A practically focused guide to effective counseling of all clients Human Development Across the Life Span is a practical guide to human growth and development, moving beyond theory to include real-world applications for counselors who work with clients. Written by recognized authorities in mental health counseling and counselor education, this book is fully aligned with the American Counseling Association's accreditation standards and includes contributions by well-known and respected academics and practitioners. Based on an extensive review of course syllabi across CACREP-accredited programs, this book is organized to follow the way courses are typically taught and follows a consistent structure including pedagogical elements that help students learn. After a thorough examination of essential concepts and theories of life span development, the book moves through each stage of human growth and development to provide expert insight, short case studies, and practical applications to counseling. The full Instructor's package provides a useful set of tools, including a Respondus test bank, PowerPoint slides, and an Instructor's Manual. This book is the only text on human growth and development that emphasizes the key implications and applications for counselors, providing useful information and the insights of real experts in each subject area. Understand the developmental milestones at each life stage Appreciate clients' perspectives to better facilitate appropriate interventions Work more effectively with clients of any age, from toddlers to seniors Tailor your approach to meet the unique needs and abilities of each life stage As a counselor, you cannot approach a child's therapy the same way you approach an adult's. Even within each major category, each developmental stage includes a nuanced set of characteristics that, considered appropriately, will inform a more effective treatment plan. Human Development Across the Life Span is a comprehensive guide to understanding all of your clients, and providing the type of counseling that facilitates more positive outcomes.

When a local context really makes the difference... The new edition of this original Australian text continues to offer the most balanced coverage of theory and research for Australian students and educators and appeals to students from many backgrounds. It covers the domains of development including neurological, cognitive, social, physical and personality. The text is organised chronologically by chapter. Within each chapter content is organised topically. This structure allows for a degree of flexibility and lecturers can choose the way they wish to approach the content, whether it is topically or chronologically.

There are a million bad dates in the city that never sleeps. Mary Geneva has been on 999,999 of them. When she moved to Manhattan in her mid-20s, Mary imagined being single in New York City would be like something out of a Hollywood movie. And it was—a horror movie. "Nicknames" is a look at some of the most hopeless, horrendous, and frequently hilarious dates you can imagine. Mary shares her true-life adventures looking for Mr. Right in the treacherous New York dating scene. You'll meet men so bizarre, their names have been changed to protect the guilty. Our cast of characters includes: "Crazy Eyes," who didn't just resemble an escapee from the local mental hospital, but proved he probably belonged there "James Bond," the mysterious South African with the secret life "Germ Sperm," a guy so classy, he actually named himself Germ Sperm! And many, many, "many" more. Part memoir, part self-help book, "Nicknames" will have you laughing out loud...and possibly abstaining from dating forever."

new pedagogy, a heightened emphasis on the interplay between heredity and environment, and an enhanced focus on many social policy issues, while emphasizing the lifespan perspective throughout. The latest theories and findings in the field are made accessible to students in a manageable and relevant way. Berk's signature storytelling style invites students to actively learn beside the text's "characters." Students are provided with an especially clear and coherent understanding of the sequence and underlying processes of human development, emphasizing the interrelatedness of all domains—physical, cognitive, emotional, social—throughout the text narrative and in special features. Berk also helps students connect their learning to their personal and professional areas of interest. Her voice comes through when speaking directly about issues students will face in their future pursuits as parents, educators, health care providers, social workers, and researchers. As members of a global and diverse human community, students are called to intelligently approach the responsibility of understanding and responding to the needs and concerns of both young and old. While carefully considering the complexities of human development, Berk presents classic and emerging theories in an especially clear, engaging writing style, with a multitude of research-based, real-world, cross-cultural, and multicultural examples. Strengthening the connections among developmental domains and of theory and research with applications, this edition's extensive revision brings forth the most recent scholarship, representing the changing field of human development. The combined features that distinguish this text from other titles can be summarized with an acronym: CARE C utting edge research A pplied developmental science R eadability E ssential knowledge Written by respected child, adolescent, and adulthood development experts, this authoritative and chronologically organized text presents an integrated perspective on lifespan development. The authors write in an engaging manner, synthesizing biological, social, cultural, and socioeconomic influences as opposed to organizing content around developmental themes. Incorporation of classic and cutting-edge research includes extensive coverage of new research in developmental neuroscience, which has transformed the study of lifespan development by introducing brain maturation. At the same time, the text emphasizes the application of developmental psychology to real world problems, focusing on the ways in which knowledge of child development can inform social policy and practice in the fields of child care, education, mental health, and family life. The text also examines the many fascinating changes that take place through adulthood to help students answer the important question: Who will I become tomorrow? And with a separate epilogue that focuses on death and dying, the book takes students on a developmental journey from our first breath to our last. Reflecting the authors' combined expertise, the broad array of real-life examples resonate with students from different backgrounds and fields of study, and with different occupational goals in mind. With its distinctive and effective combination of cutting-edge research, applications, readability, and essential knowledge, this text helps students understand and appreciate what today's scientists are discovering about human development across the lifespan, how they study the process, and how this knowledge can be used to improve the lives of infants, children, adolescents, and adults around the world.
