[Repair Stations \(Us Federal Aviation Administration Regulation\) \(Faa\) \(2018 Edition\)](#) Repair Stations (Us Federal Aviation Administration Regulation) (Faa) (2018 Edition)

U.S. airlines and air cargo companies operate more than 6,700 aircraft. Nearly half of the work of maintaining, repairing and renovating this fleet is done by about 2,800 independent repair stations rather than the air carriers themselves. Examines the FAA's oversight of the aviation repair station industry. This report addresses these questions: (1) What is the nature and scope of the oversight of repair stations conducted by FAA personnel? (2) How well does FAA follow up on inspections to ensure that identified deficiencies in repair station operations are corrected? (3) What steps has FAA taken to improve the oversight of repair stations? Charts and tables.

Acceptance of Repair Stations by the JAA and JAA-Member, Etc., AC No: 145-8, March 29, 1999 Office of the Federal Register

Pilots, flight crew, and aviation maintenance technicians are required to keep current with the latest civil aviation directives from the Federal Aviation Administration (FAA). This series presents the pertinent information gathered from the Federal Aviation Regulations (FAR) and the full Aeronautical Information Manual (AIM), Flight Crew (FC), or Aviation Maintenance Technicians (AMT) combined into one easy-to-use reference. All regulations that have changed since the last release are precisely marked and indexed to provide a clear listing of subject matter and to refer pilots and staff to the correct paragraph or regulation number. The FAR sections are reproduced in reset type for easier reading, and the AIM features detailed, full-colour graphics. In addition, a suggested study list of regulations and AIM paragraphs is provided, along with a helpful list of FAA, National Transportation Safety Board, National Ocean Service, and Flight Standards District Office addresses and telephone numbers.

Government Printing Office

The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.

Parts 60 To 139

Considers legislation to abolish Civil Aeronautics Board and establish independent Civil Aeronautics Authority and Air Safety Board for promotion of aviation safety and development.

[Repair Stations \(US Federal Aviation Administration Regulation\) \(FAA\) \(2018 Edition\)](#) The Law Library presents the complete text of the Repair Stations (US Federal Aviation Administration Regulation) (FAA) (2018 Edition). Updated as of May 29, 2018 This rule amends the FAA's repair station regulations to allow the FAA to deny an application for a new repair station certificate if the applicant or certain associated key individuals had materially contributed to the circumstances that caused a previous repair station certificate revocation action. The rule also adds a new section prohibiting fraudulent or intentionally false entries or omissions of material facts in any application, record, or report made under the repair station rules, and provides that making the fraudulent or intentionally false entry or omitting or concealing the material fact is grounds for imposing a civil penalty and for suspending or revoking any certificate, approval, or authorization issued by the FAA to the person who made or caused the entry or omission. These changes are necessary because the repair station rules do not presently provide these safeguards as do other parts of the FAA's regulations. Both of these changes will enhance safety by reducing the number of individuals in the repair station industry who commit intentional and serious violations of the regulations or who demonstrate they are otherwise unqualified to hold repair stations certificates. This book contains: - The complete text of the Repair Stations (US Federal Aviation Administration Regulation) (FAA) (2018 Edition) - A table of contents with the page number of each section
