An adaptation of the Greek classic Oedipus Rex, the story centres on Odeiwale, who is lured into a false sense of security, only to somehow get caught up in a somewhat consanguineous trail of events by the gods of the land.

This is the story of M. Francisco Fabrigas, explorer, philosopher, heretical physicist, who took a shipful of children on a frightening voyage to the next dimension, assisted by a teenaged Captain, a brave deaf boy, a cunning blind girl, and a sultry botanist, all the while pursued by the Pope of the universe and a well-dressed mesmerist. Dark plots, demonic cults, murderous jungles, quantum mayhem, the birth of creation, the death of time, and a creature called the Sweetie: all this and more waits beyond the veil of reality.

**The Gods are Not to Blame, a Play** Blackstone Publishing Crossroads in the Black Aegean is a compendious, timely, and fascinating study of African rewritings of Greek tragedy. It consists of detailed readings of six dramas and one epic poem, from different locations across the African diaspora. Barbara Goff and Michael Simpson ask why the plays of Sophocles' Theban Cycle figure so prominently among the tragedies adapted by dramatists of African descent, and how plays that dilate on the power of the past, in the inexorable curse of Oedipus and the regressive obsession of Antigone, can articulate the postcolonial moment. Capitalizing on classical reception studies, postcolonial studies, and comparative literature, Crossroads in the Black Aegean co-ordinates theory and theatre. It crucially investigates how the plays engage with the 'Western canon', and shows how they use their self-consciously literary status to assert, ironize, and challenge their own place, and that of the Greek originals, in relation to that tradition. Beyond these oedipal reflexes, the adaptations offer alternative African models of cultural transmission.

Postcolonial and contemporary African literatures have always been marked by an acute sensitivity to the politics of language,

an attentiveness inscribed in the linguistic fabric of their own modes of expression. It is curious however, that despite the prevalence of a much-touted 'linguistic turn' in twentieth century theory and cultural production, language has frequently been neglected by literary studies in general. Even more curiously, postcolonial literary studies, an erstwhile emergent and now established discipline which has from the outset contained important elements of linguistic critique, has eschewed any sustained engagement with this topic. This absence is salient in the study of African literatures, despite, for instance, the prominence of orature in the African literary tradition right up to the present day, and sporadic meditations on the part of such luminaries as Achebe and Ngũgĩ. Beyond this, however, there has been little scholarly work attuned to the multifarious aspects of language and linguistic politics in the study of African literature. The present volume aims to rectify such lacunae by making a substantial interdisciplinary and transcultural contribution to the gradual reinstatement of the 'linguistic turn' in African literary studies. The volume focuses variously on postcolonial and transcultural African literatures, areas of literary production where the confluence of several languages, whether indigenous and (post)colonial in the first case, and local and global in the second case, appears to be a central and decisive factor in the formation and transformation of the continent and its peoples' cultural identities.

**Set Fire to the Gods** Harper Collins

Classical material was traditionally used to express colonial authority, but it was also appropriated by imperial subjects to become first a means of challenging colonialism and then a rich field for creating cultural identities that blend the old and the new. Nobel prize-winners such as Derek Walcott and Seamus Heaney have rewritten classical material in their own cultural idioms while public sculpture in southern Africa draws on Greek and Roman motifs to represent histories of African resistance and liberation. These developments are explored in this collection of essays by international scholars, who debate the relationship between the culture of Greece and Rome and the changes that have followed the end of colonial empires.

**Euripides and the Gods** London : Oxford University Press Published in 1904 The Food of the Gods is a forgotten H.G. Could the story of mankind be far older than we have previously believed? Using tools as varied as archaeo-astronomy, geology, and computer analysis of ancient myths, Graham Hancock presents a compelling case to suggest that it is. "A fancy piece of historical sleuthing . . . intriguing and entertaining and sturdy enough to give a long pause for thought."—Kirkus Reviews In Fingerprints of the Gods, Hancock embarks on a worldwide quest to put together all the pieces of the vast and fascinating jigsaw of mankind's hidden past. In ancient monuments as far apart as Egypt's Great Sphinx, the strange Andean ruins of Tihuanaco, and Mexico's awe-inspiring Temples of the Sun and Moon, he reveals not only the clear fingerprints of an as-yet-unidentified civilization of remote antiquity, but also startling evidence of its vast sophistication, technological advancement, and evolved scientific knowledge. A record-breaking number one bestseller in Britain, Fingerprints of the Gods contains the makings of an intellectual revolution, a dramatic and irreversible change in the way that we understand our past—and so our future. And Fingerprints of God tells us something more. As we recover the truth about prehistory, and discover the real meaning of ancient myths and monuments, it becomes apparent that a warning has been handed down to us, a warning of terrible cataclysm that afflicts the Earth in great cycles at irregular intervals of time—a cataclysm that may be about to recur. "Readers will hugely enjoy their quest in these pages of inspired storytelling."—The Times (UK)

