Fiction. Women's Studies. Short Stories. Beginning with a story of an ex sex-worker drifting through a small rural town in the south, and ending with a young woman's wedding night, who learns from her new husband what it takes to kill a man, Nash writes across the complications of working class women, rendering their desires with visceral prose and psychologically dissecting the fundamental root that threads her work: craving and the conflicts within.

SolderSmoke is the story of a secret, after-hours life in electronics. Bill Meara started out as a normal kid, from a normal American town. But around the age of 12 he got interested in electronics, and he has never been the same. To make matters worse, when he got older he became a diplomat. His work has taken him to Panama, Honduras, El Salvador, the Spanish Basque Country, the Dominican Republic, the Azores islands of Portugal, London, and, most recently, Rome. In almost all of these places his addiction to electronics caused him to seek out like-minded radio fiends, to stay up late into the night working on strange projects, and to build embarrassingly large antennas above innocent foreign neighborhoods. SolderSmoke takes you into the basement workshops and electronics parts stores of these exotic foreign places, and lets you experience the life of an expatriate geek. If you are looking for restaurant or hotel recommendations, look elsewhere. But if you need to know where to get an RF choke re-wound in Santo Domingo, SolderSmoke is the book for you. SolderSmoke is no ordinary memoir. It is a technical memoir. Each chapter contains descriptions of Bill's struggles to understand (really understand) radio-electronic theory. Why does P=IE? Do holes really flow through transistors? What is a radio wave? How does a frequency mixer produce sum and difference frequencies? If these are the kinds of questions that keep you up at night, this book is for you. Finally, SolderSmoke is about brotherhood. International, cross-border brotherhood. Through the SolderSmoke podcast we have discovered that all around the world, in countries as different as Sudan and Switzerland, there are geeks just like us, guys with essentially the same story, guys who got interested in radio and electronics as teenagers, and who have stuck with it ever since. Our technical addiction gives us something in common, something that transcends national differences. And our electronics gives us the means to communicate. United by a common interest in radio, and drawn closer together by means of the internet, we form an "International Brotherhood of Electronic Wizards."

In this inspirational and humorous collection of essays, author John Dietsch sees his addiction to and passion for fishing as a parable that can help us shift from compulsive thinking to mindfulness and a closer connection to God. From creating fishing scenes on the set of *A River Runs Through It* in Montana, to directing fly fishing shows in New Zealand and from exploring deep canyons in California to guiding in Colorado, John shares his experiences and asks the question: what are we really fishing for? Through John's journeys across the globe, we discover that the same pursuit in fishing—of what is elusive but attainable—can be applied to our own spiritual journey. In the end,

Dietsch uncovers his own truth under the rocks of a childhood river, recognizing the loss of both his brothers as the path of acceptance and faith that is graced by waters.

All the fundamentals. No fluff. Learn more with less! A truly revolutionary American Government textbook, Christine Barbour's AmGov: Long Story Short, responds to the needs of today's students and instructors through brevity and accessibility. The succinct ten chapters are separated by tabs that make it easy to skim, flip, revisit, reorient, and return to content quickly. Reading aids like bullets, annotations and arrows walk students through important facts and break up the material in short, engaging bites of information that highlight not only what is important but why it's important. Though brief, this core book is still robust enough to provide everything that students need to be successful in their American Government course. Whether for the on-the-go student who doesn't have time to read and digest a lengthy chapter, or the instructor who wants a book that will stay out of their way and leave room for plenty of supplementary reading and activities, AmGov provides a perfectly simplified foundation for a successful American Government course.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Tombs and burial customs are an exquisite source for social history, as their commemorative character determines them to express much of the contemporaneous ideology of a society. This book presents, for the first time, a holistic view of the funerary culture of Rome and its surroundings during the third century AD. Barbara Borg argues that during this time there was, in many ways, a return to practices known from the Late Republic and early imperial period, with spectacular monuments for the rich, and a large-scale reappearance of collective burial spaces. Through a study of terraced tombs, elite monuments, the catacomb nuclei, sarcophagi, and painted imagedecoration, this volume explores how the third century was an exciting period of experimentation and creativity.

After decades of being forgotten, northern Peru has finally begun emerging from the shadows of the country's better-known south. The magnificent ruins at Kuelap, the Gocta waterfall, the historical cities of Cajamarca and Trujillo, and jungle excursions along the Huallaga River are up-and-coming destinations for more adventurous travelers seeking to avoid the crowds in the south. And yet, northern Peru wasn't always unexplored territory for travelers. In the 19th century, the long-forgotten Moyobamba Route was the main connection between Peru's Pacific coast and the Amazon River. Among the adventurers who rode the old mule trails were a Royal Navy lieutenant, a Swiss nobleman, a French reporter, an American professor, and a famous early British aviator. Recently retired, the author set off to follow the ghosts of these and other early travelers, weaving together their stories with his own adventures each step of the way. But the story of the Moyobamba Route is just as much about the people who lived there as those who wandered through. A Utopian bishop, a mountain warlord, a jungle-raised feminist, a future Hollywood starlet, war heroes, German immigrants, entrepreneurs, and missionaries are among the characters who make up the region's

rich history. Drawing on original Spanish language materials for much of the Peruvian history, the author brings some of their stories to English language readers for the very first time.

In an age of skepticism and disenchantment, people long for something that satisfies our mind's search for truth and our heart's desire for beauty and meaning. Stand Firm: Apologetics and the Brilliance of the Gospel argues that the gospel satisfies both of these needs. It is true and rational, but it is also inherently attractive and provides meaning and purpose. In short, the gospel is brilliant. It is brilliant, in one sense, because of the broad variety of evidences for its truth. But it is also brilliant given its beauty, goodness and the meaningful life it offers. The book provides up to date responses to questions about the existence of God, the reliability of the Bible, Jesus and the resurrection, and the problem of evil. It also treats unique topics such as understanding truth, knowledge and faith, the claims of alternate faiths, religious disagreement, etc. Each chapter attempts to connect these considerations with the gospel so that we may stand firm in our faith.

This EYIEL Special Issue is devoted to the European Union's Trade Defence Instruments (TDIs). The recent legislative changes at the EU level are indicative of global policy trends and legal challenges surrounding trade remedies law. Although TDI measures have always been a fiercely debated topic in international economic law, they have received increased attention in recent years. This book offers a comprehensive and insightful legal analysis of the recent legislative changes at the EU level and investigates TDIs in the context of regional trade relationships, including the United Kingdom in post-Brexit times. Beyond the EU, it examines the national trade defence law frameworks of important trading partners such as Switzerland, the United States, China and Vietnam. The selected contributions in this edited volume examine the recent trends in trade defence law from a legal and practical perspective and offer analytical insights from EU officials, legal practitioners and leading academics. A unique collection of essays in a changed global framework, this EYIEL Special Issue provides an up-to-date overview of the state of play of trade defence in the EU and around the globe.

This book gets behind much generality about globalisation to examine the production of relatively familiar commodities such as refrigerators and ovens in different countries. By considering a range of countries - China, Taiwan and South Korea, South Africa, Brazil and Turkey - it makes a substantive contribution to the understanding of the diffusion of management methods, the role of the state in employee relations, the nature of trade unionism and the impact of social structure on production relations.
