Exploring English Language Teaching Addison-Wesley Longman Limited

The goal of this book -- a theoretically based, well-organized, useful guide for teaching -- is to help the beginning teacher create a classroom environment that integrates literacy development with learning in all areas of the curriculum. The major components of an integrated language program are identified, and the skills teachers need to implement this kind of program in their own classrooms are described. Designed to be kept and used as a resource in the classroom, this text

provides fundamental information about language arts teaching. A constructivist orientation, an emphasis on teachers as reflective decision makers, and vivid portrayals of the classroom as a community of learners and inquirers are woven throughout the book. Key features include: \* a wealth of models, suggestions, and step-by-step guidelines for introducing integrated teaching and learning practices into elementary classrooms at the kindergarten, primary, and intermediate levels; \* a focus on relevant research in language arts and professional teacher development; \* true-to-life classroom narratives that model instructional strategies and demonstrate interactions between real teachers and students; and \* an innovative chapter format that makes the text accessible as a resource for student, beginning, and experienced teachers.

'This extraordinarily lucid book demonstrates that women from all walks of life get the short end of the stick because of their gender. From welfare mothers to corporate executives, Albelda and Tilly show and why the powers-that-be benefit from scapegoating and marginalizing women.' Professor Mimi Abramowitz, author, *Regulating the Lives of Women*A cogent analysis of the economic and social realities for women in the United States, across class lines. In an age when the right wing manipulates the dialogue around women's issues to separate middle- and upper-class women from their poorer sisters this book's facts, figures, and analysis provide a much needed antidote.

Presents eight specially written chapters which provide a coherent survey of major issues in the study of language and communication, and which show how these are related to questions of practical concern in the learning and teaching of second and foreign languages. The issues discussed have been selected primarily for their relevance to applied linguistics, and there is a unifying interest in how language reflects the communicative functions it performs as well as in the process involved in using language for communication.
