Desperate, fearless, and hunted For former Navy SEAL Dare O'Rourke, Section 8 was legendary. The son of one of its missing members, he grew up in the shadow of its secrets. All he knew was that it was a cabal of operatives discharged from branches of the military and reassigned to extremely dangerous, off-the-books international missions. And that their handler was as shrouded in mystery as the missions themselves. Nothing can stop them. Nothing can break them. Now the handler of Section 8 has given extreme orders to kill any remaining members, along with their families. Dare must save his long-lost half sister, Avery, whom he was never meant to meet. Determined to fight for their lives and find their missing father, Dare and Avery bring together those who are in danger because of their relationship to Section 8 for one last mission—to avenge their families and

to survive.

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush

Your Enemy Totally"). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

Using real stories with quantitative reasoning skills enmeshed in the story line is a powerful and logical way to teach biology and show its relevance to the lives of future citizens, regardless of whether they are science specialists or laypeople." —from the introduction to *Science Stories You Can Count On* This book can make you a marvel of classroom multitasking. First, it helps you achieve a serious goal: to blend 12 areas of general biology with

quantitative reasoning in ways that will make your students better at evaluating product claims and news reports. Second, its 51 case studies are a great way to get students engaged in science. Who wouldn't be glad to skip the lecture and instead delve into investigating cases with titles like these: • "A Can of Bull? Do Energy Drinks Really Provide a Source of Energy?" • "ELVIS Meltdown! Microbiology Concepts of Culture, Growth, and Metabolism" • "The Case of the Druid Dracula" • "As the Worm Turns: Speciation and the Maggot Fly" • "The Dead Zone: Ecology and Oceanography in the Gulf of Mexico" Long-time pioneers in the use of educational case studies, the authors have written two other popular NSTA Press books: *Start With a Story* (2007) and *Science Stories: Using Case Studies to Teach Critical Thinking* (2012). *Science Stories You Can Count On* is easy to use with both biology majors and nonscience students. The cases are clearly written and provide detailed teaching notes and answer keys on a coordinating website. You can count on this book to help you promote scientific and data literacy in ways to prepare students to reason quantitatively and, as the authors write, "to be astute enough to demand to see the evidence."

The Oldman's English Lessons Forge Books The telling of this story begins during the period of Dr. Israel Newman's grief

inflicted by the traumatic death of his toddler son, Markus. As a necessity of heaven, he insists it must be a physical place where he can hold his son again. One day, on his way to work as a pain management specialist caring for people dependent on opioids, he observes impossible changes of Mount Rainier, with disappearance and reappearance of Tahoma Peak. He thinks he might be losing his mind. In his psychology support group, a socially and professionally ostracized genius of physics, the amusing Michael Hannity, suggests that what really happened was Israel's mind moving between different timelines. As Michael explains spiritual travel in relativistic spacetime, Israel sees and hopes for a possibility to prevent the death of his son. He cannot control his travels and experiences horror, romance, humor, and intrigue in the lives of others. He falls in love. At the end of a series of hellish experiences, he encounters for the first time, Jesus as a lad of twelve, who admonishes him to make heaven in the lives of others. Jesus appears again and again, and in whose lives? We see a psychologically troubled, human Jesus and within him an omniscient presence. A tour-de-force of imagination, wildly inventive and funny as well as thought-provoking and moving, this book will draw you into a world you never dreamed of. It answers many questions and asks some more. You will want to talk about it.

WORDS AND SOUNDS

Lorenz Educational Press

The word perspicacity is not only a favorite of author Dan Kerstein, it is his mantra as well. The simple definition of this word is acute mental awareness—the ability to be constantly aware of one's physical surroundings. Over the course of his life, Kerstein has learned that successful businesses are run by "survivalists", people who can observe and understand what is going on in the 360-degree circle that surrounds them at any given time. That's perspicacity at its best.

Unfortunately, Kerstein has had to deal with a gaggle of fools and know-it-alls throughout his career who have inspired the thoughts in *I'm Retired: Now I Get Even* on subjects such as the following: Entrepreneurship: The art of hiring and firing oneself on a regular basis Egos and intelligence: The 97% rule The twenty-first

century's greatest oxymoron: Customer Service Sex, lies, and brownnosing: AKA, the truth about climbing the corporate ladder There was a long list of people Kerstein did not wish to thank for this book, but that didn't seem quite fair because they provided the cannon fodder that makes up most of the chapters. So instead, he thanks them for being stupid, ignorant, egotistical, maniacal, harmful, fatuous, indifferent, macabre, remorseless, and/or all-around jerks.
