalachia: Economic base study** CFA Institute Research Foundation

International businesses struggle to be competitive and influential at the global market level. With the new ideas in the management and leadership disciplines, hard skills are losing or are believed to be losing their strategic relevance while soft skills are praised and highly sought after. The Handbook of Research on International Business and Models for Global Purpose-Driven Companies, a pivotal reference source, provides vital research on international business management strategies and applications within internal organizations that allow companies to strategically position themselves for increased success in the global economy. While highlighting topics such as organizational culture, internal communication, and generational workforce, this publication

explores leadership disciplines as well as the methods of handling multicultural organizations. This book is ideally designed for entrepreneurs, executives, managers, business professionals, human resource officials, researchers, academicians, and students.

*Specifications for Department of Economic Security* Routledge

Handbook of Major Palm Pests: Biology and Management contains the most comprehensive and up-to-date information on the red palm weevil and the palm borer moth, two newly emergent invasive palm pests which are adversely affecting palm trees around the world. It provides state-of-the-art scientific information on the ecology, biology, and management of palm pests from a global group of experts in the field. An essential compendium for anyone working with or studying palms, it is dedicated to the detection, eradication, and containment of these invasive species, which threaten the health and very existence of global palm crops.

*The State of the Global Education Crisis* Springer Nature

This volume brings together many of the leading international figures in development studies, such as Jose Antonio Ocampo, Paul Krugman, Dani Rodrik, Joseph Stiglitz, Daniel Cohen, Olivier Blanchard, Deepak Nayyar and John Williamson to reconsider and propose alternative development policies to the Washington Consensus. Covering a wide range of issues from macro-stabilization to trade and the future of global governance, this important volume makes a real contribution to this important and ongoing debate. The volume begins by introducing the Washington Consensus, discussing how it was originally formulated, what it left out, and how it was later interpreted, and sets the stage for a formulation of a new development framework in the post-Washington Consensus era. It then goes on to analyze and offer differing perspectives and potential solutions to a number of key development issues, some which were addressed by the Washington Consensus and others which were not. The volume concludes by looking toward formulating new policy frameworks and offers possible reforms to the current system of global governance.

**Evaluating Teaching Practices in Graduate Programs** World Bank Publications

The book provides a comprehensive overview of the latest econometric methods for studying the dynamics of macroeconomic and financial time series. It examines alternative methodological approaches and concepts, including quantile spectra and co-spectra, and explores topics such as non-linear and non-stationary behavior, stochastic volatility models, and the econometrics of commodity markets and globalization. Furthermore, it demonstrates the application of recent techniques in various fields: in the frequency domain, in the analysis of persistent dynamics, in the estimation of state space models and new classes of volatility models. The book is divided into two parts: The first part applies econometrics to the field of macroeconomics, discussing trend/cycle decomposition, growth analysis, monetary policy and international trade. The second part applies econometrics to a wide range of topics in financial economics, including price dynamics in equity, commodity and foreign exchange markets and portfolio analysis. The book is essential reading for scholars, students, and practitioners in government and financial institutions interested in applying recent econometric time series methods to financial and economic data.

**Protecting America's Estuaries: Puget Sound and the Straits of Georgia and Jaun de Fuca** Academic Conferences Limited

This book presents a cross-cultural investigation into the interplay between social capital and subjective well-being. Based on a quantitative analysis of the latest large-N cross-cultural data sets, including the World Value Survey and the European Social Survey, and covering various countries, it offers a comparative perspective on and new insights into the determinants of social capital and well-being. By identifying both universal and culture-specific patterns, the authors shed new light on the spatial and temporal differentiation of social capital and subjective well-being. The book is divided into two main parts: The first discusses mutual trust, religious and cultural tolerance, and pro-social and human values as essential dimensions of social capital. In turn, the second part studies social capital as a source of subjective well-being and life satisfaction. Given its scope, the book will appeal to scholars of sociology, social psychology, political science and economics seeking a deeper understanding of the multi-faceted nature of social capital and well-being.

*Surface Water Records of Georgia* Routledge

This book analyses the role played by schools themselves in the high rates of educational exclusion and dropping out that affects many European education systems. The author frames the analysis according to three aspects of justice – redistribution, recognition and care – to explore both how teachers explain and react to the processes of educational failure and early school

leaving, and how young people make sense and cope with the same failures. Using extensive qualitative data from schools in the Barcelona area, the author analyses the impact of school segregation, methods for managing diversity and teaching expectations: and subsequently how they can contribute to the production and reproduction of the risks of failure and ESL in contemporary education systems. This book will be of interest and value to students and scholars of educational exclusion, as well as school leaders.

Equity and Quality in Education Supporting Disadvantaged Students and Schools OECD Publishing

## EAST EUROPEAN ACCESSIONS INDEX

Entrepreneur Press

"This book brings together academicians, industry professionals, policymakers, politicians, and government officers to look at the impact of information technology, and the knowledge-based era it is creating, on key facets of today's world: the state, business, society, and culture"--Provided by publisher.

**East European Accessions List** UNESCO Publishing

Quantile regression has emerged as an essential statistical tool of contemporary empirical economics and biostatistics. Complementing classical least squares regression methods which are designed to estimate conditional mean models, quantile regression provides an ensemble of techniques for estimating families of conditional quantile models, thus offering a more complete view of the stochastic relationship among variables. This volume collects 12 outstanding empirical contributions in economics and offers an indispensable introduction to interpretation, implementation, and inference aspects of quantile regression.

*Department of Justice Investigation of False Shipbuilding Claims* Springer Science & Business Media

The world economy is experiencing a very strong but uneven recovery, with many emerging market and developing economies facing obstacles to vaccination. The global outlook remains uncertain, with major risks around the path of the pandemic and the possibility of financial stress amid large debt loads. Policy makers face a difficult balancing act as they seek to nurture the recovery while safeguarding price stability and fiscal sustainability. A comprehensive set of policies will be required to promote a strong recovery that mitigates inequality and enhances environmental sustainability, ultimately putting economies on a path of green, resilient, and inclusive development. Prominent among the necessary policies are efforts to lower trade costs so that trade can once again become a robust engine of growth. This year marks the 30th anniversary of the Global Economic Prospects. The Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). Each edition includes analytical pieces on topical policy challenges faced by these economies.

*Handbook of Major Palm Pests* Edward Elgar Publishing

This edited book focuses on the central and up-to-date issues that represent some of the most relevant challenges and limitations of International Learning Assessments (ILSAs). It specifically sheds light on the general effects of the discontinuation of face-to-face education on students at diverse academic levels during the COVID-19 pandemic. Through the lens of the most relevant experts of the field, it highlights the asymmetric effects on students based on family income, education level, or employment, imposing a heavy toll on those with less resources. It raises issues regarding the impact on the mental health of students and education professionals due to school closures. Modern education is shifting its focus from just scores to detailed, qualitative feedback. Such comprehensive insights help students identify both strengths and growth areas, making assessments more constructive. This book is aimed for researchers in the field of educational assessments, graduate and postgraduate students, policy makers, and anyone interested in making informed decisions regarding ILSAs. COVID-19 brought immense educational challenges, it also presented an unprecedented opportunity: to reassess and reform existing systems, steering towards assessments that are both fair and empowering.

*The Econometrics of Sport* Parlor Press LLC

The study of sport in the economy presents a rich arena for the application of sharply focused microeconomics, macroeconomics and econometrics to both team and individual outcomes.
