Exam Board: AQA

Level: GCSE Subject: Mathematics First teaching: September 2015 First exams: June 2017 AQA GCSE Maths, Foundation Student Book has been approved by AQA and specially written by a team of maths experts for the Foundation tier of AQA's 2015 GCSE specification. Designed to fully support the new style of assessment, the book adopts a clear style to focus on delivering exam success via the careful development of fluency and problem solving practice. Powered by MyMaths the book links directly to the ever popular web site offering students a further source of appropriate support.

IGCSE Cambridge International Mathematics (0607)

Extended Oxford University Press - Children

A beautiful and eerie story of love and memory from the author of The Moon Field.

AQA Physics: A Level Cambridge University Press

This book looks at the purpose and pedagogy of STEM teaching and explores the ways in which STEM subjects can interact in the curriculum to enhance student understanding, achievement and motivation. By reaching outside their own classroom, teachers can collaborate across STEM subjects to enrich learning and help students relate school science, technology and maths to the wider world. Packed with ideas and

practical details for teachers of STEM subjects, the new revised edition of this book: ■ considers what the STEM subjects contribute separately to the curriculum and how they relate to each other in the wider education of secondary school students; ■ describes and evaluates different curriculum models for STEM; ■ suggests ways in which a critical approach to the pedagogy of the classroom, laboratory and workshop can support and encourage all pupils to engage fully in STEM; ■ addresses the practicalities of introducing, organising and sustaining STEM-related activities in the secondary school; ■ looks to ways schools

can manage and sustain STEM approaches in the long-term. This new revised edition is essential reading for trainee and practising teachers, those engaged in further professional development and all who wish to make the learning of science, technology, engineering and mathematics an interesting, motivating and exciting experience for their students.

HELPING TEACHERS MEET THE CHALLENGE

Hodder Education
A new series of bespoke, full-coverage resources developed for the 2015 GCSE Mathematics qualifications. Written for the AQA GCSE Mathematics

Foundation tier specification for first teaching from 2015, our Homework Book is an ideal companion to the AQA Foundation tier Student Book and can be used as a standalone resource. With exercises that correspond to each section of the Student Book, it offers a wealth of additional questions for practice and consolidation. Our Homework Books contain a breadth and depth of questions covering a variety of skills, including problem-solving and mathematical reasoning, as well as extensive drill questions. Answers to all questions are available free on the Cambridge University Press UK Schools website.

GCSE Mathematics for

AQA Foundation

Student Book Letts & Lonsdale

The Higher Tier Student Book provides the most in depth and up-to-date material. Written to reflect how the exam papers are structured and marked, this book provides extensive guidance together with tasks to enable students to develop the skills they need to succeed in each question.

Mathematics Higher Level for the IB

Diploma Option Topic 9 Calculus Evan-Moor

This title forms part of the completely new Mathematics for the IB Diploma series. This highly illustrated book covers topic 8 of the IB Diploma Higher Level Mathematics syllabus, the optional topic Sets, Relations and Groups.

It is also for use with

the further mathematics course. Based on the new group 5 aims, the progressive approach encourages cumulative learning. Features include: a dedicated chapter exclusively for mixed examination practice; plenty of worked examples; questions colour-coded according to grade; exam-style questions; feature boxes throughout of exam hints and tips.

GCSE Maths Edexcel Higher Student Book
(Collins GCSE Maths)

HarperCollins UK

A new series of bespoke, full-coverage resources developed for the 2015 GCSE Mathematics qualifications.

Approved by AQA and created specifically for the GCSE Mathematics Foundation tier

specification for first teaching from 2015, this Student Book covers the new GCSE Mathematics qualification. With a strong focus on developing problem-solving skills, reasoning and fluency, it helps students understand concepts, apply techniques, solve problems, reason, interpret and communicate mathematically.

Written by experienced teachers, it also includes a solid breadth and depth of quality questions set in a variety of contexts. GCSE Mathematics Online - an enhanced digital resource incorporating progression tracking - is also available, as well as Problem-solving Books, Homework Books and a free

Teacher's Resource.

AS AND A-LEVEL YEAR 1

Cambridge University
 Press

Decision Maths D1 is
 part of a brand new
 series of books that
 match the AQA
 specifications for Maths
 A-level, to be first
 taught from September
 2004. The book has
 been produced in
 consultation with a
 Senior Examiner to
 ensure complete and

authoritative coverage of the Decision 1 module. It contains all the discrete maths that students need to know for AS-level

Mathematics, or for the first year of an A-level.

QCE Maths Methods 3&4 Complete

Course Notes (2022)

HarperCollins UK

Anatomy and physiology is designed for the two-semester anatomy and physiology course taken by life science and allied health students.

