Multimodal interaction In summary, a well-designed multimodal system that fuses two or more information sources can be an effective means of reducing recognition uncertainty.

Performance advantages have been demonstrated for different modality combinations (speech and pen, speech and lip movements), as well as for varied tasks and different environments. Multimodal System - ScienceDirect.com | Science, health ... A multimodal biometric system increases security and secrecy of user data. A multimodal biometric system conducts fusion strategies to combine decisions from each subsystem and then comes up with a conclusion. This makes a multimodal system more accurate.
