America takes 75% of the worlds medications and seven out of ten people die of chronic and preventable diseases. The health care system meant to remedy this problem is now the third leading cause of death itself. This exists because we often ignore our health or assume we are healthy until disease hits. Then once disease hits we manage the sickness with drugs and surgeries. That's not health care, that's sick care. This book is the guide to experience real health. If you manage sickness and disease you get sickness and disease, if you build health you get health.

Public Policy Analysis, the most widely cited book on the subject, provides readers with a comprehensive methodology of public policy analysis. Starting from the premise that policy analysis is an applied social science discipline designed for solving practical problems facing public and nonprofit organizations, the book bridges the gap between theory and practice. It provides practical skills for conducting policy analysis and communicating findings through memos, position papers, and other forms of structured analytical writing. The book asks readers to critically analyze the arguments of policy practitioners as well as political scientists, economists, and political philosophers.

Cultural is a construction runs on an ongoing basis from a bad to a better direction from and for humans in an environment to achieve prosperity, happiness and peace of all people in an area. Clash of cultural is a necessity that is inevitable in the era of information and globalization. There is a strong cultural dominance in globalization to imply a false consciousness to the younger generation and its hegemonic. Even some people being hegemony information slaves (hegeformaslaves) by cultural and sadly they do not even realised it. There is a cultural resistance, adaptation, and acculturation occur. When thinking about the need for a strong cultural identity, the need for redigging, reshaping, and finding again the ancestral identity to be used as construction of new cultural identities as a unifying with the goal of unity, prosperity, happiness and peace in a community. This globalization era required a local merger with global thought that does not cancel each other out, but belong together and complete it. Thinking "local go global" resulting in a mix of local and global (Locglo). Instead of thinking global-local (Glocal), global tends to intimidate and repress local in the sense that the main priority is global and not local. Locglo is thought that promotes local equivalent to the global. Dayak in the need of reconstructing a better cultural identity requiring comparative studies with people on the island of Bali that measures future construction design thinking this culture can be projected and

In the past years, genome projects for numerous human parasites have been completed and now allow first in depth comparisons and evolutionary conclusions. The genomes of parasites reflect the coevolution with their host, metabolic capacities depending on their respective habitat in the host. Gut parasites usually have an anaerobic metabolism, while blood parasites have an aerobic metabolism, intracellular parasites escape the immune system, while extracellular parasites evade the immune system, usually by antigenic variation.

Comprehensive genome data now being available allow us to address profound scientific questions, such as which traits enable the parasite to survive in the human host, which to cause disease and which can be used as drug targets. This book intends to give an overview of the state of knowledge on “the molecules” of protozoan parasites - on their genomes, proteomes, glycomes and lipidomes.

The truth, in legal terms, is the version of "what happened" which carries most authority. This original and thought-provoking book looks at how this narrative is constructed in Muslim societies, and which truths are privileged over others in constructing it. Looking at a range of contrasting case studies, from Sharia courts to inquiries into police abuse, this book explores how ordinary stories are transformed into authoritative truths.