Edexcel Linear

Cambridge University Press

Written by well-respected authors, the Cambridge Checkpoint Mathematics suite provides a comprehensive structured resource which covers the full Cambridge Secondary

1 Mathematics framework in three stages. This Practice Book for Stage 9 contains further exercise questions for practice in the classroom or at home. It provides coverage of the Problem Solving section of the framework, with questions relating to these framework statements highlighted.

Edexcel Chemistry

Pearson Education

Aimed at Level 2 maths work and suitable to support the AQA Level 2 Certificate in Further Mathematics. Guide students through higher level maths work with this handy practice book, featuring short topic explanations, worked examples and loads of graded practice

exercises that will stretch and challenge.

The Connection of the Physical Sciences OUP Oxford

This title forms part of the completely new Mathematics for the IB Diploma series. This highly illustrated book covers topic 9 of the IB Diploma Higher Level Mathematics syllabus, the optional topic Calculus. It is also for use with the further mathematics course.

Based on the new group 5 aims, the progressive approach encourages cumulative learning. Features include: a dedicated chapter exclusively for mixed examination practice; plenty of worked examples; questions colour-coded according to grade; exam-style questions; feature boxes throughout of exam

hints and tips.

AQA GCSE MATHS: FOUNDATION

HarperCollins UK

Please note this title is suitable for any student studying:
Exam Board: AQA
Level: A Level Subject: Physics First teaching: September 2015 First exams: June 2017 Fully revised and updated for the new linear qualification, this Student Book supports and extends students through the new course whilst delivering the maths, practical and synoptic skills needed to succeed in the new A Levels and beyond. The book uses clear straightforward explanations to develop real subject knowledge and allow students to link ideas together while developing essential

exam skills. N.B.Covers all optional AQA Physics topics with introduction and summary sections; full support for each option is provided on AQA A Level Physics Kerboodle.

Study and Test

Practice HarperCollins UK

This series has been developed specifically for the Cambridge International AS & A Level Mathematics (9709) syllabus to be examined from 2020. Cambridge International AS & A Level Mathematics: Mechanics matches the corresponding unit of the syllabus, with clear and logical progression through. It contains materials on topics such as velocity and acceleration, force and motion, friction, connected particles,

motion in a straight line, momentum, and work and energy. This coursebook contains a variety of features including recap sections for students to check their prior knowledge, detailed explanations and worked examples, end-of-chapter and cross-topic review exercises and 'Explore' tasks to encourage deeper thinking around mathematical concepts. Answers to coursebook questions are at the back of the book.

Daily Language Review
McGraw-Hill Education (UK)

Rewritten and redesigned in full-colour, A4 format, this new York Notes for GCSE edition of An Inspector Calls will help your students achieve the best possible

grade. Written by GCSE examiners to give all students an expert understanding of the text and the exam, it includes: * *An invaluable exam skills section with essay plans, sample answers and expert guidance on understanding the question so students will know exactly what they need to do to succeed. *A wealth of useful content including key quotes, checklists, study tips and short activities that will help students revise efficiently and remember everything they need to write the best answers. *The widest coverage with in-depth analysis of character, themes, language, context and style, all helping students to succeed in the exam by demonstrating how

well they understand the text.

York Notes

'An excellent companion to Learning to Teach in Secondary School ... full of good ideas and better advice ... Mentors will certainly want to use it, and so, I'm sure, will the rest of the history department ... Make sure they buy one, and keep your copy under lock and key.' - Michael Duffy, Times Educational Supplement 'A very well written and readable book. Overall, this is an excellent book and one which students and teachers outwith England would find a valuable addition

to their library.' – Scottish Association of Teachers of History, Resources Review 'This book is without question the standard text for the history PGCE market.' – Dr Ian Davies, University of York, on the first edition. Learning to Teach History in the Secondary School provides an accessible introduction to teaching and learning history at secondary level. Underpinned by a theoretical perspective and backed up by the latest research, it encourages student teachers to develop a personal approach to teaching history. This fourth edition has been thoroughly updated for the new curriculum, with a brand new chapter on subject knowledge and a new

section on action research to better support those reflecting on and developing their own practice. It provides an array of references and materials that give a sound theoretical foundation for the teaching of history, including weblinks to further resources, while a range of tasks will enable students to put their learning into practice in the classroom. Practical advice is combined with reference and access to a wide range of recent and relevant research in the field of history education, to support Masters Level research and aid reflective practice. Key issues covered include: The benefits of learning history Planning The use of language and

strategies for teaching Inclusion Technology in history teaching Assessment Continuing professional development Offering comprehensive and accessible support to becoming a history teacher, this book remains an invaluable resource for all training and newly qualified history teachers.