### STYLE IN AFRICAN LITERATURE

OUP Oxford

"How new is atheism? Although adherents and opponents alike today present it as an invention of the European Enlightenment, when the forces of science and secularism broadly challenged

those of faith, disbelief in the gods, in fact, originated in a far more remote past. In *Battling the Gods*, Tim Whitmarsh journeys into the ancient Mediterranean, a world almost unimaginably different from our own, to recover the stories and voices of those who first refused the divinities. Homer's epic poems of human striving, journeying, and passion were ancient Greece's only "sacred texts," but no ancient Greek thought twice about questioning or mocking his stories of the gods. Priests were functionaries rather than sources of moral or cosmological wisdom. The absence of centralized religious authority made for an extraordinary variety of perspectives on sacred matters, from the devotional to the atheos, or "godless." Whitmarsh explores this kaleidoscopic range of ideas about the gods, focusing on the colorful individuals who challenged their existence. Among these were some of the greatest ancient poets and philosophers and writers, as well as the less well known: Diagoras of Melos, perhaps the first self-professed atheist; Democritus, the first materialist; Socrates, executed for rejecting the gods of the Athenian state; Epicurus and his followers, who thought gods could not intervene in human affairs; the brilliantly mischievous satirist Lucian of Samosata. Before the revolutions of late antiquity, which saw the scriptural religions of Christianity and Islam enforced by imperial might, there were few constraints on belief. Everything changed, however, in the millennium between the appearance of the Homeric poems and Christianity's establishment as Rome's state religion in the fourth century AD. As successive Greco-Roman empires grew in size and complexity, and power was increasingly concentrated in central capitals, states sought to impose collective religious adherence, first to cults devoted to individual rulers, and ultimately to monotheism. In this new world, there was no room for outright disbelief: the label "atheist" was used now to demonize anyone who merely disagreed with the orthodoxy--and so it would remain for centuries."--Jacket.

The long, blind train of speedy trials drags this idealist into a madness that cuts off the heads of his nearest and dearest, and hastens his own fall as well as that of his mentor Robespierre in the aftermath of the Thermidorian Reaction. His love affair with the young watercolor-seller Élodie Blaise heightens the terrible contrast between the butcher-in-training and the man who shows himself to be quite ordinary in his daily life. Justifying this dance of the guillotine by the fight against the plot to wipe out the gains of the Revolution, in the midst of the revolutionary turmoil that traverses Paris, Gamelin is thirsty for justice, but also uses his power to satisfy his own vengeance and his hatred for those who do not think like him. He dies by that same instrument of justice that up until then has served to satisfy his own thirst for blood and terror. Gamelin's profession of painter also reflects on the book's theme. His best work is a depiction of Orestes and Electra, with Orestes resembling a self-portrait of the artist; Gamelin, like Orestes, is capable of killing his family. Élodie later comes to be identified with Electra - though, in her affair with Gamelin, where she loves him first for his mercy and then for his violence, and takes a less radical lover after he dies, she also represents France.

The surprising and compelling story of two rival geniuses in an all-out race to decode one of the world's most famous documents—the Rosetta Stone—and their twenty-year-long battle to solve the mystery of ancient Egypt's hieroglyphs. The Rosetta Stone is one of the most famous objects in the world, attracting millions of visitors to the British museum every year, and yet most people don't really know what it is. Discovered in a pile of rubble in 1799, this slab of stone proved to be the key to unlocking a lost language that baffled scholars for centuries. Carved in ancient Egypt, the Rosetta Stone carried the same message in different languages—in Greek using Greek letters, and in Egyptian using picture-writing called hieroglyphs. Until its discovery, no one in the world knew how to read the hieroglyphs that covered every temple and text and statue in Egypt. Dominating the world for thirty centuries, ancient Egypt was the mightiest empire the world had ever known, yet everything about it—the pyramids, mummies, the Sphinx—was shrouded in mystery. Whoever was able to decipher the Rosetta Stone, and learn how to read hieroglyphs, would solve that mystery and fling open a door that had been locked for two thousand years. Two brilliant rivals set out to win that prize. One was English, the other French, at a time when England and France were enemies and the world's two great superpowers. The *Writing of the Gods* chronicles this high-stakes intellectual race in which the winner would win glory for both himself and his nation. A riveting portrait of empires both ancient and modern, this is an unparalleled look at the culture and history of ancient Egypt and a fascinating, fast-paced story of human folly and discovery unlike any other.
