More than Mustang and Cougar. Though
 the Mustang remains Ford's most famous
 muscle car, the company had been
 building muscle cars since it introduced
 the sleek Fairlane and Galaxie models with
 optional 390 cubic-inch big-block V-8
 engines in 1961. These cars were part of
 Ford's Total Performance program, which
 tested cars in the crucible of racing at
 drag strips, oval circuits, European rally
 events, and road courses, resulting in
 legendary muscle cars like the Shelby
 Mustang, Boss 302 and 429 Mustangs,
 Mercury Cougar, Cyclone GT, and Spoiler.
 The Complete Book of Classic Ford and
 Mercury Muscle Cars covers all of Ford
 Motor Company's high-performance
 muscle cars from the early 1960s to 1973.
 It's the bible of muscle every disciple of
 Ford performance needs.

 Does the identification number 60 indicate
 a toxic substance or a flammable solid, in
 the molten state at an elevated
 temperature? Does the identification
 number 1035 indicate ethane or butane?
 What is the difference between natural
 gas transmission pipelines and natural gas
 distribution pipelines? If you came upon an
 overturned truck on the highway that was
 leaking, would you be able to identify if it
 was hazardous and know what steps to
 take? Questions like these and more are
 answered in the Emergency Response
 Guidebook. Learn how to identify symbols

for and vehicles carrying toxic, flammable,
 explosive, radioactive, or otherwise
 harmful substances and how to respond
 once an incident involving those
 substances has been identified. Always be
 prepared in situations that are unfamiliar
 and dangerous and know how to rectify
 them. Keeping this guide around at all
 times will ensure that, if you were to come
 upon a transportation situation involving
 hazardous substances or dangerous
 goods, you will be able to help keep others
 and yourself out of danger. With color-
 coded pages for quick and easy reference,
 this is the official manual used by first
 responders in the United States and
 Canada for transportation incidents
 involving dangerous goods or hazardous
 materials.
