MARKETING: THE CORE, 2/e by Kerin, Berkowitz, Hartley, and Rudelius continues the tradition of cutting-edge content and student-friendliness set by Marketing 8/e, but in a shorter, more accessible package. The Core distills Marketing's 22 chapters down to 18, leaving instructors just the content they need to cover the essentials of marketing in a single semester. Instructors using The Core also benefit from a full-sized supplements package. The Core is more than just a "baby Kerin"; it combines great writing style, currency, and supplements into the ideal package.

Charles Hill's *Global Business Today*, 4e (GBT) has become an established text in the International Business market for its excellent but concise coverage of the key global issues including the cultural context for global business, cross-border trade and investment, the global monetary system and competition in the global environment. GBT's concise chapters give a general introduction to international business - emphasizing the environmental factors, with less coverage of operations. The Cultural Dimension of Global Business (1-download) McGraw-Hill Companies

Business takes place in an increasingly global environment, crossing political and cultural boundaries that challenge corporate values. The central focus of this successful and innovative text lies in how to make and explain 'best choice' judgments when confronting ethical dilemmas in international business situations. The newly-updated version of this groundbreaking textbook continues to provide a topical and relevant analysis of the ethical dimensions of conducting business in a global political economy. From a starting point of applied ethics, the book introduces a common set of normative terms and analytical tools for examining and discussing real case scenarios. Extensive real-world examples, presented in the form of exhibits, cover issues including: foreign production, including sweatshops export of hazardous products testing and pricing of HIV-AIDS drugs advertising tobacco, alcoholic beverages and infant formula deceptive marketing techniques and bribery religious and social discrimination cultural impacts from 'music, movies and malls' environmental issues, including oil spills, rain forest preservation, global warming and genetically modified foods fair trade certification and consumer boycotts oil investments in the Sudan, Burma and Nigeria. To keep pace with the changing landscape of global business, this new edition features: updated exhibits that introduce new issues, including internet censorship and privacy, marketing and obesity, dumping electronic waste in Ghana, the costs of bottled water, and Wal-Mart's supplier code in China increased coverage of issues arising in emerging markets updated descriptions and assessments of relevant international agreements seventeen new photographs that were chosen to accompany cases designed for classroom discussion "framing questions" to guide discussion of issues in topical chapters three additional figures that help depict the ethical analysis process. The continued globalization of business increases the relevance of this textbook and its unique focus on specifically international ethical challenges faced by business, where governments and civil society groups play an active role. While most business ethics texts continue to focus heavily on ethical theory, this textbook condenses ethical theory into applied decision-making concepts, emphasizing practical applications to real world dilemmas. Anyone with an interest in the ethical implications of international business, or the business implications of

corporate responsibility in the global market, will find this book a thought-provoking yet balanced analysis. Clearly written, this has become the textbook of choice in this increasingly important field.

This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the *Principles of Management* course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation.
