1000 Practice Test Questions to Boost Your Brainpower

Sterling Publishing Company Incorporated

Named one of Vulture's Top 10 Best Books of 2020! Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top-to-bottom reform.

Everyone agrees that education is the key to creating a more just and equal world, and that our schools are broken and failing.

Proposed reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-proven fact that we all understand intuitively:

Academic potential varies between individuals, and cannot be dramatically improved. In *The Cult of Smart*, educator and outspoken leftist Fredrik deBoer exposes this omission as the

central flaw of our entire society, which has created and

perpetuated an unjust class structure based on intellectual

ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for all.

Instead, it teaches our children that hierarchy and competition are natural, and that human value should be based on

intelligence. These ideas are counter to everything that the left believes, but until they acknowledge the existence of individual

cognitive differences, progressives remain complicit in keeping the status quo in place. This passionate, voice-driven manifesto

demands that we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we'll never achieve this dream until the Cult of Smart is destroyed.
