- Refueled and ready to go: a completely revised and perfected new edition of the bestseller with unpublished studio photographs and updated texts- To mark the 110th anniversary of the automobile manufacturer and its rich tradition- Builds on the successful original edition (10,000 copies sold) and René Staud's other automotive publications at teNeues- As James Bond's vehicle, Aston Martin is firmly entrenched in pop cultureOne icon meets another: For true automotive enthusiasts, it was no surprise that the paths of Aston Martin and René Staud would cross at some point. The British brand's meteoric success story began almost exactly 110 years ago. Its claim of building road-ready racing cars has always remained intact. Legendary victories at Le Mans or the Nürburgring, for example, contributed to Aston Martin's appeal, as did the fact that Her Majesty's secret agent, James Bond, drove the elegant, British-built DB5 as early as 1964. In this new edition of the best-selling book, multiple award-winning automotive photographer René Staud presents breathtaking new photographs of both old and present-day models -- even those knowledgeable about the brand will discover stories not yet heard. Text in English and German.

A history of all four generations of compact Jaguar, and their Daimler equivalents, tracing the gradual development of Sir William Lyons' original idea over a period between 1955 and 1969. From the powerful, luxury MK 1 and 2 cars to the 4.2-litre 420, this book covers design, development and styling; special-bodied variants; racing performance; buying and owning a compact Jaguar saloon model and, finally, specifications and production figures. This history of all four generations of compact Jaguar and their Daimler equivalents manufactured between 1955 to 1969 will be of great interest to all motoring and Jaguar enthusiasts. Topics covered include buying and owning a Jaguar saloon model; design, development and styling; the cars' competition successes and rare special-bodied models. Superbly illustrated with 208 colour photographs.

Cosworth Racing goes from strength to strength in the new century. Now controlled by Ford, it continues to build the finest racing engines in the world. Cosworth engines are being used by three

Formula 1 teams - Jaguar, Jordan and Minardi - in 2003. The latest turbocharged V8 is used by every runner in the USA-based CART series. Cosworth Racing also builds winning engines for Ford's Focus WRC cars, and for the ambitious Aprilia racing motorcycle team. The fully updated fifth edition of this best-selling book tells the inside story.

Cambridge University Press

Few war films made about the 1939-45 period are complete without sight of a boxy little Kübelwagen light utility vehicle being smartly driven by a German officer. Designed by Ferdinand Porsche and built by Volkswagen, the 'Kübel' was to the Germans what the Jeep was to the Allies and was used widely by the Wehrmacht and the Waffen-SS. When production ceased at the end of the war, 50,435 Kübelwagen had been built. Of simple but sturdy construction, the VW Type 82 Kübelwagen (which translates as 'bucket car' because of its similarity to a metal bathtub on wheels) was based closely on the legendary VW Beetle. Its winning design features included air cooled engine (the absence of a radiator meant the engine was less vulnerable to bullet damage), a light-weight, flat and smooth under-body that allowed the car to slide over the surface when its wheels were sinking into sand, mud or snow, independent suspension, portal gear hub reduction and self-locking differential. Because the body was not a load-bearing part of the structure of the vehicle it could easily be modified to special purposes. Several dozen variants of the 'Kübel' were developed and built during the war including its cousin the Schwimmwagen. The VW Type 128 and 166 Schwimmwagen (which means floating or swimming car) were amphibious four-wheel drive off-roaders. Like the Kübel, they were used widely by the Wehrmacht and the Waffen-SS during the Second World War. The Type 166 Schwimm is the most numerous mass-produced amphibious car in history (14,265 between 1942 and 1944). Erwin Komenda, Ferdinand Porsche's first car body designer, developed an all-new unitized body-tub structure for the Schwimmwagen swimming car. When crossing water a screw propeller could be lowered from the rear deck engine cover and coupled to the engine's crankshaft to provide drive. The 'Schwimm' also shared many of the Kübel's mechanicals. The appeal of the Kübel lived on long after the war's end when a derivative version, the Volkswagen Type 181, was manufactured by VW from 1968 to 1983. This was a two-wheel drive, four-door, convertible, off-road military vehicle, which had been developed for the German Army but was also sold to the civilian market as the Kurierwagen in Germany, the Trekker in the UK, the Thing in the US, and the Safari in Mexico. In recent years both the Kübel and Schwimm have acquired something of a cult status among military vehicle collectors worldwide, particularly in Europe (eg, Germany, Poland Czech Republic, Switzerland), the UK and US. There are literally dozens of Kübelwagen and Schwimmwagen enthusiast/owner/interest groups! About

150 original Type 166 Schwimmwagens remain today.

What is innovation? The dictionary defines it as "renewal through the use of new processes and technologies." In advertising, everything is an innovation. But what is truly innovative? Since 1930, the Pininfarina design firm of Turin, Italy, has been answering that question. This is where the Cistalia 202 was developed, the first vehicle to be added to MoMA's permanent collection. The list goes on: the interior of the new stadium for Juventus Turin, the Nash Healey Spider seen in Billy Wilder's Sabrina, and the legendary Ferrari Dino 246 and Ferrari Testarossa. However, Pininfarina is not resting on its laurels, but blasting full speed ahead into the future with an expanded portfolio while honoring its heritage. Whether it's a solution for sustainable mobility, interior designs, or household gadgets, all Pininfarina projects bear an unmistakable signature. To visually celebrate the history and influence of Pininfarina, there is no one better suited than a man who has made his own unmistakable mark on automotive photography.Gunther Raupp has spent 30 years photographing cars for Ferrari's official calendars, which enjoy a cult following among the experts. He has two successful books with teNeues, the most recent being The Ferrari Book. As a star photographer and connoisseur of industrial design, Raupp showcases a company that embodies true italianita.

VW Kubelwagen/Schwimmwagen (VW Type 82 Kubelwagen (1940-45) / VW Type 128/166 Schwimmwagen (1941-44) Haynes Publications

For more than 120 years (1714-1837) Great Britain was linked to the German Electorate, later Kingdom, of Hanover through Personal Union. This made Britain a continental European state in many respects, and diluted her sense of insular apartness. The geopolitical focus of Britain was now as much on Germany, on the Elbe and the Weser as it was on the Channel or overseas. At the same time, the Hanoverian connection was a major and highly controversial factor in British high politics and popular political debate. This volume was the first systematically to explore the subject by a team of experts drawn from the UK, US and Germany. They integrate the burgeoning specialist literature on aspects of the Personal Union into the broader history of eighteenth- and early nineteenth-century Britain. Never before had the impact of the Hanoverian connection on British politics, monarchy and the public sphere, been so thoroughly investigated.
